> The universal indications of the approach of woman's great enemy, inflammation and disease of the ovaries, are a dull throbbing pain, accompanied by a sense of tenderness and heat low down in the side, with occasional shooting pains. On examination it may be found that the region of pain will show some swelling. This is the first stage of inflammation of the ovaries. "DEAR MRS. The following week I read an advertisement in the paper of your Vegetable Compound in such an emergency, and so I decided to try it. Great was my joy to find that I actually improved after taking two bottles, so I kept taking it for ten weeks, and at the end of that time I was cured. I had gained eighteen pounds and was in excellent health, and am now. "You surely deserve great success, and you have my very best

"DEAR MRS. PINKHAM:- I cannot thank you enough for what your Vegetable Compound has done for me. If it had not been for your medicine, I think I would have died. "I will tell you how I suffered. I could hardly walk, was unable to sleep or eat. Menstruction was irregular. At last I had to stay in my bed, and flowed so hadly that they sent for a doctor, who said I had inflammation of the ovaries, and must go through an operation, as no medicine could help me, but I could not do that.

"I received a little book of yours, and after reading it, I concluded to try Lydia E. Pinkham's Vegetable Compound, and I am now a well woman. I shall praise your medicine as long as I live, and also recommend the same to anyone suffering as I

There has been quite a revival of activity in hardware and metals at Toronto this week, but in dry goods and milinery the sales are somewhat slow as a result of the unseasonably cold weather. The outlook for business is encouraging.

At Quebec the breaking up of the country roads has interfered considerably with wholesale trade, which is reported, as a rule, quiet. Collections are still slow. Natural and Artificial Beds in Eastern Part of State.

In eastern Virginia there are several thousand acres of oyster farms, where oysters are raised by artiof such beds in the Chesapeake Bay and as they are too close together strewn along on the bottoms, where the rate of 600 to 1,000 bushels per acre, such young oysters mature and ripen off for the market, some in one and the rest in two years.

There is a profit in such work, when intelligently managed, of 25 100,000 acres of artificial oyster beds are made to grow an oyster crop, in addition to the acreage em- ont of the Temps at Constantinopte braced in the "natural" beds. The oyster farmers are harvesting the crop at present. While the greater portion of the United States is under snow, and in the grasp of winter, our oyster farmers are busy harvesting their crop, which requires no fertilizer, food or fencing, and costs only for the seed, the sowing and the harvesting, and which pays a good dividend on the investment. From 12,000 to 15,000 hands
