New Summer Shirts,

Freshest Groceries always on hand.

## ROBT. BURNETT.

### WELBECK.

Mr Thos Potter, our prominent mill-man, is busy cutting shingles, breaking all former records, two boys and himself turning out shingles at the rate of 30 bushes per day. Mr Potter says he has the best boys in the County, and I guess he is right.

Most of the farmers in our vicinity will finish seeding this week.

Mr and Mrs C Schurman, of Edge Hill, Sundayed under the parental roof.

Mr David Watson is going to build a new barn, taking Mr Alexander's plan, building the stone work this coming fall and the frame work next spring.

There has only been two mosquitoes seen in the burg yet this spring, and er—well. I guess they're dead; the Lord winter must have frozen them all out.

Speckled trout are reported scarce in the Styr this spring—trout they are out peacocking on dry land.

Messrs Henry and Sparling's gang of chipmunks have deserted the hardwood bush and taken to the cedar swamp where they are busy making ties, posts and saw-logs.

Mr Wm Lake stepped on a rusty nail on Friday, and is consequently laid off work.

### VARNEY.

Miss Jennie Allan is home from Hamilton on a visit to her old home.

Mr Wm Smith, Sr., is now domiciled in the house on the old T Petty farm, now owned by Dr Mansfield Leeson.

Mr Theodore Leeson, assisted by Cameron Lauder is rushing crop in this spring on two farms, the old home place and his brother the Dr's.

Congratulations to Mr Landels Marshall of the back line on taking to himself a wife.

Miss Mabel Dunn went to Toronto on Wednesday last and will be there for the summer.

Miss Jean Marshall is leaving this week to spend a holiday with her sister and brother-in-law, Mr and Mrs Wm. McIlvride of Craighurst.

Geo Gray, who underwent a serious operation lately, is around again.

Mr Jas McMeekin and Mr Quintin Pettigrew are both in very poor health and causing their friends anxiety.

Mr Richard Allan has left home for the summer months. His brother, Max, will work the farm this summer.

### NORTH EGREMONT.

The Ladies' Institute held its May meeting on Wednesday last the 11th, at the home of Mr and Mrs Wm Ramage, when 20 ladies of the progressive sort, assembled and discussed matters pertaining to the home and its surroundings. Mrs T McGirr, Durham, Pres., opened the meeting by offering some trite remarks.

The report of the Guelph meeting in Dec. by Mrs Geo Binnie was read by the Pres. A paper on "Hygiene" was read by Miss May Dixon, Ansonia essay by the Secy., Miss Kate Dixon, on "Nature's little Bill" was given. We do not know whether this refers to some little Wm or a bill of expense, or the bill of a spring chicken, as we were somewhat afraid until near the finish. We did not take to the woods as advised, tho' we remark that the weather has been damp and showery since.

The annual meeting of the Inst. will be held at Mrs Chas Gray's, Sr., Varney, on the 1st June. A series of meetings will be held in June at Holstein, Dromore and Durham, on the 9th, 10th & 11th, respectively, at which Miss Lillian Gray, of Toronto, and Miss Lizzie Rife, of Hespeler, will be the delegates. These meetings will be similar to the ones held last summer, when we hope to have a "loaf" of the pie baked after modern methods. The July meeting will be held at Mrs David Hamilton's, at the Lake where aquatic scenery and cement machinery will be added to feminine beauty. There, ladies, how will that do?

The Presbyterians of Amos Church are practicing their Song Service on Bonar's hymns, to be elucidated by Pastor Campbell, on Sunday night next.

Mr Roach will preach to mothers at the Ebenezer Church on Sunday afternoon.

We are sorry to report the continued illness of Mrs Henry Hooper, S. Glenelg.

Mr Adam Hall has got part of his barn treated to a new roof, Mr Colin Kennedy doing the work.

Mr Geo Lawrence, Jr., is improving somewhat this last month. We hope as the warm weather comes in he will be his wonted self again.

Mr Jas H Colbridge went to Ceylon the beginning of the week to meet his cousin, a Mrs Johnston, from Balacava.

Miss Charlotte Baxter, after a lengthy stay in Toronto, is home on a visit to mother and friends.

### HOPEVILLE.

Mr Wm Dezell, of Badjeros, a former resident of this place, has been around here visiting his friends before he leaves for a trip to British Columbia, as he is going there this week. He has two sons there.

A Bicycle Accident—A few evenings ago, Mrs Jno Dezell, an old lady, and Mrs J Scott, were going home from Mrs McArde's who has been heaving between life and death. They were run against by Keller McArthur who was on a bicycle and Mrs Dezell was knocked down and senseless. The accident was seen by Mr Wm Gleister who ran to her assistance and helped to lift and carry her to her house in the village. It was dark and she was just parting with Mrs Scott at the time. Cannot but say that there is no need of these young fellows on their wheels so much at night. This is not the first case where people were hit with wheels at night and told again as how well it was done. However we believe this case is purely accidental, but too careless.

Mr R C Evans, an elder of the Latter Day Saints Church, from the neighborhood of London, was here and preached in their church last Sunday, and we believe is to stay around among the people for some time.

Some people are done seeding, and this week will see all done.

### TO STAMP OUT CONSUMPTION.

Many of the most thoughtful and public-spirited men of the Dominion are numbered among the officers and members of the Canadian Association for the prevention of Consumption and other forms of Tuberculosis, which held its fourth annual meeting in Ottawa on April 20th and 21st. Every thinking man and woman must be impressed with the necessity for united action to check the ravages of a disease which causes one death in every eight in this country, and gives rise to a vast amount of suffering and permanent ill-health. It is calculated that in Canada at the present moment between 30,000 and 40,000 persons are suffering from it, yet it is undoubtedly a preventable disease and one that is curable in its earlier stages.

**AROUSING THE PUBLIC.** The report of the executive council pointed out that the operations of the association have combined with other influences to concentrate public attention in some degree upon consumption and to awaken a desire for information regarding the measures which should be taken to stay its ravages. The Secretary, Rev. Dr. Moore, of Ottawa, during the year distributed by mail and otherwise over 100,000 leaflets on "How to Prevent Consumption." "Rules for Consumptives," etc. Many lectures were also given, with the hearty co-operation and sympathy of medical health officers and other members of the medical profession; the mayors and members of municipal councils, the clergy of all denominations, and the proprietors of newspapers. As the president, Hon. Senator Edwards, pointed out, literature such as the association distributes should be in every home, so that the people might be taught the simple means by which the scourge may be avoided.

While sanatoria were helpful in the case of those who had the disease, he believed that the great means of its prevention was in education.

**INFECTION FROM ANIMALS.** A phase of the question in which farmers are particularly interested was discussed by Dr. Ravenal, an eminent United States authority, who is assistant medical director of the Henry Phipps Institute at Philadelphia, in an address on "Animal Tuberculosis in their Relation to Human Health." Dr Ravenal detailed with exactness the advancement made in the study of consumption since Koch of Berlin made his famous discovery of the tubercle bacillus, and said that in the course of many years experimenting he had not found any animals that were immune from tuberculosis. The lecturer vigorously combated the opinion of Koch and others that there is an essential difference between human and bovine tuberculosis, and cited a large number of experiments in support of his view that these were practically identical.

While admitting that the majority of cases of consumption were due to infection by inhalation, he claimed that a considerable percentage could be definitely traced to infection through the digestive tract by food, particularly milk and meat. The few figures available seemed to indicate that about 25 per cent of children's cases were due to the latter cause. He had no knowledge of any case of an adult becoming consumptive in this way. In conclusion, Dr. Ravenal urged that while it is important to educate the public, to build sanatoria, and to establish large institutes for the treatment of advanced cases the whole duty of prevention was not being done if the possibility of infection from animal sources were neglected. The speaker was most favorably received, and at the close of the lecture was accorded an unanimous vote of thanks on the motion of His Excellency, the Governor General, who has always taken a great interest in the work of the association.

**FRESH AIR, LIGHT AND SUNSHINE.** The keynote of the convention was—"Live as much as possible in the open air." Fresh air, light and sunshine are most important preventives of consumption, all rooms occupied by consumptives should be as well lighted and ventilated as possible. Living in over-crowded, ill-ventilated, dark, dirty rooms; insufficient or bad food; dissipation or anything which enfeebles the constitution and thus impairs its power of resistance, is likely to facilitate the invasion of the system by the germs. These are found in vast numbers in the dust particles of the dried spit of the consumptive, and in the minute droplets sprayed into the atmosphere by the consumptive in coughing, consequently spitting about the streets or in buildings (churches, schools, theatres, railway stations, etc.) is a dangerous as well as a filthy habit.

**THE SANATORIUM TREATMENT.** The ideal place for treating incipient cases of tubercular disease is in the municipal fresh air sanatorium, where the patients may enjoy the best of care, without being altogether removed from the watchfulness of their friends and family physicians. Every patient who is cured in the sanatorium becomes an apostle of the gospel of fresh air, hence these institutions serve as object lessons of the greatest value. It is for this reason mainly that the Nova Scotia Government has just erected a sanatorium at Kentville with a capacity for 18 patients. In the whole Dominion there are only four other institutions devoted to the treatment of consumption. Three of these are under private control and management, and one is the property of the National Sanatorium Association of Ontario. The total accommodation in all of these, with that in hospitals to which consumptives are admitted, probably does not exceed 200 beds. We are indeed poorly equipped for the fight, since the

sufferers are so vast in number and so widely distributed as to require a home for consumptives in nearly every county. Only the hearty co-operation of the Dominion and Provincial Governments with the municipal councils seems likely to afford a satisfactory solution of the problem of dealing with what should be no longer the great white plague.

### FARMS FOR SALE.
