Pencils Spread Diphtheria. During a recent epidemic of diphtheria which raged in one of the public schools in Paris the medical inspectors decided that the disease was transmitted from one child to another by the pencils. The pencils used were municipal session. When one remembers how universal is the habit among children of White gloves are elegant, if perfectly putting the pencil in their mouths it is clear, for all dress wear. If dirty, they throat could be rapidly spread. The inspector advised each scholar hereafter be allowed a pencil as his individual pro-
