> it might have to travel in its tired conserve strength to trot. That a horse could be taught to understand and act in a very great variety of practical matters is almost doubtful. There is very little doubt that if properly treated it is wonderfully capable of understanding what is going on and of being made to comprehend what it is wanted to do. Add to this the fact that the properly domesticated horse is almost as naturally obedient as the cat is disobedient, and it is difficult to set a limit to its

power when quoting the French writer, Le Bon, who held that "if horses were only able to read and write they would win in every competitive examination, so retentive was their memory of what they had once seen." That equine recollection of places and incidents is

Change After Marriage.
