CASH for Eggs.

C. L. GRANT

Priceville.

The sixteenth Anniversary services of St. Columba congregation takes place in the Presbyterian church of this place on Sunday the 21st of May, when the Rev. Mr. Edmison B. A. of Cheltenham will preach morning and evening, and the Rev. Mr. Cocking of Chateworth will be at the entertainment Monday evening the 22nd when he will give some interesting addresses on Japan accompanied by views. A good time is expected and a large audience is looked for on both occasions. With suitable weather and willing people the occasion is looked for D. V. to be a success.

The Gaelic Communion was held in the Presbyterian church in this place last Sabbath. In giving a look of some 30 years backward at a Gaelic Communion Sunday and comparing it to the present we find quite a change. Then the old church would be full and last Sunday there were just about two dozen all told. What is the reason? 1st—Many of the good old worshippers of that time have passed away and only the mounds of their remains are visible to remind us of ancient times. 2nd—The old Gaelic people in years gone by were more zealous in holding their mother tongue than they are nowadays. 3rd—The desire of the past generation were stronger in patronizing their mother tongue than their sons and daughters are at the present day. The good man who presides Gaelic to the few of to-day in this place is as zealous and earnest as those of old, so in summing up the whole we find that in a few short years the fine old language which was so dear to the hearts of our dear old fathers and mothers will soon be lost in oblivion.

Mr. John Campbell of Swinton Park attended the Gaelic Communion on Sunday last. His 86 years of age and a rainy morning did not prevent him from coming 7 miles to celebrate the Lord's Supper in his beloved language.

Quarterly meeting was held in the Methodist church here last Sunday. We understand the pastor Mr. Roach intends to hold revival meetings at Ebenezer during the coming week. Revivals are necessary in all branches for the old ones need shaking up as well as the young ones.

The many friends of Neil G. McDonald of Bruce will with regret learn of his death which took place on the 30th April, at the age of 72 years. Mr. McDonald came to Bentinck 60 years ago settling near Lato to Bruce County. He was born in the Township of Vaughan and was always a man who had excellent principles—always friendly to the friendless. He was a cousin to Donald McDonald, teacher and the rest of the McDonalds, D Road Glenelg and many other relatives in this part.

Born to Mr. and Mrs. Jas. Black, Oak River, Manitoba, on the 15th March, a daughter, Mrs. Black was Mary A. McLean, South Glenelg. We ask to be excused for not mentioning sooner but its better late than not at all.

Raining again this Monday noon Saturday's rain made the ground in a bad condition for work. Lots of sowing to do yet.

Donald McDougall who had the Thomson farm near Bentinck the last two years moved to his own place a few days ago.

C. C. McFayden, Esq., visited our town lately on business relative to his agency. Hugh McPhail and family of Duluth are moving to their own farm on the South Line, Glenelg, this week.

Lachlan McKinnon (Hugh's), South Line, Glenelg, has a mild attack of appendicitis. Dr. Dixon is in attendance. We hope that the patient will get better without an operation.

A large elm tree opposite Roger McEachern's house was struck down by lightning one night last week during a thunder storm.

Holstein, May 6, 1905.
D. Allan, Clerk.

BOOTHVILLE

Rain galore now. Very few farmers are through with their spring work yet. George Lane has finished, he has about 60 acres in. Arrived at George Sackett's, Brownsville general merchant, a large shipment of spring goods.

Miss Flora Clark visited last week her aunt Mrs. Wm. McLeod, who is in poor health just now.

Mrs. C. McQueen and Mrs. McCannell visited at Mr. Wm. McLeod's this week.

The Swinton Park Sabbath School opened last Sunday with a large attendance.

Malcolm McCannell received a kick from one of the horses and broke two of his ribs.

Manufacture of Cement Brick.

(Continued from last week's Review)

Cement Brick Work:—Soak the brick well before laying them in the mortar or the cement will have no watertightness to make them harden.

Amount of Sand, Portland Cement and Lime Putty needed to lay 1000 Brick

Joint proportion of mortar to the brick	Bushels of sand	Bushels of cement	Bushels of lime
1-9	3.8	.64	.64
3-4	9.6	1.6	1.6
3-3	12.5	2.1	2.1
1-3	15.2	2.5	2.5

About three bushels in a Canadian Standard barrel of 350 lbs of Portland Cement.

1 barrel of 350 lbs of above described mortar will lay 2000 brick with 1/4 inch joints.

How to make Cement Lime Mortar:—Spread the proper quantity of sand on boards as near the work as practicable to get the material; over that pour the quantity of cement, after these are well mixed, shovel them into a mortar box, in which has been placed the lime thoroughly slacked, screened and mixed with water enough to make into a paste or putty; mix the whole to a uniform mortar. This should be carefully done as the lime paste is hard to distribute thoroughly.

Water-tight Mortar:—Naturally for the exclusion of water, the utmost density is required, and the fatter the mixture the greater the density. The thickness of the layer is important, and the longer it hardens, is a factor; as water that would not be watertight at first, becomes so later as the cement continues to harden and close up the pores.

Coarse sand renders mortar more porous than fine. These features alone should give Portland cement mortar the preference for all work of importance.

Coloring Cement Wares:—Use only sharp washed and clean water. Mix thoroughly.

The coloring must not contain acids and must not affect alkalies. Only mineral colors are fit to be used. All liquid coloring matter destroys the alkalies of the cement.

Usually coloring matter lessens the strength, therefore no more should be used than is absolutely necessary; especially ochres. Ultramarine is an exception, 30 to 40 per cent of this can be used without the strength being materially lessened in weak additions it even raises the strength.

A small per cent of Germantown lampblack is considered an advantage as to ability to resist the elements; and on account of its cheapness the small quantity needed and the pleasant gray color resulting, it is the usual coloring material used.

The kinds and quantities, in pounds per hundred weight of Portland cement usually used are as follows:—

Gray Use Germantown lampblack	1 lb
Blue " oxide of manganese	12 "
Blue " Ultramarine	5 "
Green " "	6 "
Red " oxide of iron	6 "
White " "	6 "
Bright Red Use Pompeian or English red	6 lb
Sandstone Red	6 lb
Violet	Use oxide of iron 6 lb
Yellow	" ochres 6 lb
Brown	" "

White—absolutely whiter work cannot be made with Portland cement. The whitest work can be made by using pure white slacked lime free from iron and other coloring matter, and white sand or powdered marble. By the above it will be seen that a number of different colored articles including brick and other wares can be made with very little additional cost.

Artificial Stone:—Natural stone even the best marble and granite will ultimately crumble under constant moisture and freezing, but properly made artificial stone is benefited by reason of the moisture, and Roman arches, stairways, breakwaters, walls, made of artificial stone over 2000 years ago are doing duty to-day while marble and granite work of the same time is mostly in ruins. Persons about to build will be agreeably surprised and intensely interested if before building with other material they will investigate the merits of Portland cement, brick, window sills, blocks, door sills, etc.

History chronicles vaguely the events of a period known as the "stone age" when men wrought with the crudest of implements and eked out the meager sort of existence, but man's necessity made him progressive and his cunning taught him to devise better instruments of bronze with which to serve his purpose, only to find them in turn inferior to the improved work of his son in the "iron age." Each plays its part in the economy of nature then yields place to its better, and the stone age, the bronze age, the iron age retire, yielding to the Imperial age of cement.

Progress is the watchword of the twentieth century, and it is with this thought in mind that I present these lines with an intention of conveying as briefly as possible, an idea of the progress being made in the cement business, and the present advanced ideas on manufacturing cement wares.

No product in the world has a wider application to useful purposes than Portland cement. Men who know its worth realize that it is the only absolute fireproof building material in the world. In this respect brick, Terra Cotta, iron, and granite all suffer markedly by comparison with it.

A BIG TROUT 3 1/2 lbs caught on Monday

The Paint that makes things shine. Brighten up your home with some of our handsome Paper. We are selling more this year than ever before.

Alex. Russell.

Cement is the ideal building material in bridge construction whether for strength, form, beauty or durability. There has never been found a paving material equal to Portland cement concrete whether it be for sidewalks, street-beds or roadways. In house building there is hardly an article used that cannot be made of stronger and more durable out of Portland cement than out of any known material.

Owing to the wet weather of the past week very little seed has been sown around here.

Mr. A. G. McComb and sister Leah spent Sunday of last week at home.

Mr. James Lunney spent a few days of last week visiting his sister Mrs. Wm Britton.

Miss Susie Kennedy is at present on the sick list.

Mr. Archie McArthur who has been working for Sam Lawrence of the south line for the past month came home sick a few days ago and is under the doctor's care. Hope to see him in his usual health again soon.

Mr. Dan and Miss Eliza McCormick visited Sunday of last week Mr. Hugh McKinnon of Bentinck who has been sick for some time past.

Mr. Alex. Firth, teacher, spent Easter holidays with friends in Toronto.

Mr. Gray Wilson has been laid up with a sore hand for the past week or two.

Miss Jennie MacFarlane spent a few days visiting at Boothville recently.

Mrs. Ginn lost one of her fine cows last week.

Mr. and Mrs. Thos. Swallow of your town visited at Mr. Chas. Kennedy one day last week.

Mr. Wm. Britton who has been on the sick list for the past 6 weeks is we are glad to say able to be around and at his work again.
