ARCTIC COAL.

A small vessel arrived at Bergen, ot coal from Spitzbergen. It was obtained on the southwest coast of that Arctic land, not by mining, but by knocking to pieces the outcrop which is found along those shores. The coal was found to be excellent both for steam purposes and for the manufacture of gas. It burns with a high flame and is extremely com-

A coal mining expert who accompanied this vessel has made a very favorable report, on the basis of which it is now planned to send 50 miners to Spitzbergen early next summer. It is said that mining may be kept up the year around, but of course the coal can be transported only in summer. It is believed that 25,000 tons may be ready for ship-

ment next year. The expert reports that the coal may be mined to excellent advantage. There is no costly ground to buy, no property considerations to interfere, and transportation from pensive, the situation of the mines favoring the towage by rope of railroad cars loaded at the mines. He thinks the cost of the coal delivered in Norway will not exceed
