The Bicycle and the Heart,

Beyer's investigation of the influence of bicycling on the heart has convinced jurious action on that organ. The heart a story that most nearly concerns in the young is particularly subject to this deleterious influence on account of pressure in youth. Hypertrophy of the heart and nervous heart disturbances are the typical bicyclers' affections. It has been found in Germany that the number of case of acute articular rheumatism among the recruits has materially diminished of late years, while the number of heart affections has tripled. In one army corps, out of 233 recruits with varoius heart affections, 41 had Acen bicyclers, as also 9 of the 18 patients with hypertrophy of the heart. and 8 out of the 37 patients with ner-Yous irregularity of the heart action. In another corps the proportion was 37.5 per cent. in 293 case of heart affections, with 23 out of the 52 cases of hypertrophy and 9 out of the 22 of nervous arregularity. He found further that among these recruits those who had previously led a sedentary life formed the largest contingent of heart affections among bieyelers. On Sundays and holidays they took long bicycle trips, with over-exertion of the heart. Next in number were the workmen who rode the bicycle to and from work. The recruiting officers attribute the increase in heart disease among the young men to the lesser hardiness of the youth in our day and to the epidemic of influenza. ate bicycle riding is a third and no less important factor .- Journal American As- puller. Arrow Throwing.

An old English sport that still survives from the days when the bow and arrow were in use is that of arrow throwing, and in parts of Yorkshire it is still made one of the features of athletic meets. The arrows are straight shafts three feet long, without either barb or feather, and are thrown by the aid of a bit of string wrapped about the thrower's hand and about the butt of the arrow. A skilful man can send the arrow one hundred and fifty yards. though it requires some experience to cause the arrow to leave the string without tangling. Once the knack is acquired the sport is said to be more fascanating than putting the shot or throwing the hammer. There is a movement on foot to have the sport made one o the features of the college games, since both skill and strength are required.

And much to the Countess' astonishment, a few days afterward, a heavy parcel arrived addressed to her at her residence, and on breaking the royal seal she saw-a hundreweight of soap! And with it came instructions that the house cleaning was to be a thorough one. Some political point attached to this joke. The ambassador writes to the Kaiser every night of his life, and telegraphs to him twelve times a day. This is what has been said of Prince von Radolin in Paris. The popular impression seems to be that he is a kind of automaton worked by wires. In Poland, however, they laugh if you suggest that the Prince is anything less that the wiregade, for he renounced his Polish name for Radolinsky.

spicuous part in his affairs. His first | wife was an English Quakeress, and he vons" at royal functions. It was the spring from sick Kidneys. duty of Prince von Radolin to soothe these ruffled Germans. His skill evoked admiration, it is said. But a woman compassed his departure from the St. Petersburg Embassy. It was a court ball, and a very Grand Duke offered a distinguished arm to a charming lady, who replied tht she had already promised to go to the buffet with Prince von Radolin. "Truly these Germans are tyrannical gentlemen," said the Grand Duke. Somebody reported it to the Prince, and changed the ad jective to "disagreeable," and he felt aggrieved. A personal complaint to the wife of the Grand Duke seems to have annoyed every one concerned, particulary the Grand Duchess, who declared that she was insulted, and what was in the first instance merely a joking remark resulted in there being a vacancy in the

How Alaska Natives Hunt Bears,

"Bear hunting as pursued by the Al-

aska native is an interesting game," remarked J. P. Gardiner, a Nome miner. "I witnessed a bear hunt on Kadiac Island a few months ago. A big brown bear, one of the species familiarly known on Kadiac Island and the other Aleutian Islands ,was pestering the settlement. and a native who bore a wide reputation for prowess among his people decided to go after the animal. Before starting on the expedition, however, he went to his mother and obtained her ied him. We agreed among us to allow the native to have the first chance at the bear and to shoot only if he failed to kill the beast.

"We came upon the bear in a ravine. The native crouched on the ground as the bear came up. We became quite excited. It was to be a hand-to-hand battle, and we feared the native would get the worst of it. As the bear approached the native it reared on its hind legs. We had our guns ready for instant ac-But the guns were not needed. Quick as a flash the native sprang up and had his knife plunged into the animal's heart and was away several steps before the bear knew what had happened. It was a death blow, and we packed the pelt back to Karluk in triumph."

BRIDGE RULES.

There Should

A suggestion to amend the rules of oridge has been the subject of conversation among all bridge players during the last few days. The reformers wish to do away with the enormous advantage which, under the present "dummy" system, is held by the dealer when playing with the "no trump" hand. The suggestion is that when the declaration is "no trumps" there should be no dummy, and that each player should play his own hand a sin whist. The frequent declaration of "no trumps" is also exercising the minds of all bridge players—and

who is not a bridge player nowadays!and the suggested improvements are aim-ed at minimising the advantage at present possessed by the dealer and his partner. It seems doubtful whether the reformers will carry their point, and I hear that at Almack's-the bridge club par excellence—the general feeling is against tampering with the existing rules.-London Daily Mail.
