Cardiac Organ of the First Richard is Still in a French Cathedral.

In the splendid cathedral church of Rouen is a suite of three or four rooms containing what is known as the "Tresor." This is a collection of valuable and interesting relica, forming quite a little museum, to which admission may be obtained for the modest fee the of 25 centimes. To an Anglo-Saxon, quite the most interesting article in the collection is the plain leaden casket in which was buried the heart of the famous King Richard Coeur De Lion, who, it will be remempered, was shin by a bolt from the crossbow of Bertrand ! Chaluz. His body was buried at the feet of his father at Fontrevault, near Tours, but his heart was encased in two leaden caskets ! and buried in the cathedral of Rouen, "the

The exact place of its burial seems to have been forgotten, but it was rediscovered in 1840, placed in a new receptable and reburied in the choir. The old leaden cases, the outer one of which was in a most dilapidated coudition, were placed in the Tresor" with the following inscription: Cercucil

Boite de Plemb Ou fut Renferme Lors de sa Sepulture en 1199 Richard Coeur de Leon Trouves en 1840 Dans le Sanctuaire de la Cathedral

The inner case is in comparatively good condition, the inscription being perfectly legible after all these hundreds of years, The Latin is somewhat peculiar, and it is curious to find that at a period when the for the king's name, so that he had to carry is noteworthy, too, that Richard is styled "Regis Anglorium," "King of the English" not of "England"-while no reference at all is made of Normandy or Aquitaine. The bex is about a feet long, eight inches wide and five deep.-Philadelphia Ledger.

ISSUE NO. 1. 1906.

Many Monarch Bearing It Met With Misfortune, It is strange how good or bad fortune seems to attend certain names; and this is the more marked in the persons of

royalty, on account of their conspicuous position, than in the case of the ordinary individual. Among sovereigns it is doubtful which must be considered the most unlucky name, but it is probable that John is the name of ill omen. For instance, John of England has always been branded as an infamous monarch, a character which he hardly deserved; still, it was his luck. John of France was captured by the Black Prince, who, by the way, was not the hero we have been taught to consider him, but a very unscrupulous ruffin, John Baliol of Scotland has been despised by his fellow countrymen because he pandered too

much to the English. Robert III. of Scotland changed his name from John, but the ill luck of the same name clung to him. During his lifetime he was worried to the verge of despair by his brother, the Duke of Albany. He was himself a cripple, his eldest son was starved to death in prison, and his youngest, when on a voyage to France, captured by the English. Robert III. died

of a broken heart. John I. of Bohemia, was blind; John I., Pope, was imprisoned by Alaric, King of the Goths, and Pope John X. was driven from Rome by Guy, Duke of Tuscany, John XI., Pope, was supposed to have been poisoned by his brother, Alberic, who kept him a prisoner in the Lateran. John XIV. also died in prison from poison or starvation, John XV, ascended the papal throne after the murder of Boniface, and was forced to flee to Tuscany, where he died of fever. Nor was John XVI. more fortunate, for he was dubbed the "Anti-Pope," and after a varied career, which lasted only eleven months, he was brutally tortured and then consigned to a dungeon, whence he

never emerged alive. John I. of Constantinople was poisoned; John II. was killed while boar hunting; and John III. was dethroned, . his eyes were put out and he was cast into prison, where he died. John I. of Castile. was killed by a fall from his horse. This is only a portion of the long list of unlucky Johns, but it will serve to show that there is good reason for claiming that monarchs should avoid the name, it they possibly can .- From Tit-Bits.

An Old Farmer's Philosophy.

At the end of one of the meetings of the International Sanitary Congress in Washington a young layman asked Surgeon General Wyman a question about the construction of the throat.

"If the throat was constructed like that," said General Wyman, smiling, "there would be more truth in the flipperty-flap story than there really is." "The flipperty-flap story?" murmured the young man, dazed. "Yes. Did you never hear it? Listen,

"A quack medicine vendor stood in a

carriage selling a cough cure. To ex-

plain the construction of the throat he "'Ladies and gents, in your throat is two little flaps, one closing when swallowing food and opening to receive drink. and the other closing when swallowing liquids and opening to receive food only.

"But here a humorous old farmer in-
