perceived from all the world. He was absurdly occupied with this quiet inexperienced girl, who was so womanly, though so young. She cost him some uncomfortable moments too; still he never lost his head as to think seriously of marriage. Years hence, when he had attained a high position, and wanted a dignified, well regulated home, he might look out for a richly dowered, highly connected wife. Now Mona, though well born on one side at least, was for all purposes of advancement the merest nobody; yet what a disturbing influence she exercised on his heart or circulation or whatever it was that throbbed in his pulses, and tempted him to unpleasant spasms of imprudence. All this irritation had reached its highest pitch during his visit to Harroby Chase; and so softened was the cool headed man of the world that when the blow fell on Mrs. Newburgh, which he knew meant life-long poverty for Mona were she not soon rescued, he really thought how he could best serve her, after he had considered how he could disentangle himself from the meshes which he felt were weaving themselves around him in the pleasant, free intercoure of country-house life.

He therefore caught eagerly at Leslie Waring's proposition, and resolved that no illusions about himself should interfere to prevent Mona accepting the deliverance offered to her.

Resolute as he was, both by nature and cultivation, he half dreaded the interview he had planned so cunningly. He expected tears, agitation, despair, however she might seek to hide their in her distress, and deploring the exig- with you by ten o'clock to-morrow. No-"It seems so strange," murmured "He is. Experience With Farm Crops

The members of the Ontario Agricultural and Experimental Union are pleased to state that for 1906 they are prepared to distribute into every Township of Ontario material tor experiments with fodder crops, roots, grains, grasses, clovers, and fertilizers. Upwards of 1,600 . varieties of farm crops have been tested in the Experimental Department of the Ontario Agricultural College, Guelph, for at least five years in succession. These consist of nearly all the Canadian sorts and several hundred new varieties, some of which have done exceedingly well in the carefully conducted experiments at the College and are now Leing distributed free of charge for cooperative experiments throughout Ontario. The following is the list of co-operative experiments in agriculture for

Experiments.

Three varieties of oats (a) Three varieties of six-rowed barley 3

(b) Two varieties of Hulless barley..... 4.Two varieties of spring wheat... 5. Two varieties of buckwheat.. Two varieties of field peas

Emmer and Spelt..... Two varieties of Soy, Soja, or Japanese beans Three varieties of husking corn Two varieties of mangolds 3

11. Three varieties of sugar beets for feeding purposes 2 Three varieties of Swedish turnips

13. Kohl Rabi and two varieties of fall turnips 3 14. Parsnips and two varieties of carrots 3 age corn..... Three varieties of millet.....

17. Three varieties of sorghum.... 18 Grass peas and two varieties of vetches 19. Two varieties of rape..... 20. Three varieties of Clover 21. Sainfoin, Lucerne, and Burnet 22. Seven varieties of grasses 23. Three varieties of field beans...

24. Three varieties of sweet corn.. in drills...... 2 28. Two varieties of early, medium,

29. Three grain mixtures for grain The size of each plot in each of the

or late potatoes 2

Each person in Ontario who wishes to join in the work may choose any one exhausted. It might be well for each applicant to make a second choice, for fear the first could not be granted. All

duce of the plots will, of course, become the property of the person who con lucts J. Buchanan.
