T is not an uncommon thing for serious skin disease to break out as the result of bodily sickness. The skin remains healthy only so long as it is properly nourished; and during illness, when the blood is weak or the system "run-down," the delicate structure suffers to a marked degree. Ulcers, eczema and minor eruptions arising in this manner, or as a result of cold and irregular living, may be effectually overcome by the use of Zam-Buk worked gently into the tissues. Zam-Buk induces a healthy action of the skin, heals sores and dispels disease like no ordinary ointment, salve or toilet cream can possibly do. It is prepared on the lines dictated to us by nature, being composed of juices from rare medicinal herbs, and it "feeds up" the skin. Zam-Buk is both a "skin cure" and a "skin food." To a "Sunday Echo" reporter Mrs. McKeevan, of Knowle Road, Sparkhill, Birmingham, said :-

"About five years ago I was under the doctor, who was treating me for a general breakdown in health and poorness of blood, but I didn't seem to make much improvement. One day I noticed a breaking out on my hand. When I showed it to the doctor he said it was a result of my poor state of health. He gave me medicine and lotion for it, but it got worse and worse. The sores spread all over the hand, and then commenced breaking out on the other. Thinking I was not properly treated I consulted (separately) two more local doctors. They told me that the disease originated from poorness of blood, and gave me medicine, ointments and lotions, but utterly failed to stay the progress of the disease. It began to spread to my arms, and I became greatly alarmed. Apart from the disfigurement, the pain was excruciating, and sometimes I thought it would drive me mad. I tried various remedies, but none gave me the slightest One night my husband brought home a box of Zam-Buk, and persuaded me to give it a trial, as he had heard splendid accounts of its healing powers for skin eruptions. The same night I applied it to the affected parts, and was very agreeably surprised at its soothing I enjoyed a few hours refreshing sleep that night, the first for many weeks. I persevered with Zam-Buk, and before a week had passed I was delighted to find that the eruption was drying up, and I began to have some use come back into my hands. My husband and myself were delighted. Before a month had elapsed my hands were quite well again. New skin had formed all over the affected parts, and no one would think to look at my hands now that at one time they were such a horrible sight. Altogether I used five boxes of Zam-Buk. I thought at first that the sores might break out again, but nearly six months have elapsed since they
