ACROSS FORTH BRIDGE ON FOOT An Interesting Story From the N. Y.

Scottish American. Across the Forth Bridge on foot is rather an interesting experience, and when the fleet was on the Forth last spring a sailor friend and I received permission through the influence of an acquaintance and the courtesy of the rail.

We went on at Dalmeny, kept to the right side so as to face any train, and first stopped when immediately over Queensferry road. We looked down, and were quite astonished at the height, the people below resembling mites rather than human beings. Soon we reached the first span, and on looking to the other end of the bridge we were vividly impressed with the inner appearance of it. One can then only form a true idea of the gigantic size of the structure there being a veritable network of tub ular beams stretching to either side from a little above the railway right up to the apex. Just at the masonry next The United States Senate has con- the southmost span is to be seen the eral-at-Large Fleming D. Cheshire, New pleted the bridge, and which was driven home by King Edward, then Prince of

The wind was felt in its force before sound it made blowing through between those massive metal beams rings in our ears yet. One or two trains passed on end of excitement. We were perched about the middle of the bridge, and a considerable height above the water, with only a very small space between sembly of the United Free Church of the railway line and the path guard. We clung quite desperately to the iron guard, with our feet and bodies as close to it as possible when the train went Illecillilewaet, near Revelstoke, collapsed, past, and we felt that it was as much

was the draught. Half way across we enjoyed a magnificent view-a bird's eye view, in fact-of the fleet. The ships were moored in three parallel lines, each boat equidistant behind the other. With powerful glasses we saw sailors scrubbing the deck, othof awful destruction. The bright sun At Greensburg, Pa., Marshall Kirkera, lit up and transformed the entire scene into an ideal panorama.

Various pleasure steamers crowded culty, but without mishap. The scene on board those ships open to the public was indeed pretty, especially Admiral Wilson's large flagship Caesar. Light and prettily colored dresses caught the eye, and hats of various hues and shapes were prominent. Parties of the fair sex were being conducted round the ship by sailors, who explained the working of the big guns, torpedoes, and searchlighte

From such a height a magnificent picture was before us, stretching towards the east-we could now enjoy the beauties of that noble firth. Away towards of water made silvery in appearance by the brightness of the sun's rays. North Berwick and the Bass crouched, so to speak, in case the line of horizon should be broken, while Elie and Elie Point on prominence. Inchkeith with its lighthouse and batteries as a crown rose majesticaly out of the silvery expanse, ap-

parently monarch of all it surveyed. Dalmeny woods were pretty, and formed an excellent border to the beautiful picture. The big buns from the bridge defenses peeped ominously over the batteries, and the coast-guard station was the only indication of life about those batteries. We had simply to tear our-
