Than all the impassioned creeds of wild -Charles Reekie.

The Evangel of Hope, For the children of wisdom there

comes the reflection that happiness and the sense of victory are only for those who live for conscience and duty, and the soul's higher ideals. Olive Schreiner has a dr am of a mother, who prays be side the cradle and broods lovingly above her babe. While she prayed she dreamed and saw messengers drawing near to proffer strange gifts. One said, "I am health, and whom I touch shall never know pain nor sickness." Another said "I am wealth, and whom I touch shall know neither poverty nor want." Anothr said, "I am fame, and at my touch; the child shall rise to a place beside the immortals." Another said, "I am love, and at my touch in the darkest hour a friendly hand shall be outstretched. Last of all came one with furrowed face and hollow cheeks and burning eyes, who offered not health nor fame nor love. but only this: that he could cause the child to love his ideals and never lose them. "This is my gift," said he. "His ideals shall be real to him." And then

the mother, kneeling down, clapsed the

garments of that messenger and cried

out, "Touch, O touch my child!"

For all who thirst for the old, deep, aweet feelings of childhood and youth, even as David thirsted for a drink of water from his father's well at Blenheim, there comes this thought: that, under the tender touch of God, the hearts of men grown old and grey in a life of temptation and sin may become again as the heart of a little child. For man there is a great truth in this: that Milton in his vision saw Samson upon the last day of his life, blind, indeed, and grinding corn in the prison of his enemies, yet lifting his sightless eyes in penitence and prayer toward God until the solar light flooded his face and filled his heart with happiness, and in his death brought him victory again over ease and selfishness and sin. It is Milton's evangel of hope to this generation, with its sorrow and sin, that there is a Saviour divine, the Christ, whose sacred touch heals the broken-hearted, opens the door for the endungeoned, and recovers sight of blind.-From How the Inner Light

The Triumph of Meledy.

From the very earliest epoch of the world, in fact from that far off time when that first harpist, Jubal, performed, doubtless before Abram himself, on his newly invented instrument, music, both instrumental and vocal has largely contributed to the recreation of mankind. And all down the ages the charms of melody have held sway ,whether in paeans of triumphant jubliation for victory, in strophes of poetic rhapsody and exultation or in dirges of lamentation and grief and mourning.

But only in quite recent times has the combination on a large scale of vocal and instrumental music been brought to perfection. And probably the most magnificent and overyhelmingly sublime musical performance ever heard all down the contaries is the triennial rendering by a choir and orchestra of four thousand voices and instruments of a selection from Handel's great oratories.

The National Anthem having been sung, with a wave of his wand the conductor starts the first note of that grandest and sublimest musical composition ever written by mortal man. The Messiah. After a few recitatives and stirring airs and choruses, with a triumphant shout the great chorale "For unto us a Child is born' commences, gradually sinking down until almost in a whisper the chorus murmurs out "And His Name shall be called;" then, after a momentary pause, with a mighty roar, accompanied by the blare of trumpets, the beating of the giant drums, the clang or cymbals, the resonant blast of a multitude of cornets and bassoons, the booming of mighty organ and the serried array of stringed instruments, the thousands of singers rend the very air, ; and with one voice in unison thunder out-"Wonderful, Counsellor, the Mighty God, the Prince of Peace." The pulsat- to the police station. WHAT ABOUT TELEPATHY.

Does It Mean That the Whole Universe is Alive?

It is astonishing how many cases of telepathy are reported at the present day. Hardly a week passes that we are not told of some one who either in way gave a minute description of some event, almost always a calamitous one, which was occurring at that moment at some distant place. A London cablegram was printed on

last Sunday giving a striking case of this kind from Wales. The Rev. Meredith Morris, pastor of the church at Garth, who had often ridiculed visions in his sermons, recanted these opinions in the pulpit before his congregation, and then related a vision of his own He said he had seen a vision of sever young men, whose names he gave sitting under a tree gambling and in some way which the despatch does not describe, it was made known to him that one of them would soon die.

This impression on the pastor's mind was so profound that while he was de scribing the vision he was convulsed with sobs and the congregation also was deeply affected. The next day one of the seven young men mentioned n connection with it was killed in a

At the same time a similar event was occurring in South Dakota. Miss \$10-Atlantic City, Cape May-\$10 Kendall, a 17 year old pupil of a parochial school in Sturgis, lay dying With great agony of spirit she de scribed a vision of an accident to he father. She saw him ascending the bluff on which the school is located and saw him slip into a gorge, she insisted he was still lying in a

helpless and suffering condition. The girl died and soon afterward her father was found in the gorge dreadfully injured, and gave an account of the way he came there which tallied exactly with all that his

The most sensational and mysterious murder ever committed here was unravelled by a woman's dream. So terrified was she that she made her husband get up in the middle of the night and go with her story theory proved to be absolutely correct. It is hard to see how any one can

telegraphy. The only ground on which it can be questioned is that of accidental coincidences and that argument would upset wireless telegraphy and one-half of all the convictions of

reality. Our knowledge of phenomena is always far in advance of our explanations. Thunder and lightning were familiar occurrences long before Franklin explained them. The hu man family may have to wait several centuries before it can understand telepathy, but in the meantime it should not be stupidly incredulous in regard to the facts.

The tendency of this class of phenomena, it may be observed without prejudice is in the direction of pantheism. If the universe, including all animal life, is God, it follows that there is communciation of intelligence among all living beings. It may be true that this community is affected, not by distance, but by conditions un known to us, among which may be in inch pieces, using a sliver knife. Pack tensity of feeling. For almost all tele solidly into a jar, put under the cold- pathy is connected with dreadful events which produce paroxysms of

Needlework's Wages.

The apprentice in dressmaking has to work six months for nothing or perhaps a mere pittance as errand girl . Then she starts on linings at \$4 per week. Next. she does over-sewing and finishing at \$6. Trimmers on skirts or waists receive \$12 to \$14 per week, and fitters from \$15 to \$18. A small establishment is considered better than a large one for learning the trade, as more personal attention is given apprentices and there is quicker advancement. Any woman who sews neatly by hand or does fine embroidery along popular lines can secure a position in a shop without difficulty, and the fall rush in dressmaking opens up Sept. 1. A girl with the shopping gift can usu-

ally secure a position with a dressmaker as shopper. Her first duties consist of matching thread, buttons, linings, etc., and later she is entrusted with trimmings, laces, ec. She starts at \$4 per week, spends most of her time in stores and usually becomes a professional shop-

Operators in suit and waist factories do piece-work principally, and as a rule make \$12 per week. Finishers, who sew on buttons, etc., receive no more than \$7

In underwear factories, girls start the trade by running ribbon through beading, ironing, running buttonhole machines, and gradually learn to sew on in sertion, tucking, etc. They quickly work up to \$6 per week. An expert in underwear makes \$12 or \$14 per week .- Anna Steese Richardson in Woman's Home Companion for August.

Minard's Liniment Co., Limited. Gentlemen,-In June, '98, I had my hand and wrist bitten and badly mangled by a vicious horse. I suffered great ly for several days and the tooth cuts refused to heal until your agent gave me a bottle of MINARD'S LINIMENT, which I began using. The effect was magical; in five hours the pain had ceased and in two weeks the wounds had him all civil, political and religious were as well as ever.

THE TRUNK NUISANCE.

The Extra Work Unnecessarily Imposed on the "Baggage-Smasher." The happiest, most contented Ameri can is he who in his journeying is freed Are you list- | from an encumbrance of trunks. One or

two should be sufficient for the average man or woman and of moderate size The well-dressed, the refined ,the mod est, do not require an outfitter's shop as a part of their daily wardrobe. If it) is a fluffy summer girl, whose mission to the seaside or mountain is not for health or enjoyment, but to pose as : milliner's model, or a newly rich matro whose mantua-maker has been given carte blanche and who is aching to shine and outshine, that is another mat ter, and the number of trunks is not per mitted to interfere in her plans. The other side of this trunk nuisane

is the amount of extra work which is unnecessarily imposed upon the vast army of men once known as "baggagesmashers," but now known as baggage men. During this season of the year this branch of the railroad business is greatly overworked. It is exacting, hurried and exasperating labor, and the only wonder is, considering the number of pieces handled during the season that more are not lost or smashed than reports show. The baggage smasher of twenty years ago would stand little show of retaining his place under the present system. The exercise of care and the necessity of reducing damage claims to the minimum has revolutionized, in great measure, baggage handling methods. Where trunks are ruined now it is either because they were of flimay construction or partly damaged at the outstart.—Philadelphia Press. ----
