How the New School Act Applies

MR EDITOR,

Kindly insert in your valuable paper for the information of your readers in general but more particularly for the guidance of School trustees and teachers in the township of Egremont, the changes in the New School Act assented to on May 14th 1906 and coming into effect at the end of 1906.

The county shall levy and collect upon the equalized assessments of the municipalities a sum equivalent to the special grants made by the Legislative Assembly to the rural schools of the county, and such sum shall be payable to the trustees of the respective schools in the same proportions, as the said special grants are apportioned. The township grant in aid of schools shall be \$300 in place of \$150, as formerly when the average assessment of all the taxable property of the public school supporters in the Township, is \$30,000 and an additional sum of at least \$200 for an assistant teacher, engaged for a whole year or a proportionate amount of such sum of \$200 if employed for six months or longer.

In addition to the foregoing which is provided by the Township Council towards each teacher's salary, the trustees of every rural school section shall pay annually after 1906 to the teacher the following sums based upon the assessed value of the section: that is to say, the sum of \$200 when assessed value of the section is \$200,000. The sum of \$150 when assessed value of section is \$150,000 and \$100 when assessed value of section is at least \$100,000 but less than \$150,000 etc.

The sums so levied and collected, shall, after the expiration of the present year be applied exclusively to teachers' salaries.

The trustees in making their annual requisitions for school money to be levied and collected from the ratepayers shall include whatever amount, considering their other sources of income is necessary to provide for such payment, and every teacher who accepts of a less salary, or who by rebate, deduction, donation shall be liable to suspension of certificate.

The following is the standing of the Township of Egremont, as far as I am able to determine at present subject to slight corrections when Collector's Rolls are made out:

Each school will receive \$300 of a Township grant. The Union Schools I have not got the assessments from the other townships yet. The other schools appear as in the following table:

1	\$108,025	\$100	\$300	\$400
2	219,065	200	300	500
3	146,391	100	300	400
4	133,134	100	300	400
5	155,090	150	300	450

Mr A. W. Robb, of the Walkerton Telescope, accompanied by License Inspector Cannon, were in town Tuesday in search of Railway news. An interview with one of the officials also with Mr T. A. Harris and some of the citizens, put them on the track of what little is known about the enterprise. That little however is gratifying as to the certainty of early construction.

with value for coin of the realm, but Mr Deimon Hotel knocks the most of them broke by drinking Joseph Seagram whiskey or Hiram Walker ale. I think Canada has to-day as bad an element as Israel of old had in its declining years, enemies of good government, integrity, honesty, Christian civilization.

But how shall those varieties of Philistines be assimilated into one good national vine? God only knows. It requires good Christian salt, Christian statesmanship and God's will to savour it, and every Christian soul has a co-operation with God in this work, that is, as means in his hands.

I do not think myself that aliens should have the same privileges, as the legal and loyal citizens of the nation. But there are lots born in our nation that are no better than the worst alien abroad, who would join hands with our enemies if opportunity offered. The Captains of Industry too are wise in their generation to grapple the natural wealth of the province in their hands when in authority: they verify the words of our Saviour when he said "the children of this world are wiser in their generation than the children of light."
