In Days of the Tudors White Not Favorite Color for Brides.

Few brides are aware that white attire for nuptial ceremonies is of comparatively modern origin. Yellow was the color adopted by the Roman women in the remote ages and even now pink ; is the color which finds favor with eastern brides.

In the middle ages and during the Renaissance brides wore crimson. Most of the Plantagenet and Tudor queens were married in that vivid hue, which is still popular in parts of Britanny, where the! bride is usually dressed in crimson brocade. It was Mary Stuart who first changed the color of the bridal garments. At her marriage with Francis II. of France in 1558, which took place not before the altar but before the great doors of Notre Dame, she was dressed, in white brocade with a train of pale blue Persian velvet six yards in length.

This innovation caused a great stir in the fashionable world at the time. It was not however, until quite the end of the seventeenth century that pure white, Outfit which won the CHAMPIONSHIP OF the color before that worn by royal wiand Canadian manufacturers, after a two dows, became popular for bridal gar-
