TOPICS OF THE WEEK

Hong Kong, Valparaiso San Francisco, Vesuvius.

Under the above heading the daily papers have been publishing details of another world disaster at Hong Kong from the effects of a typhoon. The death toll is now ten thousand and likely to be added to. We give below one of the early despatches:

The terrible roll of great calamities that will give 1906 a sinister place in history must have another name added to it—that of Hong Kong. Nature again has taken toll of man and shown how puny he is before her elemental forces. It was not an inner convulsion of nature this time, as in the case of Vesuvius, San Francisco and Valparaiso, but one of the great storms for which the China Seas are noted, that caused the disaster. The Governor of Hong Kong Sir M Nathan, has notified the Colonial Office that the loss of life among the Chinese will probably be seven thousand. The money loss will be enormous, not less than \$20,000,000.

The loss of life at sea cannot of course become known for some time, probably not for months, and then only when Lloyds post ships are missing that were in the track of the great storm. Hong Kong, the reader will remember, is probably the greatest port for tonnage out and in, in the world. In 1904 over twenty-four million tons of shipping entered and cleared, and more than half of it was British. The great typhoon will therefore mean sorrow in many a home in the British Isles as well as among the Chinese of the colony. The total population of Hong Kong is about half a million, of whom over 300,000 live in the city of Victoria.

—Mr John Tolmie, of Kincairdine, has been chosen by the Liberals to contest North Bruce in the election pending owing to the death of L. T. Bland M. P. No other name was mentioned at a largely attended convention.

—A special edition of the Winnipeg Telegram has reached our office of a size,—72 pages—and quality never before surpassed. With map, illustration and letter press the growth of the city and indeed the whole west is impressed on one effectively.

Cleanliness in its Relation to the Production of Cheese and Butter. Dear Sir,— We hear a great deal from time to time as to the necessity for well equipped factories and creameries if we are to insure cheese and butter of a high quality. The subjects of transportation and the grading of cheese is also receiving more or less attention from dairymen, especially salesmen and dealers. There is one point, however, which is very apt to be overlooked by many in their efforts to improve the quality of our cheese and butter. We do not mean much of the trouble now experienced practically disappear if all of our producers took proper care of the raw material? It is safe to state that if milk were produced under cleanly conditions and proper care taken of it until it reached the place of manufacture, nine out of ten of which cases the product is now inferior would disappear.

The Provincial Department of Agriculture has in conjunction with the Dairymen's Associations carried on an aggressive campaign of dairy instruction and the results have been gratifying. The instructors have not, however, been able to give much personal attention to the producer with a view to inducing him to take proper care of his milk. Many personal visits have been made by the instructors, but at the best only a small percentage of the producers can be reached in this way. Leaflets have been gotten out setting forth the objects of instruction and giving instructions as to production and care of milk. These have been distributed to a limited extent; but the importance of the matter demands that the attention of the producer be called to the approved methods and again, until he practices the methods recommended.

We have pleasure in enclosing herewith a copy of the leaflet referred to, and would be glad to have your paper draw the attention of the producer to the necessity for absolute cleanliness and provision for cooling the milk. There is no one point in connection with the production of cheese and butter which is more worthy of attention. In fact, if milk were produced under proper conditions, and cooled to 50 or 60 degrees, or even 65 degrees, and kept at that point until it reached the place of manufacture, much of the trouble which now results from tainted milk and that in which the acid forming bacteria have become active, would be avoided.

We trust that you will be able to give prominence in your paper to the directions for caring for milk, if not to the above notes and "Objects of instruction." Yours truly Geo A PUTNAM, Director of Dairy Instruction.

What tree belongs to the church? Elder. What is the tree you can never burn? Ash. What is the most melancholy tree? Pine. What trees it that every boy fears? Birch. What is the tree that everybody likes? Poplar.

What tree belongs to the church? Elder. What is the tree you can never burn? Ash. What is the most melancholy tree? Pine. What trees it that every boy fears? Birch. What is the tree that everybody likes? Poplar.

His Mother's Opinion.

Whilst walking down a crowded city street the other day I heard a little urchin to a comrade and say: "Say, Chinmy, lemme tell youse I'd be hppay as a clam If I only was de feller dat me mudder t'inks I am.

"She t'inks I am a wonder, an' she know's her little lad Could never mix wit' nutting' dat was ugly mean or bad. Oh, lots o' times I sit an t'ink how nice 't would be, gee whiz! If a feller wuz de feller dat his mudder t'inks he is."

My friend, be yours a life of toil or undiluted joy, You still can learn a lesson from this small unlettered boy. Don't aim to be an earthly saint, with eyes fixed on a star, Just try to be the fellow that your mother thinks you are.

BAIRD HEADED MEN It is wrong to endanger your health and sacrifice your appearance when you know that Prof. Dorewend's Toupees and Wigs replace the lost hair. Featherweight, stay on securely—are protection to the head and add to health and appearance. You are invited to call at Middaugh House on Wed. Oct. 10.

A school master once said to his pupils to the boy who would make the best piece of composition in five minutes on "How to Overcome Habit" he would give a prize. When the five minutes had expired a lad of nine years stood up and said: "Well, Sir, habit is hard to overcome. If you take of the first letter it does not change 'abit.' If you take off another letter you still have a 'lit' left. If you take off still another, the whole of 'it' remains. If you take off another, it is not totally used up, all of which goes to show that if you want to get rid of a habit you must throw it off altogether." Result—He won it.

FARMERS' CENTRAL MUTUAL FIRE INSURANCE COMPANY Head Office: Walkerton, Ont. The strongest purely Mutual Fire Insurance Co. in Ontario. BIG STORE

A large and well-selected stock of Men's and Boys Clothing just passed into stock.

It's news to a great many people to know that all styles of Men and Boys can be well fitted with a ready made suit. A lady came along the other day with a short, stout boy: the kind that's hard to fit you know. She says "I have an awful time to get clothes to fit this boy. I have been into several stores and can't get suited."

After a trial or two we fitted him to perfection and both mother and boy were well pleased. She says: "Oh! how stupid of me not to come here first. It would have saved me a lot of worry."

Now you know what to do.

Come and see the buying power of a few dollars in Boy's Clothing. When you are in look through our Men's Clothing and tell your husband what a well made suit you saw and so reasonable at the BIG STORE.

OVERCOATS Men, don't forget that the weather is changing and a fall overcoat will not go amiss. See what we have. MEN'S HATS. We have the latest in hats of all styles. Come and let us reason with you about the one that becomes you best. UNDERWEAR FOR FALL AND WINTER IN ABUNDANCE AT THE BIG STORE.

ALEX RUSSELL

REGINA WATCHES KEEP GOOD TIME They are made by the most skilled mechanics in the world—to insure accuracy—and from the finest materials obtainable—for the sake of durability. In fact, they are made a little better than seems necessary. G. A. Webster, Durham
