> Dr. Gee, addressing the Church Congress recently held in England, complained that the intellectual qualifications of candidates for holy orders were steadily declining. In 1896, 89 per cent. were university graduates. With the growth of theological colleges this percentage has fallen to 57. He contrasted this with the percentage of university graduates in the Scottish Presbyterian churches, which is 90. He blamed this state of affairs on the high cost of education at Oxford and Cambridge, as compared with the Scottish universities.

As far as the public knew at the time, he late Russell Sage died as he had lived. He left little or no money to philanthropic or charitable objects. His wealth went to his wife. But the recent statement made by her shows that he was desirous that his money, now that he was done with it, should be devoted to good purposes. Possibly he thought Mrs. Sage a better judge of the objects to which it might be given to than he was himself, and preferred to leave the matter in her hands. In doing this he appears to have made no mistake. The manner of its disposal, as outlined by her, is very sensible, we think. Neither he nor she has any hobby to serve. The money is to go to help needy, worthy persons whom they knew, to befriend people who befriended Mr. Sage and to help struggling churches and institutions devoted to the care of the sick and needy. Just such a disposition as many people, who have no riches, say they would make, if they were millionaires.
