CURRENT COMMENT

The New York Medical Record is hopeful that the municipal campaign against tuberculosis begun in New York in 1894 will prove of great benefit to the public. By the Sanitary Code of 1897 tuberculosis was included among the communicable and reportable diseases, and that was followed in 1904 by the establishment of a municipal clinic and dispensary. By these means the indigent tuberculous patients were placed under intelligent supervision, and hospital accommodation

for suitable cases was provided. The report of the municipal clinic shows that the sufferers are taking advantage of it, and the number of patients seen in the second year was greater by 50 per cent. than the number the first year. One of the most encouraging results is seen in the fact that many cases that would formerly have been concealed have been sent to hospitals and benefited, and sanitarium treatment has been provided in time for early cases. The Record thinks that the education of the people is a matter of the first importance in connection with any plan to fight tuberculosis. It strongly favors a clinic under public control as the only effective plan to secure the attendance of the sufferers, the disinfection of the homes and the placing of the patients under favorable conditions for treatment.

The work being done by the local Sanitarium and the Health authorities the city cannot but be productive good. If the people are educated to an appreciation of the importance of sanitury precautions in dealing with sufferers from tuberculosis a great gain will have been made. The early recognition of the disease is not to be hoped for, save by a stimulation of intelligent publie interest. And only when it is early recognized is there much hope for combating it. This is a battle in which victory is worth fighting for. ----

Recently the sharks who live upon the gullible who are deceived by the "heirs wanted" swindles have been active again, and a good many dollars have gone from the United States and Canada to chase after estates in Germany and Holland. The United States Department of State officials have had many inquiries about unclaimed millions of gold in Holland held for claimants. The Hon, David J. Hill, United States Minister at The Hague, in a letter to the Department goes into the subject of "fake" estates with great detail. He explains that there is no such institution as "the Bank of Holland," in which the unclaimed millions are invariably said to be stored. More than that, in all Holland there is no such thing as an estate held in chancery indefinitely, all such escheating to the Government after a period of five years. The same sort of stories have been used to draw money from Canadians, who are led to believe that there is a chance of their recovering millions that are held "in chancery" in England or Scotland; but we never yet heard of one of those people getting a fortune out of their investment, although some lawyers have enjoyed transatlantic trips by reason of their interest in some mythical fortune. Millions do not lie unclaimed in England or Scotland. In no country in the world are claims harder to establish or unclaimed fortunes fewer, It is easier and cheaper to grow a fortune in wheat in the Northwest or dig one at Cobalt than to get one of these unclaimed estates.

The other week Andrew Carnegie stated at the New York St. Andrew's dinner that Scotchmen were not so anxious as formerly to become food for powderthat enlisting in the army was slow in Scotland. This was disputed by the late Ambassador to Washington, Mr. Durand. But along comes the Court Journal, complaining that recruiting is in an unsatisfactory condition in Britain. It says:

The matter is engaging ...e attention of the Army Council, but it is difficult to see what more can be done to make | past. the service more attractive unless the authorities give assurance of employment at the end of his color service to the well-behaved soldier. The pay is good, and the soldier is to be taught a trade while in the service, but apparently something more remains to be

When a man gives ten or fifteen of the best years of his life to the service of his country he should have some kind of assurance that he will not end up in the workhouse. But as long as times are good, work plentiful and wages high the recruiting sergeant will have difficulty in luring good men to take the shilling. Hard times are the best friend of the sergeant.

---Edinburgh, Scotland, proposes to make the reporting of cases of tuberculosis compulsory, as a means of fighting the plague. It is not intended to prevent patient from following his ordinary avocation if he is fit for it, or forcible compel him to go to the hospital againshis desire. One hundred beds will be se apart in Colinton Hospital for such cases and care will be taken to improve home conditions for sufferers. Help, especially for those ill able to secure pro-per care, will be the object of the movement.

The snowfall about Winnipeg is the greatest for ten years.

Of the fifteen mines of the globe that made 25,000,000 or more pounds each of refined copper in 1905 ten are in the United States, where there are one each in Mexico, Spain, Germany and Japan, and one-the American Smelting and Refining Company-generally known as the smelter trust, but draws its copper ores from numerous small mines in Mexico, Canada and the United States,

In 1905 there were 183 properties. One, the smelter trust, drew ores from nearly all of North America, while the others were located as follows: United States. 46; Mexico, 11; Chile, 10; Japan, credited with a production of 1,000,000 or more ponds of fine copper each. Of the 10 leading producers, six; Canada and Australia, 5 each; Spain, Russia and Cape Colony, 3 each; Germany, 2; Tasmania, Norway, Italy, Turkey and Newfoundland, I each. Ninety-four of these 100 properties made more than 3,000,000

inds of fine copper each in 1905. Figuring copper at an average price throughout the globe of 201/2 cents a pound, which is a trifle below the average quotations, the mines of the world

AN UGLY GUEST.

The Spectre of Constant Jealousy Ever Present.

When a man is afraid to remark at the breakfast table, even mildly and casually, that, from what he has heard, Cleopatra was a beautiful woman, it is fair to assume that the spectre of constant jealousy dwells in that household. When a wife fears to look at the moon because she may be accused of admiring the man in it, the husband needs to be gently reminded that he is taking very rapid short cut to killing the love he seems to hold so sacred. Love is fed by confidence, trust, faith, and serene, restful reliance, but morbid jealousy is a poison of doubt, suspicion and injustice that dulls the love it does not deaden. Jealousy is a disease that can be cured only by the subject, not by anyone else in all the world. No matter how gentle, kind, forbearing, forgiving and forgetting the object of it may be, this in itself will not cure the attack. The subject whose heart is thus swayed by fierce gales of jealousy must first awaken to the folly of it, the injustice of it; must be conscious of the trail of bitterness and unhappiness it brings to both, must realize the cruel continued asault on the tolerance, love, loyalty are making copper at the rate of exactly and patience of the other, and, when the next attack comes, seek by strength of will, by force of character, by every weapon in the armory of the soul, to the gold and silver production of the kill the feeling. Jealousy must be killed in the thought. HERE'S THE TRICK.

The Making of a Charming Woman Fully Described.

Of course, the foundation of the greatest of all charms lies in that unselfishness which illumines the face as well as the heart. As politeness itself consists in little generosities, so no woman who sinks self in the giving of pleasure to others can escape its reward and not be herself intrinsically charming. But all women are not unselfish, and history shows us many who, though innately bad, yet, through mind rather than heart, have sent their names down to us as examples of charming women. But they were miscalled, and what seemed charm was only fascination in them, which is an inborn quality, We have all known very unselfish women, who were mentally dense as mud, and much of whose unselfishness women are seldom lacking in that Pill cured me." mother wit that can assimilate what they see of good in others; and, given that self-education, there are many little things that can go far towards the making of charm. TO CURE A COLD.

It is the easiest thing in the world to catch a cold in these days of unseasonable weather. One does imprudent things and next thing finds oneself in possession of, or, rather, possessed by, a horrible attack of grippe.

As a rule the simplest remedies for a cold are the surest. There is nothing for carrying off the congestion like a hot bath, a hot drink and a good sweat, Do this at night.

If necessary to go out next morning, rub the body vigorously with alcohol and a Turkish towel before venturing forth. It is of the utmoet importance to avoid getting chilled after the hot

If it is a tight cold in the head, rub the bridge of the nose thoroughly with vaseline at night. This simple remedy sometimes works like a charm.

Another efficacious method is to snuff up warm salt water. But one must not go out right after this of the cold will be agravated. Rub' a little camphorated cream on

the chapped lips and nose. If there are fever sores moisten a little powdered borax and apply. For the aching limbs a good rubbing with alcohol or spirits of camphor is excellent.

It is of the utmost importasce during a cold to keep the system from becoming clogged. The old, senseless maxim, "Feed a cold and starve a fever," is responsible for many bad complexions and prolonged colds. The proper method is to eat very lightly, and even purchally

If you will use plenty of stowed fruit y in your diet, eat fresh figs, drink hot water on arising and before month and take nine or ten glasses of water doring the day you will be taking the best possible measure to get rid of a cold. ***

Incorporated Labor Unions. (Washington Herald.)

A corporation can be sued for any dnjury assets can be seized to satisfy the judgment obtained by the injured party. Labor unions able to sue and be sued and liable to penalty for damage done. In New South Water and New Zealand, where arbitration is comput sory, the government first demands the incorporation of labor unions. When this step is taken in this country we will come nearer to a condition of peace between labor and capital. Labor unions will then be i organize strikes until they are certain that they have the right upon their side and can defend themselves if need he in the courts.

UNWILLING TO PAY TWICE.

Parishioner Gives Reasons for Not Contributing to Pastor's Support.

"A good woman just greeted warmly and told me she had read a great many of my speeches, so was looking forward to my address," began Booker T. Washington the other night in a talk to the New York Universalist club. That places me rather in the predicament of an old southern darky down in Alabama, who had been conducting a good church work in his little village for many years. His work prospered and his congregation stayed by him, but finally word came to me that I was needed down there to settle some difficulties.

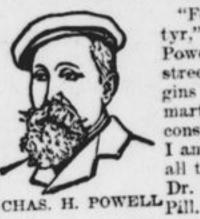

"I went down and found that the con gregation, like many others more pretentious, had been falling behind in the minister's salary and finally had refused altogether to pay it. Well, I talked it all over with the good brother and called a meeting of the congregation for that night. Then I got down to work and told them how Brother Jackson had spent the best years of his life toiling with them in season and out. I pictured the good he had done and the sacrifices he had made for them.

"My audience began to get warmed up and I saw that I had them all with me except one old fellow near the back

"'Ain't going to pay no more salary Ain't goin' to pay that minister no mo'. "So, at length, I said to him, Brother, then tell us why Brother Jackson should "The old fellow straightened up
