# THE NEW HARDWARE

## Opening Announcement!

ALL READY FOR BUSINESS  
IN OUR BRIGHT NEW STORE

COME AND GET ACQUAINTED  
WITH US AND OUR GOODS.

We have pleasure in announcing to the public of Durham and vicinity that our new store has been completed and although there are still many things to be done in arranging our stock we have decided to open to the public and do our best under the circumstances. We realize how much nicer it is to show goods in a bright cheery store and how much easier it is to keep the stock fresh and clean when the store is that way to start with. We intend to keep it bright and attractive. We are working for your welfare.

We think you will find every line of our goods to be the very best in their class. That is our purpose. A good deal of time was spent in London, Hamilton and Toronto securing agencies for different lines of goods which are recognized everywhere to be the best in their class. We would like every reader of this paper to come in and carefully inspect our various lines of goods.

In our stock you will find plenty of variety in such lines as:—Furnace, Stoves, Nails, Glass, Door Fixtures, Builder's supplies, Tinware, Graniteware, Oils, Cement, etc., etc. The McClary lines of Stoves, Ranges, Furnaces, Enamelware, etc., are better known and more successful than any other makes in Canada, and their agency is always sought after by live dealers. We have secured the sole agency for their celebrated Stoves, Ranges and Furnaces and have this large Company's guarantee behind every article of their make which we sell our customers. We will always have a complete line of these leading goods in stock and you should examine them carefully before buying any other.

"Pandora" Range.

The "Pandora" range, made by McClary's, London, is the most talked of and best working range in Canada. It has many new labor and fuel-saving features which are not found on any other stove. It is also a very handsome range, being tastefully dressed with nickel trimmings and these combined with its smooth, bold carving and rich massive castings give it an elegant appearance. We invite you to see this range whether you wish to buy or not.

In glass we can give our customers almost anything they want in plain glass, colored glass, ornamental glass, etc. Our door fixtures and builder's supplies, a few cuts of which we show you are equal to any on market and builders would do well to see them before ordering elsewhere.

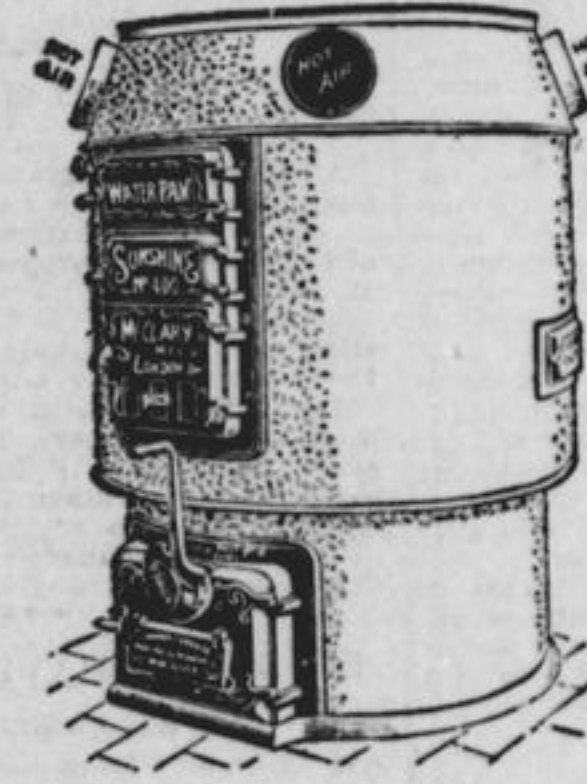

Saw Filer VISE

Rubber Cushion, saw filer vise. This is one of the necessary things for those who sharpen their own saws.

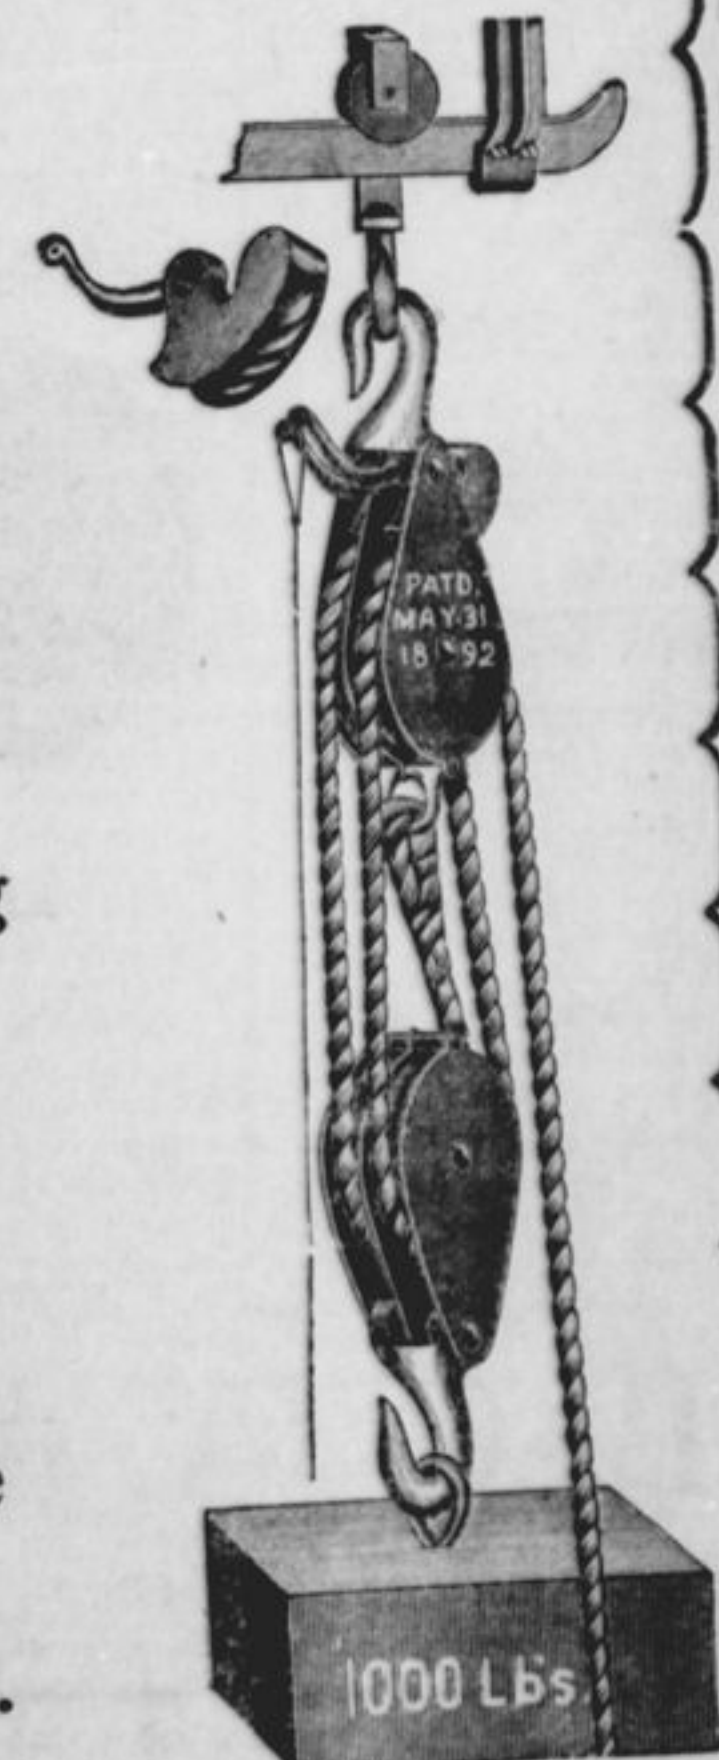

Simple, yet Effective

Sunshine Furnaces.

The "Sunshine" is made by McClary's of London and is well named; is almost as good as a private sun in your cellar. This furnace burns either coal or wood and is made in sizes to suit the smallest house or largest building. It is modern in every detail, has large double feed doors, shaker crank that you can work without getting down on your knees; automatic gas damper which is absolute proof against gas seeping into the house and a dozen other good devices for saving fuel and work. We will gladly give you all information and estimate of cost of this steel furnace when you want to install a heating system. Call and see it in operation at our store.
