Circumstances prevented us from sending anything in the shape of news from this famous place for the last couple of weeks or more. We do not mean to say that we are getting out of practise as far as writing and figures are concerned, however it is only done in a different form, &c.

The snow is taking the notion to bid farewell if the thaw continues, but it is uncertain yet what it will come to before Monday morning, sleighing this Saturday afternoon was fairly good.

Quite a number of people are complaining. Mr Dougald McCormick has been a sufferer for the last week or more but we are pleased to hear latest reports that he is improving nicely and we sincerely hope that he will soon be able to be about in his usual strength and activity.

We are sorry indeed to hear of Mr Samuel McDiarmid's illness which is altogether of a different nature to Mr McCormick's, but we hope to hear of better tidings concerning his illness in the near future and that he may be speedily restored to soundness of body and all else combined before long.

There hasn't been as many sawlogs at our sawmill for years as there are this spring, and we hope that the proprietor, Mr McLeod will be prosperous in getting them all cut up during spring and the early part of summer. **Hunter's "HIGH QUALITY" Grass and Clover Seeds.**

Noted everywhere for their vigor and Purity.

**HIGH QUALITY** is the first and strongest recommendation to every buyer and user of any kind of seed; the price is a second consideration when estimating its value and worth. When comparing both the quality and price of any seeds we offer they will be found in the buyers' best interests.

Our "GOVERNMENT STANDARD" in Red and Alsike Clovers and Timothy Seed have given unqualified satisfaction. The most persistent care is given to supply the highest quality and purity obtainable.

**SELECTION** We decline to purchase rough and uncleaned seed and refuse any lots containing such noxious weed seeds that cannot comply with the Seed Act.

"Germination Test" A most thorough germination test is made in duplicate of every lot of seed we offer which is done according to the standard methods employed by the Department of Agriculture of Ottawa, Washington, and by European seed testing stations. To further protect our customers a duplicate sample of each lot is sent to the seed testing branch at Ottawa for check and comparison. With such unusual care users of Hunter's Government standard brands in clovers and grasses have the strongest assurance of securing the very finest grades of seeds to be had from any known sources for purity and value.

The same careful germination tests is given to every variety of garden, field and papered seeds. We know that Hunter's seeds grow
