

If all the skies were sunshine, Our faces would be fain To feel once more upon them The cooling plash of rain.

If all the world were music, Our hearts would often long For one sweet strain of silence To break the endless song.

If life were always merry. Our souls would seek relief And rest from weary laughter In the quiet arms of grief. -Henry Van Dyke.

Prayer.

Our Father in Heaven, the heavens declare Thy glory and the firmament showeth forth Thy handiwork. On every side we see the evidences of Thy presence and power. But we bless Thee that Thou hast given to us a clearer revelation of Thyself than in the world of nature. Thou hast not left us to find out by our own groping the way of life. Thou hast given us Thy law which teaches us our duty to Thee and to our fellow men. And Thou hast also spoken to us through Thine own Son. As Thou hast given us the light, give us grace, we pray Thee, to follow the light and to abide in it. Forbid that with the light upon our pathway we should chose the way of darkness. Let Thy love be shed abroad in our hearts so that we shall rejoice to do Thy will. Enable us to grasp the great spirit of love that underlies all Thy law. and bring these wills of ours into such complete harmony with Thine that service shall be our delight. Amen.

My People. (II. Sam. vii. 10.)

I will appoint a place for my people, and will plant them that they may dwell in a place of their own and move no

I. My people. Mine by ownership, providence and redemption. I have given them to my Son and no one dares to challenge my right. I have given my Son to them and no one says Me nay. They are chosen and called and kept. "Jacob is the lot of mine inheritance. The Lord's portion is His people."

II. They are planted. How did you get that ornamental tree in front of your house? You went to the bush and made ! your choice, you uprooted it with care, and brought it home and planted it in a favored spot. Just so, the wild olive tree is brought, tended, grafted, cared for, in time the fruit abounds. Trees of righteousness the planting of the Lord. Planted in the courts of the Lord. Are you a tree of the Lord's right hand planting? If not. Christ has power to root you up and cast you away. Take care, and look to your evidences of a clear

III. They are placed. Happy is the man who is in the place of God's appointment. He leads not by the shortest way, for character is of slow growthnor by the easiest way, for He is not the minister of our selfishness. We are led in the wisest way and in the most useful and these have often tears and pain and

Most Unhappy.

The one who is incapable of happiness is the most to be pitied of mortals. seems strange that there should be, this beautiful world, souls so dark the neither by night nor by day is there star or sun. Pat there are those ou of whose lives the sweetness has gone for this world, and the only joy the looking forward to the da of rest in the grave. Life to them ha lost its clear outlines . They are in th the final twilight, and there is only the mist that follows the sunis not the will of God. It fits neither with His purpose nor man's is neither a tribute to nor a rightful preparation consider again the cry of the Psalmist "Why art thou east down, O my sou and why art thou disquieted in me Out of that shadow he lifted his eve into the sunlight: "Hope thou in God for I shall vet praise Him, who is th help of my countenance, and my God.'

Fishers of Men. Fishing for souls is a personal wor It is not confined to the pulpit; ever man or woman who professes faith and an ardent love of Jesus should engage in it. It is not a "professional" busi ness, restricted to a few, and to be don in a set fashion. Nor is it to be as complished only by a whole church em ploying a huge net to bring in a multitude of converts at a single draught, Sometimes a powerful and general revival does this. But conversions follow individual effort with individual hearts pastor often accomplishes as much by an hour of close friendly conversation as by an hour of public preaching The Sunday school teacher can reach his or her scholars most effectually by a private visit, and a faithful talk with each member of the class. Personal work does the business; each fisher must drop his own book, baited with No one is scolded to Christ, yet an unconverted person will bear a tremendously searching talk if it is conducted in a frank tender spirit and unmistakably prompted by affection. The real aim must be persuasion, that is, to persuade the sinner to let go his sin and to lay hold of Jesus. He is wise that winneth souls.

THE EAGLE'S LESSON

****************** From M. Brown's "The Eagle's Flight,"

July St. Nicholas. Far, far up among the crags was built the sest. It was just on the edge of a great bluff, and had beer placed against a rock that protected it from the cold, biting winds of the north. The nest was built of twigs and willows, and bits of string, and was lined throughout with horsehair. The mother engle had taken great care to make it strong and warm and the three little eagles, snuggled close together within, thought it the nicest nest in the world. When the sun shonet brightly, the little eagles would peer over the edge of the

nest, and the things that they say were very wonderful indeed. There was a wide, wide plain, with nothing on it except-ing little bushes of sage-grush, scattred here dogs scampered among the bushes, and the twenty-two horse-power car. the running things. Then beyond the plain sometimes blue. At first they did not know er they saw that it was a river. It was from the direction of the river that their to grow up for future contests. other came with fish for them to eat. Then, just as they would be getting tired of gazing over the great plain, the mo-

ful morning came again. Now there was one of these eaglets that was larger and stronger than the rest. He horseman. Accordingly, after the young thought a great deal agout the things he bulls had been herded into a large corsaw, and questioned his mother about the places she had visited. And his mother closure. The occupants were armed with would some day be the greatest among the eagles. So she called him Keneu, the great war-eagle, and she told him of her he came to his mother, who was standing its occupants were kept clear of the with folded wings on a great high rock. horns of the surprised and apparently She fid not notice Keneu, for she was looking away to the south, where all the land was covered with a blue haze. "Mother," said Keneu, when

Gray Horses in Maine. After the disquisition on the value of grey horses, as compared with horses of other colors, the Parkhurst writer sagely notes: "You may change a farmer's relibed-wetting. There is a constitutional gion or politics, make him think he is you will never make him think a grey the standard, or words to that effect. I never was so astonished in my life. I grey or white horses were the handsomest, toughest breed on the planet.

"The celebrated Arabian horses are white or dapple grey. Famous generals in all wars have ridden white or iron grey chargers. Circus men select grey horses to draw the band wagons in street parades. A great packing company always selects Percheron horses, not so much for the color, but because their ments better than any draught breed white horse, and St. John, the revelator, "I see a man of middle age, with saw a white horse in Heaven (Rev. vi. 2). are white or grey, and another decade will see 90 per cent, of them of that color."-From the Lewiston Journal.

Completeness of French Census. France is a country where the census assumes almost the elevation of high art. The cult of detail of the personal kind carries passion for statistics to its apotheosis. There is nothing like it is this country. The timid bachelor who cares to know the Department in which women outnumber men, and are therefore least likely to reject a suitor; the woman yearning for matrimony who would learn where men are numerically the preponderant sex, and therefore compelled to respect the law of supply and demand, need only cast their eyes over these abundantly classified staticties. Similarly, one may find at a glance which province or department most in-clines to bachelordom or spinsterhood, which to widowhood and which to divorce; where all the deaf and dumb some from, and where blindness is in fashion. This last is perhaps the most curious in detailof all. Why, for in-

The Refuge Against Old Age. Robert Louis Stevenson wrote: "Cling

your youth. It is the artist's stock in to your youth. It is the artist's stock in trade. Do not give up that you are aging, and you won't age." In this familiar and homely advice is hidden the secret of the artist's power and charm. He never grows old; things never become commonplace to him; the colors do not fade. As a matter of fact, they never fade; it is the perceptions which become duller the interest which her which become duller, the interest which becomes less keen. A good many men and women have discovered that it is a good thing to associate intimately with persons younger than themselves. This is one refuge against old age, but the real refuge is within. It is the assertion of one's immortality, the consciousness day by uny, in all relations and occupations, that one is going forward and not backward; that the world, which grows sadder because one's companions go out of it, is growing brighter because one is pushing toward the dawn and not toward the sunset. There is a great mass of misleading and cynical philosophy about oid age. Poetry is full of images of disenchantwide, wide plain, with nothing on it excepting little bushes of sage-grush, scattred here hacienda in this state. The novel experience and there. Mad Dogs Easily Avoided. Mad dogs do not atack people. This is the statement made by Dr. P. M. Hall, city health commissioner. "When a dog has the rabies," 'said Dr. Hall, "he has lost control of his body and what he does is mechanical. His jows snap involuntarily and if he encounters any object whether animate an inanimate, he is likely to bite it. But a mad dog does not attack as does an angry dog. He does not pick out a victim nor use any strategy. For this reason dogs suffering from rabies are less dangerous than 18 supposed. No grown person need fear them, for all he has to do is to get out of the way. The dog will not chase him. Of course, young children are in danger, as they do not know how to dodge the brute."-Minneapolis Journal.

Cow Carried Away a Golf Ball, On Saturday two golfers were doing the round of the Bury Field links, Newport Pagnell, when a most remarkable incident

One of the golfers in making a cleek shot struck a grazing cow on the hindquarters. In dropping the ball lodged in the whisk of the cow's tail. Expecting to see the ball fall when the cow moved, the players approached the animal, which started off on the run, the ball still lodging in the tail. The movements of the animal caused the ball repeatedly to strike her on the legs, which made her kick out viciously. For fifteen minutes the players gave chase in the hope of dislodging the ball, when a specially victous kick caused the ball to fall to the ground .- From the London Evening Standard.

The Day of the Trolley.

So rapid is the extension of existing trolley lines and the construction of new lines that statistics of mileage are out of date before they can be compiled under municipal ownership and under private or public ownership instead of themselves and the bosses, then they would get long distance as well as short distance

An article in the Metropolitan Magazine for July states that there are already 5,000 miles of trolley line in Ohio. An article in Appleton's Magazine for July says that in Indiana "1,000 miles of track are now in operation; 350 miles are building and will be placed in opera-Some people are going to be mighty | tion early this year, another 2,000 miles invested in these properties; passengers are carried at their convenience in clean and comfortable cars and for one-half the former fares." A similar story might

be told of many other sections. The trolley line is no longer merely an mprovement on the horse car for use in cities and their immediate environment. A number of hundred mile runs are possible to-day and thousand mile trips will soon be made Experience thus far seems to have proved beyond any question that trolley lines can carry passengers and parcels at much lower rates than is possible for steam railways. It is true that they do not yet run at the speed of express trains, but this if offset by the fact of more frequent communication. In many cases, probably in a majority, the cost of the trip is of greater consideration to the traveller than is the time required for it, assuming a fair equality of physical comfort. If a steam railroad trip of a hundred miles is made in two hours at a cost of \$2 and the same trip can be made by trolley in three and a half hours for \$1.50 there will be plenty of passengers

for the trolley. The development of this system of transportation makes it even probable that before many years our railways will be used mainly for long distance travel and heavy or bulky freight, while the trolley will be generally used to say just what may happen around New York city, where conditions are somewhat peculiar. So far as the country at large is concerned there can be little doubt that trollev lines are destined to el fect a revolution in passenger transpor tation and also to exert an important influence in the field of parcel freight .-N.
