Put Miller in the Government

Changes in the Dominion cabinet are expected soon. Here and there men are mentioned as "possibles" that we are sure have neither the business ability nor capability of our own H. H. Miller. Mr. Miller's character, his integrity, his push and knowledge of affairs generally point him out as eminently suitable for a cabinet position. Already he is recognized as one of the leading speakers of this part of Ontario, and his admission to the inner circle would be a real strength in Ontario to the Laurier administration. Mr. Miller's business motto "always prompt, never negligent" would be a revelation in some departments at Ottawa.

Maintain the Old Traditions. The Globe is doing good service in calling attention to the danger to the best interests of the country involved in any lowering of the high standards of justice. We have prided ourselves hitherto that justice in Canada is blind to all distinctions of rank or wealth, and that all men stand on the same platform in the eye of the law. The result has been that Canada has enjoyed an enviable reputation as law-abiding country in which those responsible for the administration of justice are held in high respect. There have been a good many things recently to jar our self-complacency, and notable among these is the shameful miscarriage of justice in the Orangeville abortion case, in which the guilty men have gone unpunished. That shameful episode cannot be forgotten and is still to be reckoned with. Cases of this kind have far more than a local interest. They go to the root of things. It will be a dark-day for Canada if there should come any sag from the old levels of justice, and the impression should gain ground that by means of social or political or money influence the wrongdoer can evade the consequences of his acts.—Presbyterian.

A writer in the News signing himself a "John A. Boy," says "Borden is a frost and Foster is an icicle" and seems to hope of the Conservatives winning till they get a change of leaders.

Railway Exhibit at Toronto. One of the handsomest buildings on the grounds of the Canadian National Exhibition, Toronto, will be the new Railway Exhibits Building, which the various companies have combined to erect at a cost of \$50,000. This building will be handsomely equipped, and will contain samples of cereals, minerals, and all the game from the chief points on every line in Canada. It will also contain many exceedingly handsome views of scenery, and a large variety of exhibits made by the Ontario Government.

We Extend Sympathy. The Review has much reason to sympathize with its exchange which published the following: The most unpleasant feature of newspaper business, experienced by all country papers, is the number of subscribers who never consider their indebtedness. It does not seem to care whether the publisher can meet his obligations. While we have hundreds of subscribers who are honorable enough to pay, we are sorry to have our list numbers of subscribers who are in arrears, the amount of whose indebtedness while individually small runs up to very many dollars. We would appreciate it very much if these arrears were paid up.

"In the beginning God created the heavens and the earth and all things therein. He then created man and woman and left the loafers on the corners, and in due time they multiplied and then spread into post offices and depots and the stores. In these places they sit and explain state and national problems that have vexed great minds. While he is thus engaged his wife is out washing for her neighbors, and the poor helpless children are left at home taking care of themselves as best they can. There is nothing more noticeable than a loafer."

LADIES, GET READY.—Ladies! The Fall Fair will soon be on, and its high time you started to make a rug, patch a quilt, work a few nice buttonholes or darn a pair of socks. The girl who can darn socks without leaving lumps is a real jewel, and the art of darning should be classed as an accomplishment. It's an awful handy thing, too, for a girl to make a good loaf of bread—not the heavy stuff that drops like a bullet into a person's digestive machinery. It's a sin for a girl to know how to play the piano, tune a Jew-harp or paint a nice landscape. That's all right, but there's nothing like the girl that can make a good pan of cakes and sew on trouser buttons, and polish the glassware and prune the burdocks in the backyard. There's no discount on a girl that kind.—Harriston Review.
