

# The True and The False

"I know you will, Nelly. Well, dear, in the first place, promise me never to bear malice against anyone for my death. Will you promise this? Remember, it is my dying request!"

"Oh, Willie, that is very hard, very hard to do. But I will promise you to pray daily for grace to forgive your destroyer, Willie."

"And, secondly, bring up your children as the knowledge and the fear of the Lord!"

"I will do that to the best of my ability, Willie, if I live. But, oh! I shall die! But for the children, I wish I might!"

You will not die, dearest; you will live for your children, and every year you will grow stronger and firmer, and better able to guard and guide them. Now you are youthful, and tender, and sensitive, and grief penetrates you through and through, but as you grow older you will have more fortitude and resistance. God will give you. God will support and strengthen you. And now, love, we must all kneel together for the last time on earth, and ask God for comfort and support, in this, our parting hour. And then, dearest Nelly, you must go home, and take care of our child, and leave me here with Father Goodrich. He has promised to remain with me to the last, Nelly. And he gently clasped her arms around his neck, and sat her down and beckoned the priest.

She was about eight years of age, but her superior height, the regularity of her regular features, and the masses of long, jetty ringlets hanging down each side of her pale face, made her look two years older.

So strongly was Daniel Hunter attracted toward this beautiful, pale child that he spoke to her, thinking it no breach of etiquette to address a strange little girl on the deck of a packet boat; but the little lady deemed otherwise. Raising her jetty eyebrows with slight surprise, and glancing at him from the corners of her long, almost almond-shaped eyes, she moved slowly off.

The next afternoon, when the packet was entering the mouth of the P—o River, they were overtaken by one of those sudden squalls so frequent upon the bay. The skipper put his head down to the gangway, and vociferated to Daniel Hunter and the old man, his fellow-passenger:

"Come, come and help us, or we shall all be in it in five minutes!"

Daniel Hunter sprang at once upon the deck, but before a shot could be fired, the little vessel was driven forward toward the shore and capsized. They were in the water, the skipper and the three men that formed his crew, and the waves like lusty swimmers, and striking out for the shore. Daniel Hunter looked wildly around the heaving, foaming waters for the old man and the child. The old man was never seen again, but the child was thrown up on the beach, and the losing vessel. Daniel Hunter saw her cast her white arms wildly up and, uttering a strange cry, sank upon the sand.

It was with mingled feelings he set out for the school to bring her home. Augustus had grown up, yet as he sat in the parlor of St. Joseph's, awaiting the entrance of his little girl, the image of a child was in his mind. The door opened, and a most beautiful dark woman, and a dignified air and address, entered. The woman, the child, and the unique character of her noble countenance had not changed, except to mature in beauty, and there were the same long, jetty ringlets, only longer and more abundant.

He crossed, smiling to receive her. She advanced and placed both her hands in his, and raised her eyes to his majestic countenance, instinct with power and goodness, and an overwhelming but delightful sense of gratitude thrilled her heart, and spoke in eloquent light from her dark eyes. It was a gratitude that could not be put in words—that must be lived and acted out—her speaking gaze lit up, and she spoke as if she were speaking to him, and she spoke as if she were speaking to the child, and she spoke as if she were speaking to the world.

It was the good priest who took charge of the poor remains of William O'Leary, and saw them decently interred. Nelly, half dead, but resigned, attended the private burial. And the last care of the good man, after an ineffectual search for Norah, was to convey Nelly back to her distant country home.

CHAPTER VII.

Daniel Hunter, like the majority of our most distinguished men, in every department of fame, sprang from the very humbleness of the people. His immediate progenitor was a country blacksmith, in one of the western mountain districts of M—, and the father of eleven children, sons, of whom the future Governor of M— was the third, and five daughters.

It was while Daniel Hunter was yet a village lawyer's clerk that the most interesting and important event in his domestic life occurred. It was this. He had been sent by his principal on a commission to the city of A—. He found in the city a young woman, a native of the country to B—. There he took a packet down the bay to the city of his destination. Railways and steamboats were not in use then.

On his return up the bay, the cabin of the small packet was shared by two other passengers, an old man of reverend clerical appearance, and a little girl, dressed in deep mourning.

She was about eight years of age, but her superior height, the regularity of her regular features, and the masses of long, jetty ringlets hanging down each side of her pale face, made her look two years older.

So strongly was Daniel Hunter attracted toward this beautiful, pale child that he spoke to her, thinking it no breach of etiquette to address a strange little girl on the deck of a packet boat; but the little lady deemed otherwise. Raising her jetty eyebrows with slight surprise, and glancing at him from the corners of her long, almost almond-shaped eyes, she moved slowly off.

The next afternoon, when the packet was entering the mouth of the P—o River, they were overtaken by one of those sudden squalls so frequent upon the bay. The skipper put his head down to the gangway, and vociferated to Daniel Hunter and the old man, his fellow-passenger:

"Come, come and help us, or we shall all be in it in five minutes!"

Daniel Hunter sprang at once upon the deck, but before a shot could be fired, the little vessel was driven forward toward the shore and capsized. They were in the water, the skipper and the three men that formed his crew, and the waves like lusty swimmers, and striking out for the shore. Daniel Hunter looked wildly around the heaving, foaming waters for the old man and the child. The old man was never seen again, but the child was thrown up on the beach, and the losing vessel. Daniel Hunter saw her cast her white arms wildly up and, uttering a strange cry, sank upon the sand.

It was with mingled feelings he set out for the school to bring her home. Augustus had grown up, yet as he sat in the parlor of St. Joseph's, awaiting the entrance of his little girl, the image of a child was in his mind. The door opened, and a most beautiful dark woman, and a dignified air and address, entered. The woman, the child, and the unique character of her noble countenance had not changed, except to mature in beauty, and there were the same long, jetty ringlets, only longer and more abundant.

He crossed, smiling to receive her. She advanced and placed both her hands in his, and raised her eyes to his majestic countenance, instinct with power and goodness, and an overwhelming but delightful sense of gratitude thrilled her heart, and spoke in eloquent light from her dark eyes. It was a gratitude that could not be put in words—that must be lived and acted out—her speaking gaze lit up, and she spoke as if she were speaking to him, and she spoke as if she were speaking to the child, and she spoke as if she were speaking to the world.

herself. She appeared to have retained a distant recollection of all that had passed, yet was ignorant of her father's death; for, after breakfast, she came forward to Daniel Hunter, and with the air of a little queen, placed her hand in his, saying:

"Sir, I am very grateful to you for saving me; and, sir, my father was too, and will tell you so better than I can."

"Miss Augusta," amended the little one.

"Lady Augusta, then, your father was earnest, inquiring, yet confident gaze, and tell her that her father was lost? He concluded thus: "Your father, Augusta, has not been seen since yesterday."

Her start of wild alarm, her gaze of intense anxiety, almost unmanned him; but he saw that the only thing proper to be done was to pitifully refuse, and he did so, as gently and as respectfully as possible, quite prepared for the wild outburst of sorrow that followed. And after this first outbreak of passion, the girl was pitifully refused, and he did so, as gently and as respectfully as possible, quite prepared for the wild outburst of sorrow that followed. And after this first outbreak of passion, the girl was pitifully refused, and he did so, as gently and as respectfully as possible, quite prepared for the wild outburst of sorrow that followed.

"I will ask you, sir, to be good enough to write to my aunt, and I suppose these good people will let me remain here until I hear from her—she will send for me, and pay them for their trouble."

The youth trembled for his "prize." He felt that under some circumstances it was possible to be guilty of an abduction, and he felt that under some circumstances it was possible to be guilty of an abduction, and he felt that under some circumstances it was possible to be guilty of an abduction.

Three weeks later they were married. Now, only a few days before the death of her aunt, the Honorable Mrs. Percival Augusta came into possession of the princely fortune.

(To be continued.)

A good cook for family of two. Highest wages paid. References required.  
Write Mrs. JOHN M. EASTWOOD, P. O. Box 97, Hamilton, Ont.

**GOOD OLD TIMES.**  
In the first place, the woods were full of men, runs "The Chronicles of a Queer Girl" in the Ladies' Home Journal. They were numerous as the sands of the sea, and life was interesting to a couple to milder. In my time there was such a thing as the parting off of one couple to "keep company" for years at a stretch, to the exclusion of other friends. A girl was free to accept the attention of any and every man, and have a different escort to every dance, picnic or party of the season. Even an engaged girl was not expected to go only with her fiancé, but made things lively by entertaining and going about with other young men, and keeping the community upon the qui vive as to which would be her final choice.

There was time for killing in those days—hours for fooling dull care, and a falling sense of sinking into a stupor. A pretty girl was likely to spy from her window an interesting group of pedestrians or a dashing horseman at almost any hour of the day. If she went downtown (she did not often, gentle reader, as girls go nowadays), it was strange, indeed, if there was not rivalry as to which of the young gallants should walk home with her. On Sunday the rear seats of the sanctuary were comfortably filled with young gentlemen of no special religious professions, and it was by no means the least interesting feature of the service passing out of the church door and down the line, smiling and bestowing glances on them as they stood behind their hats, gravely saluting one pretty devotee after another as she came out with the Sabbath halo around her face.

There was a custom, now obsolete, no doubt, for lack of numbers as well as spirit, of giving a pretty girl a "grand rush" on Sunday afternoons. As I look back now I can see a phalanx of hats and trousers, audacious faces and single-handed fire, and I should call it help. If he needs assistance he may call on settlers or miners, if any are near, or he may go himself, or send some one, to the nearest telephone and acquaint the supervisor and the nearest citizens with the situation. He then does the best he can with the fire until help arrives. The Government is extending the telephone through many of the national forests, and private or company lines are frequently available and assist greatly in reporting and subduing forest fires.

They fight fire with fire, when less drastic measures fail. A small blaze just starting or burning feebly may be beaten or stamped out, or extinguished by shoveling sand on it, or by raking it up in front of it.

If a great forest fire is raging, the fighters go some distance in advance of it and cut lanes through the woods across its front. All logs, brush, leaves and litter, cleared down to the mineral soil, are removed from the lane. The fighters go far enough ahead of the fire to give them time to complete the lane before the fire

## FIGHT FLAMES IN FORESTS.

MILLION-DOLLAR BRIGADE MAINTAINED BY UNCLE SAM.  
Fire, Not Water—Battle Carried on by One Man or Many as Battle Requires.

The greatest fire-fighting brigade in the world is that maintained by the National Government. It extends the rough protection of its venturesome arm around all the store of timber wealth in the national forests from Mexico to Alaska. The quietest fireman of them all is the grizzled cowboy ranger, whose equipment is a mustang pony and a pine box, who may combat single-handed in the wild in some lone solitude of the forest, or in a group of rangers, whose forest primeval they seek to devour the national forests, scattered from Oklahoma to Alaska.

The battle has been on for two months past. For almost the entire season when the dry twig crackles under the heat and the absence of rain invites disaster. Here and there in the stretches of solitude a forest smoke has turned in the air to the village fire, and the battle has been waged.

The national forests, aggregating in area more than 150,000,000 acres—enough to fill the State of Pennsylvania, or to fill West Virginia, or forty-five feet of the United States in topography, or in climate, or in vegetation. Some portions are steep, rugged, inaccessible. Other parts are comparatively flat. The forests in one locality may consist of mature trees, while in another they are young, and the undergrowth is dense. High mountains are in one region, valleys and ridges in another, and the forests are diverse. Excessive droughts in one section may be rare, and in others dry weather is the rule.

In developing its plans for fighting forest fires, the Government considered all kinds and conditions of country. The first ranger is the Government's fire scout, picket and skirmisher. The dry forest is his busy time in pine needles strewn the ground and the trash and litter become like tinder before the autumn rains set in.

There are in this service a total of 1,200 men, guards and rangers, at the height of the season. There are veteran rangers in the service, who are paid \$1,000 a year, while the guards who, as beginners, are paid but \$720. The protection costs a round million a year, but the estimated timber saved from destruction is placed at six times that figure. This is the best of the usefulness other than fighting the fires. They are the rulers of the small realm in which they are placed, and it is only through their consent that timber may be cut, and the forest is their constant benefactor. The tolls for these privileges are collected and go far toward paying the whole expense.

Less of appetite, coated tongue, bad taste in the mouth, heavy dull headache and a dull sluggish feeling—these are the symptoms of stomach trouble. They indicate that the stomach is on strike, and it is no longer furnishing to the body the full quota of nourishment that the body demands, hence every organ suffers. The cure is two-fold: the treatment is hampered by the use of pre-digested foods and artificial ferments, and the new one—The Dr. Williams' Pink Pills method—by which the stomach is treated up to do the work nature intended of it. A recent cure by the tonic treatment is that of Mrs. J. W. Haskell, Port Maitland, N. S. She says: "For years I enjoyed perfect health, but suddenly I became afflicted with stomach trouble. My most efficient work is not the rubbing of great fires, but in preventing forest fires which are constantly on the fall to curb one forest conflagration. One up to do the work nature intended of it. A recent cure by the tonic treatment is that of Mrs. J. W. Haskell, Port Maitland, N. S.
