If a few well-chosen books are purchased, they will lead the way to a larger library, and if the pupils and parents learn to enjoy reading and have read all the books in the library they naturally will want more, and whoever has acquired a taste for good books can never be induced to read poor ones, as the best drives out the poorest. There is never any room for impure books where the love of good news has gained a place, and without a sense of reverence for higher things no man can make the most of himself or attain the best in his vocation.
