A THANKSGIVING FEAST.

We two are the last, my daughter ! To set the table for two Where once we had plates for twenty,

Is a lonesome thing to do. But my boys and girls are scattered To the east and west afar, And one dearer than even the children Has passed through the gates ajar.

I'm wanting my bairns for Thanksgiving ! I thought last night as I lay Awake in my bed and watching For the breaking of the day, How my heart would leap in gladness If a letter should come this morn To say that they could not leave us here To keep the feast forlorn.

Samuel, my son, in Dakota, Is a rich man, so I hear, And he'll never let want approach us, Save the wanting of him near; While Jack in San Francisco, And Edward over the sea, _ And only my little Jessie Is biding at home with me.

Oh! the happy time for a mother is when her bairns are small, And into the nursery beds at night She tucks her darlings all. When the wee ones are about her, With gleeful noise and cry, And she hushes the tumuk with a smile, Her brood beneath her eye.

But a mother must bear her burden When her babes are bearded men; On 'change, or in the army Or scratching with a pen In some banker's dusty office-As Martin is, no doubt-A mother must bear her burden And learn to do without.

I know the Scripture teaching. To halt and help the blind, And the homesick and the desolate At the festal hour in mind. Of the fat and the sweet a portion I'll send to the poor man's door, But I'm wearying for my children

To sit at my board once more. I tel! you, Jessie, my darling, This living for money and pelf, It takes the heart from life, dear, t robs a man of himself. This old bleak hillside hamlet That sends its boys away. Has a right to claim them back, dear,

On this Thanksgiving Day. Shame on my foolish frettings Here are letters, a perfect sheaf ! Open them quickly, dearest Ah, me : Tis beyond belief By ship and by train they're hasting, Rushing along on the way.

Tell the neighbors that all my children Will be here Thanksgiving Day. -Margaret Sangster, in The Standard

REMEMBER ETERNITY.

If eternity is simply tmie indefinite-

ly prolonged into the future, how can any one remember it? We can't remember the future. Memory has to do with the past, with something that has already touched our life. If we are to remember eternity accordingly, it must be past as well as future and must already be near our life, as indeed it is For eternity is no indefinite time. is above all time. It is timeless life, the life that is above change and de cay, above all evil and sin. "This is eternal life," said Jesus, "that they might know Thee, the only true God. and Jesus Christ whom thou hast sent."

Of course, we can only think in terms of times and space, because these ideas condition all our life. But in God there is no space and there is no time. All is always present to Him. And the life that is in Him is also above all the limitations of this earthly life. To be sure we must, while we are here, live the life of God and have the knowledge of God in our bodies and under the conditions of space and time. And, accordingly, we cannot talk of the eternal life and of eternity without using ideas and words which belong to time and space. But we need to remind ourselves that these are only figures of speech, and that the reality is far and beyond them.

The language of John in his epistle, is very careful language. His distinct tion is not primarily between what is present and future, but between the world and God. That is the choice between the present and the future, but it is that because it is much more. It the choice between the unworthy and the worthy, the low and the high, the transient and the enduring, between the fatal choice of the world's fleeting joys, and that living connection with God in the doing of His will, which relates men to the abiding

We do entirely right, however, when, after guarding ourselves in these ways against wrong ideas, we think of the future and of our duty to prepare for the future. Beyond our life here there is an entrance waiting for us into the eternal life, which we live here under many limitations, and shall live there in perfect freedom. And our loved ones who have gone before are waiting for us there in what Jesus himself called His Father's house of many mansions. In that life and peace we shall work with God and serve Him. That life there is the whole of which this life is a part and those who reject what it offered them of it here have rejected the possibility of it there, so far as we may know or can judge of the issues of life.

We are waiting here until that larger life can begin, but we are not "only waiting here." In a true sense we are, for that is our real life, and this is only preparation for it. But the preparation consists in present duty and work, and faithful devotion to our tasks, within the limitations of this present life. The best spirit in which to fulfil those tasks is the spirit of waiting for Christ and for the everlasting life. To those who wait for Him and it, they will come.

PRAYER.

Holy and most merciful Father, we thank Thee for the care that has guided us through life's journey and has kept us even to this hour. Forsake us not, O God, but send us Thy light and truth, and lead us even to the journey's end. We know not what Thy will for us may be, whether Thou wilt spare us to old age or shortly call us hence. If the summons should come soon, may it find us ready to appear before Thee and render our account. If Thou shouldst give us many years of life, grant that as they pass they may leave with us gifts of grace, that we may grow rich is virtue and may accumulate the incorruptible treasure of holy character. May our latest days be filled with peace and overflow with blessing. Amen.

---A. K. T.---

doing and all wishing to do each other's work."

"I suppose it's because other people seem to do their work more readily than we do ours," I remarked.

"That may be. In fact, I guess often is so. We see a man make a weld, letter a sign, or sell soap on the market, | tion of the earth.

"Because we haven't been doing it for years. Long practice tells the black- zero.

British Coal Mines.

Consul Frank W. Mahin reports that new coal mines have recently been opened and others very much developed in the Nottingham district. Improved methods and apparatus are also being applied to mining. Among these is the substitution of modern screens to clean and sort the coal, saving much time, while doing the work more thoroughly. Electric power and compressed air are also supplanting primitive methods of hauling coal out of the pits, and ingenious methods of carrying miners to their

work, saving the strength they would lose in walking, are being used. Mechanical appliances are now user for cleaning colliery tubs, which soon become caked with fine coal and dirt and have hitherto been cleaned by hand. The most expeditious device is a circular scraping tool workd by an electric motor, which cleans a tub in a minute. It is estimated that the total capital employed in British coal mines is fully \$500,000,000, and that the present wages annually paid amount to \$300,000,000.

IS GOOD TO ENRICH THE BLOOD

DEOPLE who drink good beer with their meals can't be

aenemic-thin-blooded. Because beer, so drank, actually supplies the food elements that make the blood rich. Also beer assists the stomach in getting all the good possible out of all the food that enters it.

Put aside prejudice and learn just how good for almost every adult good beer really is.

In fact, he thinks | blinding fog. Truly the bottom of the

The old theories that mountains are due to the secular cooling and contraction of the globe must therefore be abandoned. The nountains are formed by the expulsion of lava from beneath the sea, and hence they Dr. See concludes by a mathematical inquiry that the age of our encrusted earth

is a much shorter time than geologists have Prof. See translates Aristotle's theory of earthquakes, which has never before been made accessible to English readers. Greeks all held that earthquakes were due to the agitation of vapors within the earth, which tended to escape and diffuse themselves in the atmosphere. Aristotle observ-

ed the eruption of a volcano and concluded

earthquakes were due to the same cause as

from the vapor noticed to escape that all

that producing eruptions. When Plato was 54 and at the head of the Academy in Athens and Aristotle was a boy 11 years old the Homoric city of Helike, on the southern shore of the Gulf of Corinth, was thrown down by an earthquake and overwhelmed by a seismic sea wave. The cause of the disaster perplexed the Athenian sages, and has remained one of the mysteries of the centuries. Now comes Prof. See, who shows that it was due simply to the expulsion of lava from beneath the Guif of Corinth, which thus made the sea bottom unstable, and when it gave way it also carried the shore on which Helike stood; indeed, the city was first devastated by the movement of lava beneath the crust and afterward subsided about one hundred feet,

only the tops of trees remained above the Besides the sinking of Helike, other cases of the subsidience of the land are mentioned. and in the concluding note attention is called to the elevation of the mountains and the sinking of the sea bottom now going on in lands, in the north Pacific.

SLEEP AND DEATH.

Neither Pain Nor Consciousness at the Instant of Either .

The phenomenon called sleep may be summed up in the following propositions, says a writer in the Cosmopolitan: First-Sleep is temporary death of the

ered under the three heads, natural death, Blemish Cure ever known. Sold by drug- likes to be called too sweet for anything. sudden death and death from disease. gists. Natural death is death from old age. It differs from natural sleep only in degree, The gradual loss of sensibility by the sensitive organs which precedes sleep now takes place in the vital system, and all the organs pass into permanent sleep together. There can be no pain preceding or at the moment of such a death, any more than there is pain preceding and at the moment of passing into

temporoary sleep. Sudden death may be defined as death due to a sudden injury from without or within the body sufficient to destroy at once all irritability of both the sensitive and vital systems. It requires no argument to prove that a person who is suddenly stricken dead can suffer no pain. The element of time must be present in order to suffer physical pain, and in the

sudden death of a person the element of We come now to consider the third and by far the most frequent form of death, namely, death from disease. As soon as disease is established dying begins, which is but a more rapid than natural ceasing of all sensibilities, accompanied with more or less suffering, according to the cause which produces it. This dying and suffering, called disease, must terminate either in so-called death. which is insensibility to it, or in recov-

ery, which is removal of the cause of it. But in any event the suffering has been endured, no matter whether the final termination is death or recovery. No one is conscious of nor can recall the moment he passes from waking into natural or temporary sleep. Nor shall we, by a "supreme agony," or in any other way, be conscious of passing into

permanent sleep. Being born and dying are the two most important physiological events in the life history of our bodies, and we shall know no more about the latter event at the time it occurs than we did about the former.

Prospects for Canadian Turkeys. Canadian Commercial agent at Leeds and Hull, Eng., writes: At the present mement there is every indication that Canadian turkeys will meet with fair demand on the British market this season. According to the opinions expressed by well informed dealers the unseason

able weather which has been experienced at different periods of the year in this country has seriously interfered with the rearing of all kinds of game. In certain parts of the country this is the case to such an extent that shooting on some large estates has had to be abandoned in consequence of the shortage of birds, the few that there are being required for breeding purposes. Local importers will rely largely this season upon Canadian supplies, and it rests with exporters in Canada to try to meet this deficiency and to assist them in ob-

taining the best market prices.

are it can't help it. This treatment also

In \$1.00, 73,000 Microbes.

(From Leslie's Weekly.) "Clean money" is the slogan of A. Cressy Morrison, who is endeavoring to reate a public sentiment which will are saved suffering-and mothers render impossible the circulation of paper and metal currency which is "tainted" in the literal sense of the word. He has had some bills and coins examined by a New York bacteriologist, and has found that one dirty bill, such as is handed you in change by your grocer or butcher, is inhabited by 73,000 bacteria. Coins are less populous, dirty pennies averaging twenty-six and dimes forty each. There is no means of tracing the history of this germ-laden currency; a bill may be in the pocket of a tuberculous sweat shop tailor to-day and in the dainty purse of a millionaire's wife to-morrow. The number of cases of mysterious illness due to this universal means of transmitting disease can only

THE above illustration fails to show the beauty of this Sugar Bowl and Cream Jug which we sell at \$5.00.

THEY are of ordinary size, and the plating is very durable—the finest that can be manufactured

A SPECIAL FINISH, which will not tarnish, is a special feature of this set. Our Catalogue will be sent upon
