The lowest birth-rate is possessed by France, the births only averaging 21 per 1,000 of the population, and when the fact that its death-rate is as high as 19.6 per 1,099 is considered, the small increase in the total population shown above is explained. Russia's slaughter of the innocents is a disgrace to civilization, white France offers a problem to political and social economists. Spain, Italy, Austria, Hungary and Japan all have birth-rates of over 32 per 1,000, but their death-rates are equally high, the lowest of the group being Japan, with a rate of - per ,000, and the highest Spain, with a rate of 25.8 per 1,000. The lowest deathrate is that of Denmark, where it stands at 13.9 per 1,000, and as the Danes have a birth-rate of 28.5 per 1,000, their position is an enviable one.
