

SUNDAY AT HOME

The Lord's Prayer.

The following beautiful composition was written in Charleston, South Carolina, during the war. It is printed on very heavy satin, and is bound in a beautiful cover. The price is \$1.00 per copy. Send for your copy today. The money sent you will be refunded if you do not like it.

Our Father, who art in Heaven, hallowed be Thy name, Thy kingdom come, Thy will be done on earth as it is in Heaven. Give us this day our daily bread, and forgive us our debts, as we forgive our debtors, and lead us not into temptation, but deliver us from the evil one. Amen.

Let us pray for the souls of the departed, and for the living, and for the whole world. Let us pray for the peace of the world, and for the unity of the Church. Let us pray for the souls of the departed, and for the living, and for the whole world.

Let us pray for the souls of the departed, and for the living, and for the whole world. Let us pray for the peace of the world, and for the unity of the Church. Let us pray for the souls of the departed, and for the living, and for the whole world.

Signalling on Railways. Several times during the past year or two Britain has been compelled to realize that even the perfection of organization of British railway service cannot totally eliminate the risk of disasters.

The sequence of accidents at Salisbury, Grantham, Shrewsbury, and Arbroath, though differing in time, place, and circumstance, had one striking feature in common. In each case the men on the foot plate ignored, or at any rate did not heed, the signals.

Practical safety is no other known substance which can be used as a wiper without leaving some of its particles attached to the thing wiped. This accounts for the continued use of bread dough in the watchmaking industry.

QUEER USE FOR BREAD.

Watchmakers Consume Many Loaves in Their Daily Work.

Perhaps the most novel use to which bread is put, says the American Food Journal, may be seen in the great factories of the Elgin National Watch Company, at Elgin, Ill., where more than forty loaves of fresh bread are required each day.

There is no secret regarding the use of bread in this factory, and I am writing to tell all I can concerning it. From the earliest times in the history of watchmaking there has been the custom of watchmakers to reduce fresh bread to the form of dough.

This is done by steaming and kneading the dough, and then rolling it out into thin sheets, which are then cut into small pieces as small as to be barely visible to the naked eye.

The oil is absorbed by this dough, and the pieces are then used as a wiper without leaving some of its particles attached to the thing wiped.

The Famous Pedestrian

"I was a martyr to catarrh of the head, throat and stomach. I was so bad the doctors feared consumption. I tried many physicians and medicines. A friend suggested Psychine. I tried it and it was the only thing ever did me any good. I am now perfectly well and have never known a day since when I have not been able to do my work."

Psychine is the greatest cure for catarrh of the head, throat or stomach in the world. It is a wonderful tonic and strengthener of run down system, acting directly on all the vital organs, restoring youthful vigor and strength to the system.

GREATEST OF PATENTEES.

Edison Holds the Record With One Thousand to His Credit.

The greatest patentee in this country—and that probably means the greatest in the world—is Thomas A. Edison. He has rolled up the enormous total of almost 1,000 patents and shows no inclination to quit.

Ask the patent office people who come next to Edison, says the New York Sun, and they will tell you that nobody is within hailing distance of the wizard. A good many men can count their patents, but the score, and as some of them are much younger than Edison, they may beat him out in time.

Up to the present, however, he deserves the title of the greatest American Patentee. That means a good deal, for it is undoubtedly a fact that an American will take out a patent on an invention with any other man or woman in the world.

As a consequence the Patent Office is piling up a swollen fortune which makes it a hoisted bonholder among the government departments. It has achieved a surplus of \$2,000,000 and is growing higher every day.

The Patent Office is growing the Patent Office with records and piling up models by the hundred thousand.
