

Every city contains a library. The largest library is to be found in the city of Jerusalem (the heavenly). The catalogue of this library would run up the books into the millions. Of the making of books there is no end; it is true here. What is a book? It is a cluster of depicted thoughts; pictures without words, thoughts put in cold type-a clumsy affair after all. A French philosopher said that language was given to man to obscure his ideas. It is certainly true that the half has not been told us-if, then, the remainders are so immense, what will the barvest be?

Men are books; men read books; it is surprising how accurate the appraise-

When nature dictates, the whole man speaks. All is uniform and consenting in voice, mien, motion, the turn of each feature and the cast of the eyes. But when art is the spokesman, and nature is not altogether suppressed, the turn of the eye may contradict the tongue, and the muscles of the face may counteract each other in their several workings. The proper study of mankind is man. Alas, we are students yet! We know in part, we gather scraps and fragments, the driftwood on our shore washed up by the tide gives us surprise. To-morrow we gather fresh harvest from the sea, but the ocean is uncap-

Men are ever on the lookout for mean ings. When the Master said, "Follow me," it was not a sound that struck the ear; it was a flood of meaning that absorbed the soul, and made the appea irresistible. Books wear out and burn up. Every scholar mourns the loss by fire of the great library in Alexandria in Egypt, centuries ago; but these books of which we speak are simply inde structible. This circulating library sweeps round the world; their line gone out to all the earth; their words to the end of the world. These books are self-recording, self-revealing, and yet they hide more than they reveal. God hides from all eyes the sight, a naked human heart. "How poor, how rich, how abject, how august. how compli cated, how wonderful is man!" In your thirst for knowledge do you extend your enquiry concerning these? Let Paul give the answer: They are the messengers of the churches; they are the glory of Christ.

It is assumed that the angels who are the bodyguard of the redeemed do not weep, but Lady Powerscourt ventures the surmise that when the library of tragedies is complete, these triumphant defenders may be permitted to share the grace of tears to add to the completeness of the universal whole,-H. ### The Blight of Islam. (By a Banker.)

The country on which is concentrated the supremest regard of all Christendom far surpassing in interest and fascination any other place in the whole world -the Holy Land-owing to the blighting effects of the effete rule of the Turk. in rough weather is practically shut out and isolated from the world. For the absence of any harbor, which any civiliz ed power, even the most unimportant, would long ago have provided, renders landing altogether impracticable except in fairly moderate weather.

And even then a landing at Jaffa (for merly Joppa) is an experience frequently, though happily not always, the reverse of agreeable. The steamer anchors some distance from the town, and is soon surrounded by Arab boats, one of which approaches the lowered stair-gangway as near as practicable. The passenger then descends the stairway and seats himself or herself-and woe be to her if she be stout and heavy-on the small grating at foot, his feet daugling over the surging billows. His arms are then seized by rises on the crest of a wave to within a few feet of the platform, drop him into the arms of two other swarthy Arabs, who, while he is suspended in mid-air violently clutch hold of his feet or legs. Down, down goes the boat in the trough of the sea, and down, down goes the passenger, who, gripped tightly by the Arabs, in a few moments is hurled, sprawling, into the bottom of the boat, amidst a number of exhausted and frightened ladies and gentlemen, some of the former trembling, and almost in hysteries, and all probably more or less sore with bruises and rough handling. The Arabs then with wild gesticulations and wilder still clamor and gutteral vociferations row off towards the shore, every row and then the surf breaking over the boat and drenching the occupants.

And then, the middle passage accomplished, what a thrill, almost of ecstasy, courses through the veins, as the traveller sets foot upon the shore and feels that he is on holy ground. His unpleasant experiences are forgotten; and as he journeys from place to place, hallowed by the presence, during His earth-life, of the Saviour of the world. he feels indeed that all that discomfort was as nothing compared with the pleasure of treading upon that sacred soil. Surely it is time that the Great Pow-

ers should peremptorily call upon this semi-civilized government to forthwith put an end to this disgraceful state of affairs, and construct a proper harbor. For here the Great Founder of our holy religion, having on our behalf left for a time His archangel-surrounded throne in the heaven of heavens, lived a life of penury and obloguy, and then, as our substitute, suffered the penalties we had incurred through our manifold transgressions, thereby blotting out the record on high against all and any who will prostrate themselves before Him and plead that great atonement.
