What the World's Biggest Users CREAM SEPARATORS Say About

LINCOLN, Nebraska, November 11, 1908 When we first began in the Creamery business we operated sever-al hundred skimming stations and had in use a large number of the various makes of power separators. Owing to the all-round su-periority of the De Laval Separators we found it necessary to replace all other makes with the De Laval and this proved one of the best investments that we ever made.

During the years 1901 and 1902 the hand Separators came into very general use and our thousands of patrons naturally looked to us for advice as to the most efficient and most durable separator for them to buy. Realizing the necessity of preventing, if possible, the sale of the so-called "just as good" and "cheap" separators we secured the agency of the De Laval. With the wonderful record back of the De Laval machine, together with the positive proof we could show by actual demonstration, we were able in a few years to sell from twenty five to thirty thousand of the De Laval Hand Cream Separators, and we are pleased to say that they have given universal satisfaction and are still in use, while most of the so-called "cheap" separators that a few of our patrons were foolish enough to buy have found their final resting place in the scrap pile. At the present time we are not agents for any hand cream separator, but for the future goed of our own business as well as the dairy industry, we are naturally anxious to see every dairyman who buys a hand separator buy the machine that will prove the best investment in the long run, and wide experience has taught us that when it comes to efficiency, durability and hard knocks the De Laval Hand Cream Separator easily stands in a class by itself.

PAIN

Pain in the head—pain anywhere, has its cause Pain is congestion, pain is blood pressure—nothing else usually. At least, so says Dr. Shoop, and to prove it he has created a little pink tablet. That tablet—called Dr. Shoop's Headache Tablet—coaxes blood pressure away from pain center. Its effect is charming, pleasingly delightful. Gently, though safely, it surely equalizes the blood cir ulation.

lation.

If you have a headache, it's blood pressure.

If it's painful periods with women, same cause.

If you are sleepless, restless, nervous, it's blood congestion—blood pressure. That surely is a certainty, for Dr. Shoop's Headache Tablets stop it in 20 minutes, and the tablets simply distribute the unnatural blood pressure.

Bruise your finger, and doesn't it get red, and swell, and pain you? Of course it does. It's congestion, blood pressure. You'll find it where puin is—always. It's simply Common Sense.

We sell at 25 cents, and cheerfully recommend
