much, since you have seen the poor man." He handed Aubrey an envelope directed to him in the handwriting of Loftus, tamiliar enough in spite of its irregularity and tremulous character. He placed it in his pocket, to read when he had a moment to himself. He listened to all else that was said, and then drew out the letter to read.

He was only slightly curious. He had no doubt that the note would have something to say about the papers in the packet; and the papers, he did not doubt, had something to do with some episode in the life of Sir Charles. He broke the seal, and read: "My Dear Aubrey .- I know I am dy-

They might wait, but something urged him to have the disagreeable duty done and disposed with. So he picked up the package and left the room with a lingerine glance at Lucie. Ah, Lucie! wake up, Lucie, or you may have done murder all in vain.

The house was quiet now. The members of the servant corps had shown their activity and solicitude, and that was enough. They were abed now. There was a light is the parlor, and Aubrey sat down by it and tore open the packet. The letters had evidently been carefully arranged; for they were folded and laid alternately, so that a letter in the handwriting of Hawkshurst came next one in a feminine hand which Aubrey had never seen before.

OXYGEN FOR ATHLETES.

An English physician tecturing before the London Institute on the use of oxygen in athletics said that athletes used up their oxygen faster than inhaling air could supply it. The beat of the heart and pulse was reduced and pressure raised after-inhaling oxygen. He had induced two runners to experiment, and they overran their own records after taking oxygen. He thought taking the gas before an athletic event would lead to record breaking.

All athletes are exhausting their they can replace it and their hearts are damaged for want of it. If they took oxygen before, during and after the game the heart, he said, would be restored and they would not suffer the ill effects of their exertions.

Many Social Reforms Outlined-Stock Exchange Hit.

London, May 3 .- Mr. David Lloyd-George's budget, which was presented to Commons to-day, doesn't affect the on a disposition on the part of the British Government to push the doctrine of State aid to limits hitherto considered outside the dominion of practical politics in this country. It is domestic in the world-wide importance in its legislative proposals. Mr. Lloyd-George's speech Plivery, and when he sat down, exh usted, there was a conspicuous absence of that cheering which usually rewards the great annual effort of the British Chancellor of the Exchequer, The House

sat silent. The budget proposals for Scheme was outlined by which the State will aid in the development of natural resources, and a definite proposal was

waste lands and the encouragement of small agricultural holdings. RECAST OF THE FISCAL SYSTEM The new taxacion, by which the esti mated deficit of nearly £16,000,000 is to be made good, is the most comprehensive east of the British fiscal system since the first free trade budget over sixty years ago. The Chancellor's proposal embody almost all the schemes which have been advanced in radical pro grammes for the past twenty years. The list includes a supertax on incomes of over £5,000, a tax on mining royalties, a tax on urban undeveloped land, a tax on ungotten minerals, a tax on the unearned increment in land, increased death duties, and a tax on stock exchange speculation. The whiskey duty is increased by one-third; the tobacco duty is increased eight pence per pound;
