## FOREST RESERVES.

Paper Read Before Canadian Forestry Association at Regina.

Prof. A. H. D. Ross, M. A., M. F., of the University of Toronto, in his paper dealt with the Dominion forest reserves. He showed that in 1906 the Parliament of Canada established 21 forest reserves. is a bare patch of fifty-five square miles, Six are in Manitoba, four in Saskatche- Mr. Ross points out that it would cost wan, three in Alberta and eight in the \$264,000 to plant this with nursery strip forty miles wide in British Colum- stock, so that it will be necessary to bia, known as the railway belt. These areas were set aside (1) To provide lum- Last year Mr. Knetchel tried the exber, fuel, ties, poles and other forest periment of placing tree seeds in the products required for the settlement of long grass and covering them with sand. the country and the development of its The experiment has so far been success-

experiment stations.

Irrigation is more essential for the strawberry than for any other member the barn can often be watered with hose believe that tile drains offer the best method. Distribute the water through the fields in pipes or troughs with small holes in them. A stopcock should be provided to shut off the water or turn it on at pleasure. The tile should be deep enough to escape the cultivator half feet below the surface. If water Lydia E. Pinkham's runs all the time you can block up the lower end when you wish to have it permeate the strawberry bed. Three-inch tile is about what you want. The straw- the last ten years of my life to Lydia berry is a great lover of water, and it not seldom happens that just as the crop is full of promise a few dry days ruin it. If watered by hand a hole should be made by the side of each plant, and not less than a full quart of water poured slowly in, until the ground is saturated; then brush dry dirt over the hole to retain the moisture and prevent caking of the soil. One such watering will last three or four days. Sprinkling a strawberry bed does more harm than good, unless repeated every few hours. This plan is altogether too serijob for a large bed, and I recommend that you be provided with underground tiles .- E. P. Powell in the Out-

ing Magazine for June. Probably on the Team. "Such ignorance is inexcusable!" exclaimed Aunt Hypatia. "My nephew Percival has been going to college nearly three years, and when I asked him this morning whether he knew anything

about Homer, he said: 'Sure! A homer

is a hit that's good for four bases!"" \_\_\_ THE FLAG. (Montreal Witness.)

Another way not to bring disrespect on one's flag is not to decorate a chariot with it and invade foreign cities. From that to riding down aged pedestrians that to riding down aged pedestrians and then running away there is only a like the following that the riding down aged pedestrians and then running away there is only a like the riding prostration.

Every such suffering woman owes it to here in my frunt lawn, herself to give Lydia E. Pinkham's herself to give Lydia E. Pinkham's herself to give Lydia E. Pinkham's law, and the riding down aged pedestrians and then running away there is only a like the riding woman owes it to like here in my frunt lawn.

If you would like special advice like here in my frunt lawn.

carebutgotnorelief. My husband persuaded me to try Lydia E. Pinkham's Vegetable Compound and it worked and misery. I advise all suffering

pound, made from native roots and herbs, contains no narcotics or harmful drugs, and to-day holds the record for the largest number of actual cures of female diseases of any similar medicine in the country, and thousands of voluntary testimonials are on file in the Pinkham laboratory at Lynn, Mass., from women who have been cured from almost every form of female complaints, inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration. I'll trot out the ole cow;
