Would it be life or death for Little Gay only the white angels watching the terrible scene from the star-gemmed sky overhead could have foretold what her fate

She was so young, so fair to meet such The train was twenty minutes late-the

watching covertly out of the corners of his eyes the engineer, Jim Hale, who stands just as he has stood ever since the train left the depot, gazing thoughtfully out of the window, with his hand on the lever, while the train, puffing and pant-ing, dashes on through the darkness of the night.

"I hope you're not thinking yet of that nonsense we were talking about when the train started," said the fireman, throwing down his shovel with a hearty laugh and crossing over to the window where the engineer, Jim Hale, stood in the same thoughtful position.

You're the most superstitious man I ever saw," he went on. You see we are almost at Hackensack, where you and I change off to-night, yet nothing has happened," he added triumphantly.
No answering smile broke the gravity of the engineer's swarthy face.
"We are not there yet," he answered gloomily, "and I sha'n't breathe freely until we slack up at the Hackensack De pot. I've been running on the road nigh onto twenty years now, and we old railroaders know what signs mean when we sheep leap across the track before he

sheltered me in my hour of need. I am sturdy frame; although he laughed and ridiculed the idea stoutly, somehow the solemn words of the engineer impressed her ups for trying to prevent it if I live and brought me here. Tell them this for ing sort o' down in the mouth," went on

Washing Clothes.

Air, sunshine, water and soap may be said to be essential's to successful laundering. The best results are obtained if these four agencies are generously employed. Water dissolves the dirt and carries it from the clothes; hence a generous use of water is very desirable in the cleaning of clothes. Soft water is best, but if this is not available "hard water" which has been softened by adding to it an alkali-washing soda, lye, borax or ammonia-may be used. Care should be taken in the use of alkalies, as the addition of too much will weaken the fabric and injure the hands. The amount to be used. depends upon the degree of "hardness" of the water, and no hard and fast rule can be followed. Before beginning to wash, sort the clothes in the following order:

Table linen and clean towels, bed linen, body linen, handkerchiefs (these should be soaked, washed hard day's work-A Refresh- and boiled separately if used by those having colds), soiled towels and clothes, stockings, colored clothes, woolens.

A good plan is to soak the clothes overnight. To do this, wet the garment to be soaked, rub the soiled part with soap or soap solution and fold that part in. Fold and roll each garment separately. It is well to put the less soiled clothes in one tub and those which are much soiled into another tub. Cover the clothes with warm soapy water. Do not soak stockings, colored clothes or

woolens. The next morning proceed as fol-
