Scotch Sun Dial. Record is contained in the Bible of a sun-dial set up in 771 B. C. by Ahaz to commemorate the miraculous healing of his son Hezekiah. A very ancient one was recently discovered lying in the grounds of the ruined castle of Finlarig, Killin, Perthshire, Scotland, the ancient seat of the Breadalbanes. Unlike most dials, it has twelve planes for recording the hours and two circular planes for use in summer and winter respectively. For many centuries the occupants of the castle deciphered its many angles as it stood reared on a tall pedestal, reflected in the waters of a fountain. The interval of nearly 2,000 years

> learned the art of shipbuilding. In a little museum of this place there are shown many models of windmills, among which is that of the first windmill erected in Zaandam. It stood in the water, and when it was desired to turn the sails toward the wind the miller was obliged to get into his boat and. taking a line, tow the whole structure around until it was in a working position again. Later on the mill was set on a post and the whole turned about this as an axis, in the same manner that one revolves bookshelves. Then another method was devised. The entire edifice was turned about from the bottom like a monitor's turret. Finally, the comparatively modern type was adopted, that of a cap holding the axle and sails with a cog wheel and spindle inside and easily moved from below by a handwheel windlass to secure the proper

frontage at will. The Lord of Woerst and the Over Ijssel Monastery were parties to a suit involving the question as to who owned the wind and enjoyed the right to employ it. The old feudal master asserted that Boreas and all the puffings of his cheeks that frisked over the country were his. The Bishop of Utrecht, to whom the suit was referred, de-
