DOES IT BODE WAR?

France and Germany Adding Recruits to Their Armies.

A despatch from Cologne, Ger many, says: The new German military bill will add 84,000 recruits to the annual contingent called up for service in the army, according to the well-informed Volks Zeitung. The total strength of the peace footing of the army will thus be increased by 168,000 men, bringing it up to 806,000, excluding officers. A despatch from Paris says: The

French Cabinet has accepted the decision of the Supreme Council of War, which pronounced on Tuesday | Watt. in favor of a three years' term of service in all branches of the army instead of two years, as hitherto, and the bill will be submitted to the Chamber of Deputies, The measure will add 210,000 men at the lowest estimate to the peace footing of the army, which at present stands at 578,783, excluding officers.

stated but in view of the doubt they think it is unfortunate that so much publicity has been given the matter until all possibility of disappaintment to sufferers had passed. That a distinct advance in the treatment of tuberculosis has been made they consider possible, but that anything like a "cure all" has been discovered seems to them incredible.

Eager Suffragettes.

The Toronto Suffragettes who went to

Washington have returned well pleased with their expedition. The Suffragettes, as a rule, are very sensitive of criticism of their actions, but this has not prevented certain persons of both sexes from asking what was to be gained by such a faunt. The region of these evities

jaunt. The point of view of these critics is that the Canadian participation in the

Washington parade was as much out of place as would be the participation in an Ottawa parade of Canadian Suffragettes seeking to influence the Dominion Parlia-

ment, by a contingent of United States women. The Toronto contingent could not help but impress the eye. They wore red hats, long white trailing gowns with a

big red eash bearing the word "Canada," and carried Union Jacks. The delegation

included about a dozen of the most active agitators in Toronto, including Mrs. Flora Macdonald Denison, President of the Canadian Suffrage Association; Dr. Augusta Stowe-Gullen, past president; Dr. Margaret Johnston, Mrs. Campbell Mac-Ivor, who alone of Toronto's suffragettes

believes in militant methods; Mrs. Hec-

tor Prenter, the very active Secretary of the Association; Mrs. L. A. Hamilton, President of the Equal Franchise League and a very active social worker, and Mrs. E. L. Campbell, President of the Beaches' Progress Club. All of these are ladies of

ripe experience in women's movements, and none belongs to the type one would

expect to be carried away by any vision-ary project. The enthusiastic Mrs. Ham-

ilton proposes to organize a parade in Toronto next.

Cabinet Ministers Lend a Hand.

The Toronto Exhibition Association has

only one meeting a year, but it manages to throw around that gathering some of

the glamor of national importance which it secures for the Big Show itself. For

example, at the annual meeting this year

no less than three Cabinet Ministers were

in attendance. There was the Honorable James Duff, who from his position as Min-

ister of Agriculture takes a keen interest in all exhibitions, and who is an enthusi-

The Farmer and the Public-The Tuberculosis Cure-Suffragettes Visit Washington-Toronto's Big Show.

City people, not infrequently, are heard to declare that farmers are getting rich, that the present high cost of living must be resulting in a situation in which the Lieut. Ninnis Disappeared In an Unfathomable Cre-Minister of Agriculture for the Province of Ontario and now Advisory Expert for the Dominion Department of Agriculture, in his address to the Canadian Club. "I want to tell you," he said emphati-cally, "that the farmer is not getting too much." In illustration he quoted the fact that a bag of potatoes which costs 90c., \$1.00 or \$1.25 in Toronto, yields to the far-mer who grows them, probably in Carleton County, New Brunswick, not more than 30c., and the milk which sells in Toronto for 10c. a quart yields the farmer probably only 41-2c. a quart. "The farmer who gets 41-2c. a quart is not getting too much," he said, "but the city man who pays 10c. a quart is paying too much." Mr. James maintained that though, he said, there was no use calling was simply working under conditions as they exist and earning an honest living. Mr. James was discussing the cost of 250 city men he was addressing. They were vitally interested, because, as Mr. have reached such a pass that for the classes of the community on fixed salaries, and this means the great body of

ICE TWO FEET THICK.

Conditions of Lakes and Rivers at the Present Time.

A despatch from Sarnia says: According to reports received at this port, the ice conditions in the lakes are as follows: In Lake Superior there is ice west of Whitefish Point and at Duluth for about twenty-five miles off shore. St. Mary's River is frozen over entirely, while in the Mackenzie Straits the ice is solid and about two feet thick. In Lake Huron many icefields are floating about, but are not very thick. The St. Clair River is frozen solid from Sarnia to the mouth. Lake St. Clair is frozen over about fourteen inches thick. The lower Detroit is filled with ice, while Lake Erie has many floating floes of small thick-

SUN TO SUPERSEDE OIL.

Expert Also Obtained Power From the Moon.

A despatch from London, England, says: A prediction that the sun's rays will one day supersede coal oil as a source of mechanical power was made by the American inventor, Frank Shuman, at the London meeting of the Sun Power Company, which was formed some time ago with an authorized capital of £300,000 to work his sunpower pumping plant. Shuman stated that after the initial cost the maintenance of a sun-power plant was practically negligible. He added that the power can be so stored as to be available throughout the year. Professor C. V. Boys, the eompany's consulting advisory expert, mentioned incidentally that he had been able to obtain power from the moon's rays.

SAFE INVESTMENT

The National Securities Corporation, Limited, now offer to the public their 7% Profit Sharing Bonds, which mature in five years, with interest payable half-yearly on the 1st of June and the 1st of December.

The National Securities Corporation, Limited, acts as a holding company for several large and profitable manufacturing plants that have been built up by members of the Corporation in the past quarter of a century. The proceeds of these bonds are to be used in still further developing these plants-in acquiring another long established manufacturing plant which has shown large profits for years—and in purchasing well located timber lands. The Corporation now has a large limit under option containing 1,000,000,000 feet of virgin timber. This latter should largely increase in value in the next few years.

All profits beyond bond interest and stock dividends are to be divided equally between the Bondholders and the Shareholders, and whatever profits are thus divided will be in excess of the 7% annual interest on the Bond.

These Bonds are amply secured by investments of the Corporation in these manufacturing plants and in the value of lands, timber and mills which it controls, and will be further secured by the acquisition of other plants and timber limits.

The Bonds are offered to the public in denominations of \$100, \$500 and \$1,000, and may be purchased either outright or by means of the periodic payment plan. In the latter case, an initial payment of 10% of the face value of the Bond will be required. Bondholders may withdraw all or part of their investments, with interest, at any time after one year on sixty days notice.

Payments should be made to the National Securities Corporation, Limited, either by cheque or money-order.
