Broke Into Sore. Itched and Burned So Badly Could Scarcely Sleep. Red and Inflamed. Cuticura Soap and Ointment Entirely Cured.

217 Greenwood Ave., Toronto, Ontario.-"My trouble was varicose veins above my ankle. It broke into a sore which was painful. The sore itched and burned so badly that I could scarcely sleep. The skin around it was red and inflamed. I could not wear a shoe for eight weeks. I tried several ointments but they didn't seem to do it any good. Then I was recommended to use Cuticura Soap and Ointment. I bathed with the Cuticura Soap and put a little Cuticura Ointment on and they gave the greatest relief. In a few weeks the sore was entirely cured." (Signed) Mrs. MacGregor, Feb. 21, 1912,

SALT RHEUM ON BABY'S HEAD

Woodstock, Yarmouth Co., N. S .- "My baby was about three weeks old when he had salt rheum on his head and forehead. It began in a little fine rash, which came on his head and down over his forehead and formed a hard, brown crust. It looked terrible, and it must have bothered him quite a lot, as he would not sleep. I used to wash him with the Cutleura Soap and hot water and put the Cuticura Ointment on, and in three weeks his head and forehead were clear. I can't speak too highly of the Cuticura Ointment and Cuticura Soap." (Signed) Mrs. George B. Allen. Nov. 18, 1911.

Cuticura Soap and Cuticura Ointment are sold by druggists and dealers everywhere. A single set is often sufficient. Liberal sample of each mailed free, with 32-p. Skin Book. Address post card Potter Drug & Chem. Corp., Dept. 54D, Boston, U, S. A.

MODERN WARFARE WOUNDS. IN THE SPRING of 565 Shot in the Greek Army Not Many Supernatural Appearances to

Long-Range Forecasting.

Long-range weather forecasting, so long discredited by scientific men, appears to be gaining respectability, little by little, with the progress of meteorology, says the Scientific American. The last annual report of the Dutch East Indian meteorological service mentions the fact that forecasts of the strength and weather characteristics of the easterly monsoon are now issued at Batavia each April. Official monsoon forecasts have been regularly made in British India for many years. In the United States Weather Bureau, Sunday forecasts for a week in advance have become an established institution. Of course in all these cases the forecasts deal with only the broader features of the weather over wide areas.

She Caught It.

Sarah, the new maid, was unused to city ways. One day soon after her arrival her mistress noticed a pail hanging from the gas bracket in the hall. Suspecting the country girl, she called Sarah and asked what it all meant.

"Well, you see, ma'am," replied Sarah, "the master said the gas was leaking, so I put up the pail to catch it."

INFLUENCE OF FOOD ON HAIR

When He Stopped Eating Buds. Clothing has had little to do with man's loss of the hairy covering, as appears from a comparison of clothed and unclothed men in the same latitude.

Hair is a horny growth, just like feathers, wool, nails, hoofs, claws and horns, requiring silicious earth for its formation. All animals with great horn development feed upon food rich in silicates, especially grass-for example, horned cattle, deer, elephants, who have not only great tusks, but bony hides. Birds, which require a large amount of ISSUE 15 -'13. sand and gravel. The wonderful

digestive power of the fowl's gizzard is well known. Italian investigators have found massive glass balls crushed to powder in the gizzards of fowls. Spallanzani experimented with a turkey-cock, feeding him twelve sharp steel points in an electuary, or cake, and he found, after 18 hours, when he opened the gizzard, that the little blades were

broken up and not one had even

scraped the interior of the gizzard.

Since it is plain that food rich in

silicates produces horny growth of all kinds, whether feathers or hair, it is plain that food which is poor in silicates tends to reduce the formation of horny substance in animal or man, - thus reducing the strength of the bones, causing rickets, and in hens, causing them to lay eggs with leathery shells. That in sheep a change of diet produces loss in growth of wool has been poli to Fessan, where after two find the luxuriant grass to which they had been accustomed, for in and. Ben Johnson spent the "My muscles would cramp.
