COMMENT ON EVENTS

The passing of another Dominion Day has aroused some discussion as to whether has aroused some discussion as to whether Canadians as a whole are really treating Canada's natal day quite fairly. In most places it is about the quietest holiday of the year. It is sandwiched between the 24th of May, which continues to be universally observed, and the August civic holidays which towns and cities celebrate. Scarcely anywhere is it made an occasion for a patriotic celebration, and its treatment is in marked contrast to the American's manner of demonstrating on the Fourth of July.

The reason cannot lie in any another

The reason cannot lie in any apathy on the part of Canadians toward their native land. Perhaps it lies partly in the season of the year. The first of July finds that portion of the population which takes summer holidays either preparing to flit or flitting or settling down. And it finds the rural population entering on its busiest season. Another explanation Manitoba Oats—No. 2 C. W. oats, 39c to 40c, track, bay ports; No. 3 C. W., 37c to 38c; No. 1 feed, 37c to 38c.

Corn—American, No. 2 yellow, 62 3-4c; No. 3 yellow, 61 3-4c, track, bay ports.

Rye—No. 2, 60c to 62c, nominal.

Rye—No. 2, 90c to 95c car lote, outside.

Buckwheat—No. 2, 52c to 53c.

Barley—Good malting barley, outside, 52c to 53c.

Rolled Oats—Per bag of 90 pounds, \$2.15;

The fact that men and newspapers are

The fact that men and newspapers are discussing the matter is a sign that a change is possible.

The U. S. Tariff. Interest in the progress of the Demo-cratic Tariff Bill at Washington has been revived by the turn of recent developments. In the original draft of the bill provision was made for substantial reduction in various raw food products such as live stock and wheat, but they were not placed on the free list, the amount of duty remaining being, it was claimed, sufficient to provide the American farmer with ample protection, and to prevent the measure from being much good to the Canadian farmer. Finished food products such as meats and flour were on ducts such as meats and flour were on the canadian farmer. Finished food products such as meats and flour were on the canadian farmer. Finished food products such as meats and flour were on the canadian farmer. Finished food products such as meats and flour were on the canadian farmer.
