

# HOW TO TREAT ALL SKIN TROUBLE

Greasy Ointments No Use—Must Be Cured Through the Blood.

How to Treat All Skin Trouble.

It is not a good thing for people with a tendency to have pimples and a blotchy complexion to smear themselves with greasy ointments. In fact they couldn't do anything worse, because the grease clogs the pores of the skin, making the disease worse. When there is an irritating rash a soothing boracic wash may help allay the pain or itching, but of course it doesn't cure the trouble. Skin complaints arise from an impure condition of the blood, and will persist until the blood is purified. Dr. Williams' Pink Pills have cured many cases of eczema and skin diseases because they make new, rich blood that drives out the impurities, clears the skin and imparts a glow of health. The following proof is offered. Mrs. Fred Tremble, Gunter, Ont., says: "For more than a year I was steadily afflicted with salt rheum or eczema. My hands were so sore that I could not put them in water without the skin cracking open. I tried all sorts of ointments recommended for the trouble, but they did not do me a particle of good. I was told Dr. Williams' Pink Pills would cure the trouble, and began taking them. I took the Pills steadily for six or eight weeks and they completely cured the trouble. This was several years ago and I have never been bothered with it since."

Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

One Was Enough.

Robert Bridges, the new poet laureate, is a fastidious critic, and hence sees little to admire in the commonplace verses of Alfred Noyes.

Noyes once brought to Mr. Bridges two very long odes that he proposed to submit to the English Review.

"I'll read them both aloud," the young man said, "and afterward you will tell me which is, in your

opinion, the more likely to be accepted by the English Review."

Poor Mr. Bridges sighed and settled himself in his chair, and Noyes, in his loud, harsh voice, read the first ode. It was very long, and at its conclusion Mr. Bridges leaped to his feet and said briskly:

"Now, my young friend, I can advise you. Send the other ode to the Review."

The Singer.

The caller—Who is that singing? The hostess—That's our new maid. She always sings at her work.

The caller—What a happy disposition. Mercy, how loud she sings. The hostess—Yes. When she sings loud she's breaking something.

The Canadian Statistics.

The cases cited above are all American, statistics pertaining to the Canadian ships being practically unobtainable, as none of our steamship companies are connected with the Great Lakes Protective Association. The serious accidents on this side, however, have been confined to the grounding of the Merchants Mutual Line steamer Pellatt in the St. Lawrence River and the Wexford, of the Western Steamship Company, which is now lying in Collingwood dry-dock undergoing repairs to the damages sustained a couple of weeks ago, when she stranded on the rocks in the Sault Ste. Marie River.

Love Made Him Light.

Ian Maclaren tells a sweet story of his native Scotland. While sauntering along a country lane one hot afternoon he met a bonnie wee lassie who was very red in the face from the heat, and who breathed heavily under the burden of the chubby youngster she carried in her arms.

"Isn't he too heavy for you?" inquired the kindly and sympathetic minister.

"He's no' hivvy, sir," came the reply, with a smile of loving pride, "he's ma brither!"

At The Telephone.

"Was that your sister calling you up?"

"No; it was my wife calling me down."

# MISHAPS ON GREAT LAKES

THERE ARE LESS ACCIDENTS THE LAST TWO YEARS.

Investigations Are Followed Up—Aids to Navigation Improved.

Have the number of accidents on the Great Lakes been increasing during the past couple of years in a manner commensurate with the enormous development of lake steamship traffic?

Steamship managers give an emphatic "No" to this question, and quote many and divers grounds for their contention, except that which is usually conclusive proof—figures. These they will not divulge: "It would bring the facts home to the underwriters in too forcible a manner," they point out.

It is well known amongst marine men, however, that despite the manner in which the tonnage on both the Canadian and American sides of the Lakes has been growing during the past decade the number of accidents has not only failed to increase proportionately, but has been on the downward trend.

Some Reasons.

Steamship men attribute this to several things. In the first place, they state, the authorities have abandoned the old practice of dropping the investigations resultant to accidents unless definite conclusions have been arrived at within a ridiculously short time. Nowadays the matter is kept before the board of investigation until the blame is attached to some party.

Again, they point out, the men in whose hands the traffic of the lakes is placed are much more competent—certificates of competency and good character are no longer peddled around the streets and granted to the feelings of ship masters once; they are no longer spared when there is any possibility of holding them to account for negligence. And last, but not least, the aids to navigation are becoming perfected to such an extent as to make accidents, if not absolutely impossible, easily avoidable, if even a moderate amount of discretion and foresight is exercised.

Small Number of Accidents.

Last season (1912) the number of accidents on the Inland Seas was small, so small, in fact, as to create considerable comment in marine circles the world over. This year the traffic has been even heavier, and yet the monetary loss following wrecks, groundings, explosions on board ship, resultant defective machinery and collisions has been to date, even less. The season is now over half over, and yet only two total losses have occurred, both amounting to only about \$70,000. The steamer Peck, which was a total loss as the result of an explosion in her boilers in Milwaukee harbor, and the barge Crewe, which was declared a total loss as the result of damage sustained in collision with the steamer F. B. Squire, were both old vessels and were valued at \$40,000 and \$25,000 respectively. The former was insured at \$39,000.

Damage to Bottoms.

Damage to bottoms, apparently, has been the main item of expense this season, about the most serious accident of this nature being that of the steamer D. B. Meacham, which totalled in the neighborhood of \$17,000. The Meacham touched in the new Livingstone Channel at the foot of the Detroit River.

A number of uninsured ships have met with similar accidents, but none of these has been as expensive as the Meacham. Comparatively few insurance companies are underwritten risks have had comparatively little work for the shipbuilders.

Among the recent big cases was the steamer Lehigh, which, besides carrying away a couple of lock gates in the Welland Canal and creating considerable expense for the Canadian Government, was damaged in a series of accidents in the St. Lawrence River. At the present time she is having some forty new plates riveted on at Ashtabula, Ohio.

No Canadian Statistics.

The cases cited above are all American, statistics pertaining to the Canadian ships being practically unobtainable, as none of our steamship companies are connected with the Great Lakes Protective Association. The serious accidents on this side, however, have been confined to the grounding of the Merchants Mutual Line steamer Pellatt in the St. Lawrence River and the Wexford, of the Western Steamship Company, which is now lying in Collingwood dry-dock undergoing repairs to the damages sustained a couple of weeks ago, when she stranded on the rocks in the Sault Ste. Marie River.

Love Made Him Light.

Ian Maclaren tells a sweet story of his native Scotland. While sauntering along a country lane one hot afternoon he met a bonnie wee lassie who was very red in the face from the heat, and who breathed heavily under the burden of the chubby youngster she carried in her arms.

"Isn't he too heavy for you?" inquired the kindly and sympathetic minister.

"He's no' hivvy, sir," came the reply, with a smile of loving pride, "he's ma brither!"

"No; it was my wife calling me down."

# Arc You Droopy, Tired, Worn Out?

Here Is Good Advice to All Who Feel as If Their Vigor and Life Had All Oozed Away.

This Condition Can Be Quickly Cured by a Good Cleansing Medicine.

Your experience is probably somewhat similar to that described by Mr. J. T. Fleming in the following letter from his home in Lebanon: "I think I must have the most sluggish sort of a liver. In the morning my mouth was bitter, and that foul, soft feeling that tells you, 'No breakfast needed here this morning.' A cup of coffee would set of brose me up, but in two hours I was disposed to quit work, all energy having oozed out of me. Supper was my only good meal, but I guess I didn't digest very well, for I dreamt to be the band. A friend of mine put me wise to Dr. Hamilton's Pills. I think they must have taken hold of my liver, perhaps my stomach, too, because at the very start they made things go right. Look at me now—not sleepy in the daytime, but hustling for the mighty dollar and getting fun out of life every minute. That's what Dr. Hamilton's Pills have done for me—they have re-built and rejuvenated my entire system."

To keep free from headaches, to feel young and bright, to enjoy your meals, to sleep sound and look your best, nothing can help like Dr. Hamilton's Pills, 25c per box. For sale at all drug stores and stockholders or postpaid from The Cattaraugus Co., Buffalo, N.Y., and Kingston, Canada.

Preocious Talent.

Tommy was fourteen, and Tommy's father and mother—both serious people—had decided that it was time to fix on a profession for him.

Accordingly Tommy was led to a room in which were a knife, an apple, a fat theological book, and some small change.

His fond parents had decided to leave him alone with this assortment to discover which he liked the best. If the book took his fancy, they intended to make a clergyman of him; if the knife, a surgeon; if the apple, a farmer; and if he chose the money, he was to go into a bank.

At the end of half an hour the mother went to the room, but returned immediately in tears.

"What's the matter, dear?" asked papa anxiously.

"It's no good!" she sobbed. "Tommy is sitting on the book, with the knife in his hand. He—he's eating the apple, and the money is in his p-pocket!"

"Good!" said the father. "That settles it! He's evidently cut out for a lawyer!"

The Virtue of the Lead Packet.

The last process tea undergoes at the gardens is firing, to exhaust all moisture, as moisture is fatal to quality. The tea is then much drier than the air. It is then quickly placed in the airtight lead packets, or lead-lined chests, which are soldered up and made airtight.

When chests of tea come into the possession of some dealers, they, unthinkingly, cut the lead open and leave the tea exposed to the moist air for weeks, while all the time it is fast decaying. Remember, tea, however preserved, decays with age, but it will lose more in a week exposed to the air than in six months in a lead packet.

This is why "SALADA" tea is sold only in sealed lead packets: its native purity and garden freshness are perfectly preserved.

A Point of Resemblance.

A well-known violinist adversely criticized his own portrait, which had been painted by a celebrated artist. The family had agreed upon this harsh verdict without a dissenting voice, until the artist appealed to the youngest of the household, a bright little boy.

"Who is this 'Dack'?" he asked, pointing to the picture. "Papa," was the immediate answer. "So it is, my dear. 'You see, sir, your son is a better judge of the likeness than you. So you think you'd know it was papa, my boy!'" "Oh, yes, sir," was the innocent reply. "It's very much like him about the fiddle."

Made Up.

The teacher meant to convey a profound lesson. "You must forgive your enemies, boys," she said, "and then your enemies will forgive you. I want you all to try it."

The next morning Johnny Jones came to school with a very black eye.

"Why, Johnny, what's the matter?"

"Aw," replied Johnny. "I've been forgivin' Scrapy Gren, an' makin' him forgive me."

Minard's Liniment Cures Dandruff.

Unfreezable.

"Can anyone name a liquid that doesn't freeze?" asked the teacher. There was a moment's silence. Then a voice in the rear of the room answered, eagerly, "Please, teacher, hot water!"

Love Made Him Light.

Ian Maclaren tells a sweet story of his native Scotland. While sauntering along a country lane one hot afternoon he met a bonnie wee lassie who was very red in the face from the heat, and who breathed heavily under the burden of the chubby youngster she carried in her arms.

"Isn't he too heavy for you?" inquired the kindly and sympathetic minister.

"He's no' hivvy, sir," came the reply, with a smile of loving pride, "he's ma brither!"

"Was that your sister calling you up?"

"No; it was my wife calling me down."

# SCALES, DANDRUFF AND ITCHING

Head so Itchy Could Hardly Stand It. Dandruff Showed on Coat Collar, Cuticura Soap and Ointment Cured in One Month.

223 Elizabeth St., Montreal, Que.—"Cuticura Soap and Ointment cured me permanently from dandruff and scalp itch that I was suffering with since over a year. I had an inflammation of the lungs and a very strong fever. When I recovered, my head was covered with scales and dandruff, and so bad that I could hardly stand it. The dandruff showed on my coat collar. I had used various medicines without relief. I heard of Cuticura Soap and Ointment and decided to try them and I am very glad to say I am perfectly cured. I used two boxes of Cuticura Ointment with the Cuticura Soap. It took one month to cure me. I take pleasure in recommending Cuticura Soap and Ointment to anyone who is suffering with scalp or skin diseases." (Signed) Hector Perras, Dec. 30, 1911.

To Remove Dandruff.

Prevent falling hair, remove crusts and scales, and allay itching and irritation of the scalp, freckles and eruptions which tend to make it dry, thin, and lifeless, often leading to premature greyness and loss of hair. Cuticura Soap and Ointment are sold by druggists and dealers throughout the world. Liberal sample of each mailed free, with 32-p. Skin Book. Address post card, Potter Drug & Chem. Corp., Dept. 46D, Boston, U.S.A.

ROYAL FEATURES.

Characteristic Looks of Some Famous Houses.

King Ferdinand of Bulgaria is a Bourbon, and even those who might not be aware of his family connections and yet were very familiar with the characteristic features of the House of Hapsburg, could scarcely fail to connect him with it the moment they set eyes upon him.

All the Bourbons, practically without exception, have inherited the bony aquiline nose of their great ancestor, Henry IV. of France and Navarre. The most familiar example of this nose, so far as British people are concerned, is possessed by that popular young ruler, the King of Spain.

Our own Royal family have the "Guelph eyes." It is not too much to say that if only the eyes of photographs of our late beloved King Edward, his own son, King George, and his brother, the Duke of Connaught, were visible, ninety-nine people out of every hundred would recognize to whom they belonged. It is a large protruding eye, like all Queen Victoria's descendants possess it. The King and the Prince of Wales have it in a marked degree, and it is very noticeable also in the German Emperor.

Everybody knows the Cavendish lip, and the remarkable way in which it has persisted through many generations, but it may not be as generally known that the House of Hapsburg, the head of the Austrian Empire, has a similar feature.

It is a protrusion and enlargement of the lower lip which, though highly characteristic, is far from graceful. It is a remarkable fact that the young King of Spain, already mentioned, not only has the Bourbon nose, but he has also the Hapsburg lip, derived from his mother, Queen Christina, who was a member of the Austrian royal family.

No More Neuralgia; Headache Cured.

A Journalist Tells of the Advantages of Keeping Nerviline Handy on the Shelf.

Fifty years ago Nerviline was used from coast to coast, and in thousands of homes this trusted liniment served the entire family, cured all their minor ills and kept the doctor's bill small. Today Nerviline still holds first rank in Canada among pain-relieving remedies—scarcely a home you can find that doesn't use it.

From Port Hope, Ont. Mr. W. T. Greenaway, of the Guide newspaper staff, writes: "For twenty years we have used Nerviline in our home, and not for the world would we be without it. As a remedy for all pain, earache, toothache, cramps, headache, and disordered stomach, I know of no preparation so useful and quick to relieve as Nerviline."

Let every mother give Nerviline a trial; it's good for children, good for old folks—you can rub it on as a liniment or take it internally.

Whenever there is pain, Nerviline will cure it. Refuse anything but Nerviline. Large family bottles, 50c; trial size, 25c, at all dealers, or The Cattaraugus Co., Buffalo, N.Y., and Kingston, Ont.

No Wonder He Balked.

A youthful stoker was brought before the commanding officer of the Devenport naval barracks. The charge was insubordination, says an English paper; he had refused to enter the swimming bath. When he was asked what he had to say for himself, the youth replied:

"Sir, I've only been in the navy three days. The first day the doctor drew me out of my teeth; the second day I was vaccinated, and the third day the potty officer says, 'Come along; we're a-goin' to drown yer!'"

It is to be hoped that his punishment was not severe.

Dobbins: "I say, old fellow, you are getting thin since you retired from business." Tobbins (ex-shoemaker): "That's right. You see, I don't weigh as much as I did."

Customer: "I must say, waiter, this is the first time I've ever had a really tender steak here." Waiter (aghast): "Good gracious, I must have given you the proprietor's portion!"

# NEW DETECTIVE METHODS.

Criminals Are Now Divided Into Various Classes.

The new system of detecting criminals is based upon the facts that the criminal class is composed of many classes and sub-classes, and that each sub-class is composed at last of individual human beings each with a distinct and distinguishable individuality of his own, says the London Times. The criminal is an artist in his own department and stamps his individuality on his crime.

It is likely, it is easy to show that certain crimes of widely different nature never are and never could be committed by the same criminal. The tramp who snatches linen from a hedge, or the area sneak who steals the milk cans, could not be a fraudulent trustee or company promoter, nor could the fraudulent trustee pick a pocket, nor would he steal the milk cans, nor could he be a criminal of any other kind. The truth is, manifest enough in the case of crimes so different, but is still true of crimes much more alike. The mumping sailor with his false tale of shipwreck could not change places with the bogus parson or doctor with his false tale of having been robbed or lost his purse. The welcher and the race-course thief both carry on their operations on the turf, but they never exchange parts; the man who passes base coin does not pass flash banknotes; the railway thief is not an hotel thief, and vice versa.

WHY YOUNGSTERS HIDE.

Game of Hide-and-Seek Is An Inborn Characteristic.

Not only in the home of the duke, but in the home of the workman, you will fail to find a more popular game with the children than hide-and-seek.

Two of the first words baby lips learn to lip are "peep bo." Then when the kiddies can toddle over to the earliest games they play is hide-and-seek. And don't they just love it! The little brain in its excitement is working at its highest pressure. And the shouts of wild glee when the quarry is found; to hear them makes your own heart beat faster—particularly if the players are your own little ones.

Scientists and doctors explain the popularity of hide-and-seek by the theory that hiding and seeking are two of the inborn characteristics of every human being. We get the habit from our savage ancestors. Then, the predatory habits of the people led women and children to hide from strangers in fear of their lives.

Hide-and-seek is mimic war. Scoutcraft for boys has developed it on scientific lines. So the next time you see your kiddies playing hide-and-seek reflect that it is the outward and visible sign of an instinct which has dwelt for countless centuries in human beings.

Tight Money Pinching Many.

Thousands more are being squeezed by tight money which can be cured quickly by Putnam's Corn Extractor. Being free from caustics, Putnam's is painless. Used successfully for fifty years. Use no other. 25c at all dealers.

"Oh! Shame, Tommy. You're too old to cry." "Yes, an' I bet I'm too young to have what I'm crying for."

Minard's Liniment Cures Burns, Etc.

FOOD THE TEST OF FIANCES.

French Writer Bids a Girl Watch Her Intended Eat a Peach.

"If you want to know the character of the man you intend to marry, watch him eat a peach," is the advice tendered by Elie Dautrin, a well-known French writer.

To girls in love he gives the warning: "You should watch carefully at table the young man on whom your whole future will depend. If he bends over his knife and fork and finish his roast in three gulps, beware! He is not the man who will be able to submit to tender sympathy, and he is careless if he eats without enjoying what is put before him and cannot tell you the menu of the minute after. It means disappointment for you. He will never appreciate the hats you wear, nor the style of your dresses, and you will look pretty for nothing."

"If he is immoderately fond of sweets he is of a nervous disposition and will nag. If it be cheese and roast he prefers, he will be muscular and placid. If he be a bread-eater at times, he is fond of the country. If a lover of fine old wine, he has the soul of a landed proprietor."

The best test of your future husband is to watch him at the moment of dessert. See how he handles a peach. Does he take it distractedly or like a man in a hurry? Does he swallow it hastily? Then you say to yourself, "He is not the husband for me. But a he takes it slowly, tenderly, like a connoisseur who appreciates what he eats; if he does not swallow it at once but peels it with the air of an artist and treats it with devotion, then don't hesitate to marry him as quick as you can."

Minard's Liniment for sale everywhere.

How X-Rays Have Improved.

When the X-rays were first adopted for making radiographs for surgical purposes they would show only such things as the bones, and bullets or other foreign objects in the body. Now pictures of this sort are being made of nearly every organ of the body. Salts of silver, lead, bismuth or other metals which are opaque to the rays are fed to the subject or injected into his circulation and thus cause the various organs to cast shadows that are recorded on the X-ray plates.

"Now, Johnny," said the teacher. "If you had six pennies and Charlie had four and you took his and put them to yours, what would that make?" "Trouble."

MAXWELL'S HIGH SPEED CHAMPION

Is the Washer for a Woman

In the first place, Maxwell's "Champion" is the only washer that can be worked with a crank handle at the side as well as with the top lever. Just suit your own convenience.

Another Maxwell feature—Lever and Balance Wheel—work independently of the crank handle. The washer runs slow even when you have started wearing the lever. There's no doubt about Maxwell's Champion being the easiest washer on the market.

Write for new illustrated catalogue. Hydrostatic does not rust. Maxwell's Champion Washer. MAXWELL & SONS, 11 Bay St., Toronto.

Her Reason.

"I'd like to have an X-ray photograph taken of Cholly's brain."

"Do you think there is anything the matter with it?"

"No; but I'd like to be sure he has a brain before I marry him."

Low Colonist Rates to Pacific Coast.

Via Chicago and North Western Railway. On sale daily from Feb. 24 to Oct. 10th inclusive, from all points in Canada to Los Angeles, San Francisco, Portland, Salt Lake City, Seattle, Victoria, Vancouver, Nelson, Rosland, and many other points. Through tourist sleepers and dining cars. Liberal stop-over privileges. Full information as to rates, routes and literature, write or call on R. H. Bennett, General Agent, 46 Yonge Street, Toronto.

# NOTES AND COMMENTS

The peace strength of the man army will be very little of 900,000 men when the latest isolation has been put into effect. And this statement does begin to cover the tremendous of Germany's preparedness war. Her strength is not measured alone in numbers. It is preparedness—discipline and organization. So great is this when the latest law has been able to put approximately trained men on her French in thirty hours or less. This actually what it says, great force will be ready in a day and actually move out confusion or delay by schedules always prepared in four hours more. This significance of which can be created even dimly by what the administrative offices of such a performance gives a vivid meaning phrase, "Europe is a camp."</
