By J. A. McD.

The poet said that chill November's stormy blasts made fields and forests bare. The fields and forests are bare enough looking. The cattle rejoice that the frozen winter has kept away so far, as they can live on the grass yet. Thunder and lightning on Friday the 6th inst, some are predicting an open winter till Xmas. This would suit fine the majority of the farming class of people, as it would be a great saving on feed, which is none too plentiful with the most of the farmers in general.

We had a letter from a friend from the West, who was raised near here, which stated that they could raise one thousand bushels of our one hundred in old Ontario. Well there are some farmers near this town that had from 1000 to 1670 bushels. That would mean that the West could produce ten thousand bushels to every thousand here or fifteen thousand to every fifteen hundred and probably this is correct enough for the majority in general, but would average 400 to 800 bushels, but we must be thankful with small mercies.

Division Court

At the court held here to-day the case of Snell v. Kellar was decided in favor of the defendant largely by the evidence of Wm. Black. At the March Fair Mr Jas. Snell bought a horse from Mr Kellar, which in a few days went lame and on reselling it he lost some \$60. The action was to recover this \$60. It was proved that the plaintiff allowed 24 days to elapse before complaining and this and other evidence from farmers and Mr Black who knew the horse, caused the decision.

If present plans do not miscarry Holstein will soon boast a branch of Canada's latest and fast growing industry, that of fox-farming. A number of citizens headed by Dr. W. P. Ellis have taken the matter in hand and intend to launch the project in the form of a joint stock company with a capital of \$20,000. As soon as \$5000 worth of stock has been subscribed the promoters of the scheme will apply to the Government for a charter and this step will be followed by the complete organization of a company.

Naturally the "men behind" are enthusiastic over the proposed scheme and they expect no trouble in getting started. All kinds of foxes will be kept. There will be pens for the black variety, the silver breed, the red foxes and even the common dog fox will not be forgotten. When the charter has been procured land will be purchased in the village or immediate vicinity.
