

NERVOUS CHILDREN

The Trouble is Often Really St. Vitus Dance—Do Not Neglect It

Many a child has been called awkward, has been punished in school for not keeping still or for dropping things, when the trouble was really St. Vitus Dance. This disease may appear at any age, but is most common between the ages of six and fourteen years. It is caused by thin blood which fails to carry sufficient nourishment to the nerves, and the child becomes restless and twitching of the muscles and jerking of the limbs and body follow. In severe cases the child is unable to hold anything or feed itself. St. Vitus Dance is cured by building up the blood. The most successful treatment is to remove the child from all mental excitement, stop school work and give Dr. Williams' Pink Pills. These Pills renew the blood supply, strengthen the nerves, and restore the child to perfect health. Here is proof of their power to cure. Mrs. Geo. A. MacDonald, Harrington, N.S., says: "My son was attacked by St. Vitus dance; at the outset his step was weak and jerky. We called in a doctor who treated him, but notwithstanding he continued to grow worse and at last grew so bad that he could not hold a cup in his hand, while his head constantly twitched, and his speech became rather indistinct. At this juncture I saw in a paper the cure of a boy from similar trouble through the use of Dr. Williams' Pink Pills. We at once sent for a supply, and in a few weeks after he began their use there was considerable improvement, and it was not long after this before he was completely cured, and has never had a symptom of the trouble since. I am convinced that there is no medicine like Dr. Williams' Pink Pills for the cure of St. Vitus Dance. If your dealer does not keep Dr. Williams' Pink Pills you can get them by mail at 50 cents a box or six boxes for \$2.50 by writing the Dr. Williams' Medicine Co., Brockville, Ont.

MAN-EATING SHARK NO MYTH

Hundreds of Human Beings Killed By Him Annually.

A great many persons are of the belief that sharks, no matter what their size or species may be, do not kill or even attack human beings; some authorities declare the man-eater will only attack the human form when it is motionless; others that it will not touch a human in the nude, only those that are dressed. A friend of mine residing at Pensacola, Fla., resents all these declarations, and affirms that the shark of twelve feet or more will attack man or woman under all conditions—the body being still or in motion, nude or fully dressed. He writes me: "Hundreds of human beings are killed and eaten annually by sharks. I personally witnessed the killing of one man by a shark, and aided in killing the shark. The body of the man—that of Thomas Ashe, pilot of the schooner Wallace A. McDonald, sailing in Florida waters—was cut completely in two and sank in fifty feet of water. "After biting its victim the shark was about to devour the parts of the body when a well-directed harpoon ended its career. The shark may not molest human beings swimming in shallow water or attacking surf bathers. It is certain that the species will attack man in deep water."

EYE STRAIN

Relieved by Quitting Tea and Coffee

Many cases of defective vision are caused by the habitual use of tea or coffee.

It is said that in Arabia where coffee is used in large quantities, many lose their eyesight at about fifty. Tea contains the same drug, caffeine, as coffee.

An Eastern woman writes to the point concerning eye trouble and coffee. She says:

"My son was for years troubled with his eyes. He tried several kinds of glasses without relief. The optician said there was a defect in his eyes which was hard to reach."

"He used to drink coffee, as we all did, and finally quit it and began to use Postum. That was three years ago and he has not had to wear glasses and has had no trouble with his eyes since."

"I was always fond of tea and coffee and finally became so nervous I could hardly sit still long enough to eat a meal. My heart was in such a condition I thought I might die at any time."

"Medicine did not give me relief and I was almost desperate. It was about this time we decided to quit coffee and use Postum, and have used it ever since. I am in perfect health. No trouble now with my heart and never felt better in my life."

"Postum has been a great blessing to us all, particularly to my son and myself."

Name given by Canadian Postum Co., Windsor, Ont. Read "The Road to Wellville," in pkgs.

Postum now comes in two forms: Regular Postum—must be well boiled. 10c and 25c packages.

Instant Postum—is a soluble powder. A teaspoonful dissolves quickly in a cup of hot water and with cream and sugar, makes a delicious beverage instantly. 30c and 50c tins.

The cost per cup of both kinds is about the same. "There's a Reason" for Postum. Sold by Grocers.

OUR DOGS FOR SHACKLETON

ANTARCTIC EXPLORER INTENDS TO USE THEM.

Experimental Trip in Norway to Test Rations and Transportation.

Word comes from England that Sir Ernest Shackleton is about to make a preliminary trial expedition under Arctic conditions in the glaciers of Norway. This will be for the special purpose of testing the rations for his trip across the Antarctic continent, which he hopes to make in four and a half months' time.

He has, with the aid of the Royal Army Medical Corps, evolved the "perfect ration." It will average only 25 ounces daily, as compared with the three pounds or more consumed by the average man, but it is believed it represents the highest nutritive value for polar travel.

Sir Ernest will be accompanied by five members of his staff when he goes to Norway to conduct experiments with these rations and also test his tents and motor sledges. The party will don polar kit and travel among the glaciers.

While the cold will not be as intense as in the polar regions, the country will furnish the same sort of sudden blizzards as are experienced in the Antarctic.

Shackleton's new ship, the *Endurance*, has been almost completely fitted in Norway, and will arrive at the London docks this month. She is 18 feet longer than his last ship, *Nimrod*. She is a beautiful specimen of wooden ship building, and probably the last of her class that will be constructed. Her whole keel is made of solid oak 5½ feet thick, and her sides are two feet thick. She belongs to the barkentine class, has the latest triple expansion engines and will steam ten knots an hour. She is fitted to consume both oil and coal. When in the ice oil will be substituted for coal, which will mean economy if she is delayed in the pack, as the boilers can be kept warm and full heat generated quickly. When the oil has been used the tanks will be filled with water ballast. The *Endurance* will take on 100 tons of coal briquettes at the South Shetland Islands, so she will enter the Weddell Sea with full bunkers.

Dogs From Canada.

The second ship, *Aurora*, intended for the Ross Sea side of the expedition has been purchased, and will be delivered at Hobart, Tasmania, at the end of August.

The *Endurance*, which is to operate on the opposite of the Antarctic, will leave England early in August for Buenos Aires, whence she will finally start for the Antarctic base in October. Most of the members of the expedition will leave England in the *Endurance*, but Sir Ernest Shackleton will travel later by mail steamer and join his ship at Buenos Aires.

The dogs, which constitute an important factor in the expedition, are a cross between a wolf and a Scotch stag hound, and have been bred in Northern Canada. The lightest of them will turn the scales at 80 pounds, whereas the heaviest at 120 pounds, the last Shackleton expedition weighed 45 pounds. They have been selected by the experts of the Hudson's Bay Company, and will be under the charge of one of the most experienced drivers from Canada, who was chosen by the commissioners of the Northwest Mounted Police.

The latest appointments to the expeditionary staff are Sir Philip Lee Brocklehurst, who was with Shackleton in 1907 and 1909 and who made the first ascent of Mount Erebus, and his brother, Lieutenant Courtney Brocklehurst, of the 11th Hussars, hundreds of applications for positions with the expedition have been received.

HOT AND COLD.

Advantages of Cape Horn Route Over Panama Canal.

The new route from New Zealand to Liverpool via the Panama Canal is about 900 miles shorter than the old route round Cape Horn. None the less, shipowners engaged in the frozen-meat trade declare that they will make no change.

At present ships traverse a long stretch of cold water from New Zealand to the Horn; they still pass through cold water while coming up the Patagonian coast, and strike almost vertically across the equator. Thus they are in hot water for only a few days. But ships proceeding from New Zealand to Panama would cross the equator slantwise, and so would be in hot water for a very much longer period.

Now, frozen meat leaves the works in New Zealand as hard as stone. It softens slightly during the process of handling at the wharves, and for two days, perhaps, after the ships are laden the refrigerating machines are kept at work driving out the warmth. But once this is done, all the machines have to do is to prevent warmth leaking in; and, naturally, the warmer the water through which the ship is passing, the longer the machines have to work.

In fact, so great would be the extra cost of keeping the refrigerators that cost owners say that it, together with the canal dues, would more than counteract the saving in mileage.

No Use.

"I'm going to engage in a battle of wits," he announced.

"What's the use of going into battle without any ammunition?" he asked.

Even a gold handled umbrella has its ups and downs.

FROM BONNIE SCOTLAND

NOTES OF INTEREST FROM HER BANKS AND BRAES.

What is Going on in the Highlands and Lowlands of Auld Scotia.

The death is announced of Mr. Andrew McGill, Barsaloch, Penninghorne, a noted breeder of Galloway cattle.

Lieutenant-General Sir Spencer Ewart, K.C.B., has been appointed General Officer Commanding-in-Chief, the Scottish command.

The financial statement submitted at the annual meeting of the Scottish Football Association showed a profit of \$19,320 on the year's working.

A railway porter named John Burks, of Rolland Street, Glasgow, was killed at Queen Street station by being caught between the buffers.

Dundee Parish Council have resolved to present an address to the King and Queen on the occasion of their forthcoming visit to Dundee.

As a result of a kick from a horse in the yards at Sankind Road, Dumbarton, a carter named Trotter has died in the Western Infirmary, Glasgow.

The death has occurred of Mr. Munro Wilson, a retired grocer of Hawick, aged ninety-two. He was a pioneer of the temperance cause in Scotland.

A disastrous fire broke out on the farm of South Longmuir, Langside, tenanted by Mr. Marr, and the whole stock of cattle numbering thirty-nine, perished.

The annual pilgrimage to the Wishing Well at Colinton, near the verve, on the first Sunday in May was observed with all the time-honored ceremony.

One miner was killed and another seriously injured in a bad fall in the main coal seam in Messrs. Robert Addie and Son's Viewpark Colliery, Uddington.

A public playground and gymnasium provided by the corporation of Paisley for the benefit of children residents has been formally opened by Provost Robertson.

There has just died at Eaglesham, at the age of 82, Corporal Robert Grace, another of the diminishing list of Crimean veterans. He was attached to the Scots Guards.

New premises are to be built on the High Street of Hawick, for the Hawick National Security Savings Bank, and the plans have already been passed by the Town Council.

The Watching Committee of Glasgow Corporation is understood to be in favor of granting the city police a weekly day of rest, but it desires to wait for Parliamentary sanction.

At a meeting of the Peebleshire County Council the county clerk was authorized to borrow for the erection of a new bridge at Crownhead, the estimated cost of which is \$18,250.

For the 307th year in succession the boards of Berwick Corporation have been riden recently. The mayor, Councilor T. Wilson and the sheriff, Mr. E. W. Stiles, headed the procession.

The Aberdeen ship painters have come out on strike as the result of the employers refusing an increase of 2 cents per hour, making the hourly wage 14 cents. Some 70 men are affected.

Mr. Robert Milligan, teacher, Kirkgunzeon, has intimated his resignation as headmaster of the public school after forty-seven years' service, and in all fifty-one years as a head teacher.

The Corporation of Glasgow have by a majority, agreed to the recommendation of the Tramway Committee, that the Tramway Department should carry their own insurance against third party risks.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea, every summer, thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets cure these troubles, or if given occasionally to the well child will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the newborn babe. They are especially good in the summer months because they regulate the bowels and keep the stomach sweet and pure. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Mile in Various Lands.

In England a mile means 1,760 yards, but in Ireland it means 2,240 yards, and in the Highlands it may mean the old Scotch mile of 1,976 yards. In Switzerland the mountaineers think 9,133 the proper thing, even when, as it generally is, it is very much uphill. The Swiss is the longest mile of all, being followed by the Vienna post mile of 8,296 yards, the Russian mile of 6,869 yards, the Prussian 8,237 yards, the Bussingian 4,100 yards, and in Denmark they walk 8,244 yards and call it a stroll of a mile. The Germans have modernized their former ditto by putting in the kilometers (less than the English mile). The Arabs call 2,143 yards a mile, while the Turks are satisfied with 1,926 yards, and the Italian shortens the distance of a mile to 1,760.

Even a gold handled umbrella has its ups and downs.

Keep Minard's Lintment in the house.

ED: 4. ISSUE 25-14.

BEE-STINGS FOR DRUNKARDS

Discovery Made by Accident in a London Hospital.

According to the recent testimony of various English doctors and their patients, a really wonderful cure of rheumatism and sciatica has been effected by the sting of the bee. In one case a person crippled by rheumatism for fifteen years was completely cured after he began to keep bees and was continuing to sting them; while in another case a lady who had been crippled for four years by an attack of rheumatic fever had bee-stings applied to the various affected parts, and within a fortnight the stiffness and pain left her feet, ankles, elbows, and finger-joints.

The explanation lies in the fact that the bee, when it stings, injects a large quantity of formic acid into the body. This acid, as has been shown by experience with hundreds of cases, is the best antidote for the poisons in the system which stiffen the muscles and joints with rheumatism.

It is affirmed, too, by physicians that inebriety as well as rheumatism may be cured by bee-stings. The discovery was made quite by accident in a London hospital. Five patients were being treated for chronic rheumatism. Four of them had been hard drinkers for years, and one was a confirmed drunkard.

Bee-stings were applied to them, and the rheumatic condition promptly subsided. When they were finally discharged they found that their feelings had done more for them than any medicine had destroyed their taste for alcohol. Even the sight of drink nauseated them, and since leaving the hospital several months ago not one of them has touched liquor.

An intoxicated person is quickly sobered by a bee-sting, and drinking-men who take up work among bees, where they are frequently stung, soon lose their old craving for alcohol.

How a Sick Woman Can Regain Health

READ THIS VERY CAREFULLY.

"For years I was thin and delicate. I lost color and was easily tired; a yellow pallor, pimples and blotches on my face were not only mortifying to my feelings, but because I thought my skin would never look nice again I grew despondent. Then my appetite failed. I grew very weak. Various remedies, tonics and tablets I tried, but without permanent benefit. A visit to my sister put into my hands a box of Dr. Hamilton's Pills. I placed reliance upon me a well woman character of a woman's nature. They never once gripped me, yet they established regularity. My appetite grew keen—my blood red and pure—my rings under my eyes disappeared and my skin as clear and un-wrinkled as when I was a girl. Dr. Hamilton's Pills did it all."

The above startlingly true letter from Mrs. J. Y. Todd, wife of a well-known miller in Rogersville, is proof sufficient that Dr. Hamilton's Pills are a wonderful woman's medicine. They are sold in all drug stores, or by mail from a box. All dealers or the Catarhizone Co., Kingston, Ontario.

Wrong Diagnosis. A man called upon a physician for advice. The physician diagnosed the case as one of nerves and prescribed accordingly. The fee was five dollars and the prescription two dollars. The man had only five dollars. He said to the physician: "Doc, five dollars is all I have. Lend me two dollars and I'll have the prescription filled."

The physician gazed at the man for a moment, then said: "I have made a mistake in my diagnosis. Your nerve is all right. You are affected with an enlarged gall. There is no remedy for that."

MINARD'S LINTMENT is the only Lintment asked for at my store and the only one we keep for sale. "All the people use." HARLIN FULTON. Pleasant Bay, C.B.

Spoiled the Job. Howell—When you want a thing done right, do it yourself. "I guess that's good advice; I never got a fellow to lie for me when he didn't make a mess of it."

Minard's Lintment Zamberra's Friend Certainly. "Why do you say a thing is as dead as a door nail?" asked the old fogey. "Why? It's a door nail any deadlier than a door!" "Because it has been hit on the head," replied the grouch.

Minard's Lintment used by Physicians. EATING A FAMOUS ROOF. Ravages of Beetles on the Roof of Westminster Hall. More than five hundred years ago a foreman carpenter designed the hammer beam roof in Westminster Hall, and finished the job in 1397, charging six shillings a day for his genius. It was cheap enough, and his work might have lasted another five hundred years but for the Westminster beetle. The Westminster beetle has eaten into the wall beams until one can scoop out the rotten wood by handfuls, and the whole arched edifice is sinking by inches.

Needless to say, the beetle is eating into other parts of the oak besides the beams we have mentioned. Neither purlin, nor the longitudinal struts which form the side arches, nor the fine gothic tracery and carrying are sacred to this infamous parasite; but the wall posts and hammer-beams and posts are principally mentioned because on them lies the work of supporting the hammer beam roof; and also because some of these great timbers have suffered most from the inroads of the larva of the beetle. It is almost impossible to stand inside some of the arches. The arched hammer beam roof is like an inverted A with a smaller A inside

RINGWORM ON FACE IN SCALY SPOTS

Around Mouth and Chin. Spread All Over Face in Big Disfiguring Blotches. Burning and Itchy. Used Cuticura Soap and Ointment. Ringworm Disappeared.

Burnt Church, N. B.—"For about four years I was troubled with ringworm on my face. It first made its appearance in little scaly spots around my mouth and chin which would last for about a week, then would disappear and in two or three weeks' time would appear again. As the little scales or scabs came off it would get like a cracked sore which was always itching sore. The ringworm always got worse until it had spread all over my face in big disfiguring blotches which did not disappear at all. They would have a burning itchy soreness. The worst disfigurement was always very distressing."

"I tried all the known household remedies I could think of besides some recommended by others without any effect. A friend told me of Cuticura Soap and Ointment and I obtained a cake of Cuticura Soap and a box of Cuticura Ointment. The first application afforded relief. I washed my face with soap and water as directed, then applied the Cuticura Ointment. In a week's time the ringworm had entirely disappeared." (Signed) Miss Marjorie E. Morrison, May 28, 1914.

Cuticura Soap and Cuticura Ointment are sold by druggists and dealers everywhere. For a liberal free sample of each, with 25¢ book, send postpaid to Potter Drug & Chem. Corp., Dept. D, Boston, U.S.A.

ODDS AND ENDS. Singapore now has a population of 293,322. British South Africa has 8,501 miles of railway in operation. Canada exported 20,941,000 lbs. of cheese during October. The Chinese divide the day into 12 parts, each two hours long. A well-constructed brick house will outlast one built of granite. Vaccination is an essential qualification for marriage in Norway and Sweden. The ants of South America have been known to construct a three-mile tunnel. The German village of Remborn has a linden tree which is said to be more than 1,000 years old. Shanghai recently saw the opening of the first street car system financed, constructed and operated solely by Chinese. In one of the Spanish cities a co-operative society has been formed which is to have a central market, where all sorts of foodstuffs and fuels may be procured. Geologists have estimated that the great German deposits of potassium salts, practically the only important one in the world, will last at the present rate of exploitation 600,000 years. French Guinea is regarded as one of the richest of the French West African colonies. Konakry, the capital, is the port through which almost the whole of the export and import trade passes, and improvements are being made to facilitate the constantly increasing trade. Native children in the Alaska schools under the United States Bureau of Education become so enthusiastic over the personal hygiene campaign that they frequently bring their fathers and brothers to school to have them put through the clipping and cleaning process at the hands of the teacher.

UNIT TO LIVE—MUST DIE. The verdict rendered a thousand times when corn gets set. Do them to death by Putnam's Corn Extractor; it cures painlessly in twenty-four hours. Use "Putnam's," only vegetable remedy known, price 25c. at all dealers.

If a young man has the audacity to propose to a girl, she should have the impudence to accept him. Minard's Lintment used by Physicians.

EATING A FAMOUS ROOF. Ravages of Beetles on the Roof of Westminster Hall. More than five hundred years ago a foreman carpenter designed the hammer beam roof in Westminster Hall, and finished the job in 1397, charging six shillings a day for his genius. It was cheap enough, and his work might have lasted another five hundred years but for the Westminster beetle. The Westminster beetle has eaten into the wall beams until one can scoop out the rotten wood by handfuls, and the whole arched edifice is sinking by inches.

Needless to say, the beetle is eating into other parts of the oak besides the beams we have mentioned. Neither purlin, nor the longitudinal struts which form the side arches, nor the fine gothic tracery and carrying are sacred to this infamous parasite; but the wall posts and hammer-beams and posts are principally mentioned because on them lies the work of supporting the hammer beam roof; and also because some of these great timbers have suffered most from the inroads of the larva of the beetle. It is almost impossible to stand inside some of the arches. The arched hammer beam roof is like an inverted A with a smaller A inside

it, helping to support the big A at the apex. Imagine a line drawn like a cross-bar through the A and reaching to the walls of Westminster Hall on either side. The smaller A might rest on this cross-bar and support the big arch. As a matter of structure the two halves of this imaginary cross-bar do not join in the middle. They do not project far enough to allow the bowed legs of the smaller A to protect on their ends. These two projections are called in carved angles beams. They end in braced angles and support and are carved to allow the ingenuity with which the fourteenth century English carpenter devised his balancing system of stresses and thrusts.

What is happening now is that the weakening of the hammer posts and beams, as well as of the arches which spring from the walls and plates pulling the roof from the walls. It will clear away from the walls. It will be necessary and sufficient to brace the whole structure together with a light and imperceptible steel framework. Little can be done to repair the ravages of the beetle, though its steps are being taken to fill up its cavities and by means of various preparations of sulphur to discourage any further activity on its part.

The Westminster beetle is a skate-like animal, not unlike a skate-shaped wood louse. It is the larva which does the damage, and this warrior has an enormous appetite which eats its way through the quickly eaten pine-needle jaws, and very powerful pincer-like jaws. Confined in a corked bottle through the quickly eaten way through the cork. One specimen which was confined in a bottle with a tin-protected lid, the tin and was in danger of starving. Its life was preserved and its appetite restored by a meal of the familiar Westminster oak. The larva always eats its way in. The light golden-brown color of much of the roof is due to a species of mildew or rust.

Best Liniment of All Destroys Every Pain But Never Burns. "How thankful we are to get hold of such a wonderful household remedy as 'Nervilleine.' writes Mrs. E. P. Lamontagne from her home near Weaverville, Alberta. "In this far-away section, far away from a doctor or druggist, every family needs a good supply of Nervilleine. It destroys every pain, but never burns. We use Nervilleine in a score of ways. If it's rheumatism or stiff neck, you can laugh at them if you have lots of Nervilleine handy. For earache, toothache or cramps I don't think anything could act more quickly. For a general ailment, practically I can think of nothing more valuable and speedy to cure than Nervilleine."

The above letter is convincing—it tells how reliable and trusty this old-time remedy is. Nervilleine for forty years has been a household word in Canada. Scarcely a home in Canada you can find without Nervilleine. Every community has its living examples of the wonderful curative properties of Nervilleine which will cure pains and aches anywhere in the joints or muscles. It's penetrating, soothing, warming and safe for young and old to use. Get the large 50c. family size bottle; it's the most economical. Small trial size 25c. at any dealer's anywhere.

Something should be done to discourage the belief that comfortable clothes are never stylish.

Ask for Minard's and take no other. Catching Up. "Why do you insist upon having the biggest share of the pudding, Harry?" asked the mother of a small boy. "Isn't your older brother entitled to it?" "No, he isn't," replied the little fellow. "He was eating pudding two years before I was born."

The Nearer Hills. "And, my dear, what mountains in domestic life give you most trouble?" "The kitchen range."
