

NOTES AND COMMENTS

On the same morning that the posters of the Boston Chamber of Commerce "Safety First" campaign announce that 98 per cent. of all accidents are preventable...

It is ungracious in a time of sorrow sometimes to speak of realities, but there are courses of conduct so utterly foolish that a newspaper fails in its duty not to bring the example squarely to the attention of its readers who might perchance be equally careless or uninformed.

There is a science in safety, as well as in everything else in the world. People can learn how to handle gasoline and gunpowder safely, how to climb scaffolding and cross railroad tracks, and do other things safely. This is the merit of the "Safety First" movement. It is a teaching campaign.

One of the physicians addressing the delegates of the Institute of Homeopathy at Atlantic City, N. J., said that if those who had reached maturity would eat less they would live longer. This is not a new or startling axiom, but it is a good thing to have it repeated by one whose duty and experience gave him the right to speak by authority.

It would be well if people generally were to pay more attention to this important subject. We hear a great deal about the evils caused by drink but not half enough concerning the effects of overeating. It was pointed out at one of the meetings that medical science has concerned itself greatly with the problems of infancy and childhood and has not given sufficient attention to the problems of maturity.

The doctors deserve credit for calling attention to this fact, although by so doing they may be depriving themselves of part of their practice.

BOY GOES ON ALL FOURS.

For Ten Years That Has Been His Method of Travel. A case of a possible reversion to type is that of Thomas Armstrong, a twelve-year-old boy of Bangor, Alabama.

Some alarming statements respecting the traffic in children have been publicly made by Sister Arendt of Stuttgart, Germany. According to this woman, who was formerly a policewoman at Stuttgart, there exists an organized traffic of a particularly shameful kind of children, who are said to be hired out to beggars and led out to work for profit and for immoral purposes.

Physicians are studying the case with exceptional interest in the belief that valuable anthropological and medical information may be obtained from his treatment.

New Disease Found.

Prof. Erich Harnack, the famous Jena (Germany) pharmacist, announces the discovery of a new disease, it is a sort of chronic copper poisoning which may prove fatal.

Fashion Hints

Wide bands of Scotch plaid organdie are used on the edges of white organdie ruffles on short skirts dropped over a satin foundation. Black velvet ribbon is banded on ruffles in the same.

Merry Widow Styles.—When the Merry Widow styles were shown a few years ago everybody liked them—which is something that cannot be said about the styles of to-day.

Chiffon for Trimming.—Chiffon flowers are much used on hats and to catch the drapery on gowns.

Satin Pansies.—Satin and velvet pansies in splendid purples and yellows, four times the natural size that grows in our gardens, are used on hats.

Shirtwaist Novelties.—Shirtwaists of white organdie, to which are attached men's waistcoats of white pique, with pockets at the waistline and flat silver buttons, are a novelty that deserve attention.

Velvet Summer Wear.—Velvet taken a decided place in mid-summer clothes. One phase of it is the short black velvet coat, with-out sleeves or else with long ones worn with white lace gowns that have ruffled skirts.

New Tunic is Circular.—A new tunic is circular, made of fine dark blue serge, worn over a narrow foundation of black satin.

Parasol Shapes.—Parasols are made in triangular shape, by means of three groups of two ribs. This shape has been seen at many of the fashionable seaside places.

Pretty Handkerchiefs.—Pretty handkerchiefs to carry with the colored muslin frock are those of fine white linen finished with a tiny roll at the edges, whipped with colored-cotton to match the frock.

MAIMED FOR GAIN.

Startling Charges are Made Against Orphan Asylums in Europe. Some alarming statements respecting the traffic in children have been publicly made by Sister Arendt of Stuttgart, Germany.

Other husbandmen.—Men of a different stamp, leaders in the new spiritual fellowship of his followers. Some of these were not Jews.

The stone.—That is, Christ. The builders.—The Jewish nation. The head of the corner.—The most important place in the foundation of a building.

Consulted the Wrong Man. It was at a reception, and the lady, who had been reading up on health culture, mistook Lawyer Williams for his brother, the doctor.

THE SUNDAY SCHOOL LESSON

INTERNATIONAL LESSON, AUGUST 16.

Lesson VII. The Wicked Husbandmen. Matt. 21. 33-46. Golden Text, Matt. 21. 42.

Verse 33. Another parable.—In addition to the parable of the two sons, recorded in the verses just preceding this lesson passage, the abrupt introduction of this parable betrays emotion.

A householder.—In this parable, like the parable of the sower, the details of the story can be easily interpreted. Here, the householder or owner of the vineyard is God.

A vineyard.—The Jewish people, planted by God in the land of promise. The details of this description of the vineyard are taken from the song in Isa. 5. 2.

Set a hedge about it.—The land of Israel was separated from other countries by the mountains, the desert, and the sea.

Dug a winepress.—This was usually made of rock and contained two compartments, the upper one for the grape and the lower to receive the wine when it had been pressed from the grapes.

Let it out to husbandmen.—Who paid the owner an annual rental. Very often this rental was paid in kind, that is, the owner received a portion of the crop.

Went into another country.—The vines would not bear fruit for two or three years, and during that time the husbandmen could be left to cultivate and prune the vines.

After Israel was established in Palestine God no longer spoke to them in the pillar of cloud, so in a sense he left them, and the leaders and teachers—that is, the scribes and Pharisees—were the husbandmen to whom the care of Israel was entrusted.

The fruits.—Faithfulness and obedience to the law. God had the right to expect that Israel would develop into a holy nation.

His servants.—The prophets, who were preachers of righteousness and who demanded of the people virtuous lives.

Took his servants, and beat one, and killed another.—The people to whom Jesus spoke this parable were familiar with the treatment the prophets had received.

Circular Skirts.—Circular skirts may be the next thing on the calendar of dress. At any rate, they are a coming possibility.

These fine pleated ruffles give a desirable finish to any thin frock.

Parasol Shapes.—Parasols are made in triangular shape, by means of three groups of two ribs.

Pretty Handkerchiefs.—Pretty handkerchiefs to carry with the colored muslin frock are those of fine white linen finished with a tiny roll at the edges, whipped with colored-cotton to match the frock.

Physicians are studying the case with exceptional interest in the belief that valuable anthropological and medical information may be obtained from his treatment.

Young Folks

Grandfather Grizzly. Little Bear's parents had never told him about his Grandfather Grizzly.

Little Bear's parents had never told him about his Grandfather Grizzly, but Auntie Cinnamon and Grandfather Grizzly talked like this: "Gr-gr-gr-gr-er-row-row"—only they made it sound like the north wind in November.

Man of the Moment in Europe is Britain's Foreign Secretary. Sir Edward Grey, Britain's secretary for Foreign Affairs, and probably next Liberal Premier, is to-day one of the outstanding figures in Europe.

To understand Sir Edward's character, it is necessary to bear in mind two things. He is an aristocrat of aristocrats, and the greatest living authority on fly-fishing.

He is English of the English, cold, reserved, correct in pose and consistent in poise. His character is so strong and his record so clean that no breath of scandal can cling to him.

When the sun rose, and the dew was on the grass, he would lie either diplomatically or personally. He has never sat for any but the one constituency, and he has represented it since he was 23 years old.

Let it out to husbandmen.—Who paid the owner an annual rental. Very often this rental was paid in kind, that is, the owner received a portion of the crop.

THE COMMANDMENT OF LOVE

The Moral Law of Israel Laid Down by Moses, Briefly Summed Up.

Here do we have Paul's statement of that great truth which runs through the New Testament like a golden thread through a varied fabric—that "love is the fulfillment of the law."

Of course Little Bear straightway asked Father Bear many questions about Grandfather Grizzly and his folks. At last he said, "If I ever meet a grizzly, up I go, up I go, to the top of the highest tree!"

After that, Little Bear did not try to remove a bunch of burrs from the back of his neck; the burrs were sticking tight in his fur.

When the burrs were out, Little Bear jumped to the ground. "I thank you, sir," said the stranger, rising and shaking his huge body.

When the burrs were out, Little Bear jumped to the ground. "I thank you, sir," said the stranger, rising and shaking his huge body.
