## City of Victoria Healthy.

adian city with such a record of good health as that of Victoria, B.C., as is shown by the report of Mr. G. A. B. Hall in the medical officer's report for 1914.

The mortality rate is only 7.23 per thousand, while the infant mortality rate reached the almost incredible figure of .6 per thousand. Of 18 cases of typhoid, only five were local, the remainder coming from logging camps.

One of the reasons for this situation is undoubtedly the care taken to ensure a pure milk supply. The examinations taken during the year showed the butter fat percentage to average 3.9 per cent., the water supply is also above reproach.

The population of Victoria is now 55,000, and of the 367 death recorded last year 90 were over 70 years Victoria, B.C., is evidently a place where there is some competi-
