The Lady of Lancaster;

Or, Leonora West's Love.

CHAPTER XXX.-(Cont'd.) Lady Lancaster was purple with rage and dismay. She had sallied upon the field ready to drive the intruder from her grounds, and she, Lady Lancaster, the great rich lady, had been vanquished by the sharp little tongue of a low-born girl who had so innocent and candid an air that long?" she inquired, sneeringly.

realize that the girl herself knew the plied, coldly.

said sharply: "Put me into a chair, Elise, and The angry flash of his eyes did not bring Mrs. West to me."

is all off your face, my lady," said hotly.

"Take me back to my room, then, evil old woman. once, do you hear?"

down exhausted upon her bed to await answered, steadily. the housekeeper's arrival. West's room and related her ad-

saucy to her. What will she do, do from Lancaster Park?"

"She will have to send me too she does!" cried Mrs. West. "Oh, Aunt West, would you really go? Would you give up the home of sixteen years for my sake?" cried

"Yes, dear, I would go. You have no one but me, and I mean to do the best I can for your happiness. If Lady Lancaster is unreasonable about this matter, I shall leave her," said

Mrs. West, decidedly, "But, oh, aunt, you will be sorry that I came to you-sorry that poor papa left me on your hands," anxiously. "I shall regret nothing, dear, if I can only do my duty by you," was the reassuring reply that brought a

Then Elise came with Lady Lancaster's message. She looked curfously at the calm, unruffled face of

"Have I?" Leonora answered, demunder the girl's long lashes that she did not care. She delivered her mes-

More than 800,000 bushels of

Wing Like a Bullet. Falcons are said to be the most

rapid flyers; some varieties fly two hundred feet a second, according to the best estimate. Waterfowl, too, have great powers of flight. The canvasback duck

covers from 130 to 160 feet a second. The blue-winged teal and the green-winged teal, the bluebill and the redheads are only a little slower. Mallards, pintails, wood ducks, black ducks, and others can easily fly faster than a mile a minute. Even such large birds as cranes, swans, pelicans, and geese can fly at a speed of more than a hundred feet a second.

The speed of waterfowl has often been measured with great accuracy. Two men take positions on a duck pass a measured distance apart. The first man carries a stop watch and a gun, the second a gun only. As the fowl pass the first blind the timer shoots in order to frighten the birds into full speed, and starts his BITS OF NEWS FROM THE watch. As the ducks pass a second blind the man there fires a shot, and the timer stops his watch. The usual length of the course is a quarter of a mile, although a mile Items of Interest From Places 'track' is sometimes used.

Birds with short, square wings, like the kingbird, quail, and ruffed grouse, are sprinters; those with a wide stretch of wing are "distance runners." Birds of the first class attain their sudden bursts of speed through their very rapid wing each other. have sustained powers of flight, but ham, York County, N.B, was sold get under way more slowly.
