

A FIERCE LEADEN STORM HELD HARICOT

Graphic Account of Allies' Victory on the Gallipoli Peninsula.

A despatch from Alexandria says: The British and French line on the Gallipoli Peninsula from the Aegean to the Dardanelles is confronted by rising ground that culminates in the centre with a flat summit, Achi Baba, 800 feet high. On either side the vines and dry water courses called ground falls away to the sea in ravines, which the Turks have had time to make impregnable to any except those superb troops that are now fighting to pass over them. There is no room upon the Gallipoli Peninsula to find peak points, and we are now in the position of having to storm an immensely strong fortress, the advanced works of which by an amazing feat of arms we already hold and the glacis of which has to be crossed before we move forward to the assault upon the bastions of Achi Baba and beyond to the final assault upon the very walls of that fortress.

On June 21 it was determined to straighten the line upon the extreme right and at 1.30 a.m. the preliminary bombardment began. All through the morning the cannonade went on. By noon the second division of French had on the left stormed and captured all the Turkish trenches of the first two lines. Even the Haricot redoubt with its damnable entanglements and maze of communicating trenches was in French hands. On the right, however, the first division, after reaching its objective, had been counter-attacked so effectively that they had fallen back. Again they advanced, again they took the trenches and again they were driven out. It
