HEALTH

Hints for the Home Sickroom. There should be no pictures or decorations upon the walls of the improvised hospital in your home, and the floor should be bare, without even a rug. Only the necessary furniture should be permitted in the room. white enameled bed should stand well in the middle of the room, so that the nurse may pass easily from the head to foot and from one side to the other. The mattress and spring should be high, so that the nurse will not strain her back in her constant bending over the patient. A table and chairs of inexpensive wood, so that in case of contagious disease they can be burned, and a cot for the nurse, screened off in one corner of the room, should complete the furnishing. Banish upholstered chairs or cot cov-

erings that cannot be washed, Cur-

tains, if used at all, should be of

simple material readily laundered.

With a room of this sort kept always in readiness a prolonged spell of sickness, where one after another of the family catches the disease, may be prevented, and is worth fitting up as a matter of precaution, even with the prayer that it will never be used. In one home such a place has been installed, with every appliance for a hurry call, even to the operating room. Here, through one of those floor, wall and ceiling coverings put on in the plastic state, the entire room is seamless and without a crevice, so that a hose could be turned on and the room washed without One Vancouver hotel has contribut- Every Boy and Girl Should Be Trained tering under the floor.
