## THE KAISER'S AIM HAS FAILED

### FURTHER FROM WORLD DOMINATION THAN EVER.

#### Lost Commerce and Colonies—Flag Off the Ocean and Sea Faces Ruin.

A special cable to the New York Herald from London says: Despite Germany's thirty years of preparation for this terrific struggle and her utter disregard for the laws of God and man, at the end of the first year of the war, which has cost the lives of 4,000,000 men and resulted in the maximum number of men, Germany finds herself further from the Kaiser's dream of world domination than ever, and the fruits of her ambition have turned to ashes on her lips.

Notwithstanding her temporary successes—and they are only temporary—in the Eastern theatre of war, millions of homes in Germany are in mourning; other millions will be added before the great war, for which the Kaiser above all men is responsible, will be ended.

#### Warsaw to Be Burgled.

Germany's commerce with the outer world, owing to the command of the sea by the allied fleets, is nil, and her business men, robbed first to fill the war chest of the War Lord, are facing ruin. The great thrust at Warsaw, designed to inspire hope of victory, is really meant to rob them of the more money under the guise of subscriptions to another war loan, which will leave the Empire facing, if not really in, bankruptcy. Germany's colonies are disappearing, and all signs indicate that every vestige of territory which she has annexed in lands beyond her borders will be lost.

#### No German Flag on Sea.

The German flag is no longer seen upon the sea. Her great fleet of commercial vessels have been either captured, are idle at home or are interned in neutral lands. Her great fleet, too, is locked in behind the Bights of Heligoland, and her only triumphs by sea are those achieved by her submarines in attacks on unarmed passenger steamships or fishing smacks.

Whenever and wherever the British and German navies have met, gun for gun, as in the battle off the Falkland Islands, the British have won, and so at the close of a year of warfare the ships of the German navy, outside of those in sanctuary at Kiel, have been swept from the seas, and Britannia still rules the waves!

#### Using America, Too.

Because of the British domination of the sea Germany, through its agents and propagandists in America, has sought by appealing to sectional interests—the cotton growers of the South, for instance—to embroil the United States with England; but these plots have been abortive, the pro-German strikes in the munition works of New England have failed, and the Kaiser and his government stand convicted by the jury of American public opinion as murderers, and this verdict is endorsed by every neutral nation in the world.

The outlook, therefore, at the end of the first year of the war is that Germany and her puppet—for that is what once proud Austria-Hungary has come to be—will be thoroughly beaten, even if, as King George says, it takes ten years to accomplish the task. Others will follow Italy and align themselves on the side of right, and if the prophecies of the greatest Entente are fulfilled, the war will end in victory for the forces of freedom.

## OBSTINATE INDIGESTION CAN BE CURED

**Dr. Williams' Pink Pills Go Right to the Root of the Trouble.**

No trouble causes more widespread suffering and discomfort than indigestion. The ailment takes various forms. Some victims are ravenous for food; others turn sick at the sight of meals; but as a rule every meal is followed by intense pains in the chest, heartburn, sick headache and often nausea. Indigestion assumes an obstinate form because ordinary medicines only subside its symptoms—but do not cure. So-called "digerested" foods only make the digestion more sluggish, and ultimately make the trouble chronic.

**A "BOB-WASH."**  
How Many Working Women Lessen the Laundry Bills  
"Well, make a bob-wash of it!" Rather mysterious-sounding advice to hear addressed by one hard-working woman to another in the hinterland of a populous London district. The clue to its meaning is supplied by the good-tempered proprietor of a little laundry, tucked away on the outskirts of the same district.

"Oh, yes," he says; "I can tell you all about a bob-wash. In plain English, it's a boon and a blessing to the poor folk around here. It's their way of tackling the laundry problem. 'How is it done?' Well, a woman with a big family makes a bag of strong calico, about three feet square. Into this she crams the family washing, or at least all that is boilable. Everything goes in—little Tommy's shirts, along with father's overalls, and from aprons and pinafores to towels and sheets. Then she ties the bag tight at the top and sends it to me, to have a distinguishing mark put on it. 'The whole lot is washed for her without the bag being opened, and in two days' time it goes back to her. All she has to do then is to untie the bag, take out the clothes, and iron or mangle them. She pays me a shilling for the part I do, so she calls it a bob-wash, like every other woman in the neighborhood. Now, come and look at my bob-wash machine, and see how we manage things.'

From a little platform in the laundry-works the bob-washer is pointed out. It is a huge machine with immense tanks, and in these tanks hundreds and hundreds of bulgy bags, looking for all the world like giant plum-puddings, are bobbing, floating, and squirting about. Systematically stirring them up are big rollers riddled with holes, through which 'boiling water seethes and rushes. 'They go through dozens of changes of water, those bags do,' shouts the laundry proprietor above the whirl of machinery.

"Mind you," he concludes, "the bob-wash is very popular. It's cheapness has released the women from the slavery of the wash-tub, and their husbands are glad to be rid of the smoke and steam of a washing-day at home. It's a real success, I can tell you, and you know now why the woman advised her neighbor to make a bob-wash of you?"

#### Good Lung Powers.

The new baby had proved itself possessed of extraordinary lung powers. One day baby's brother, little Johnny, said to his mother, "Ma, my little brother came from Heaven, didn't he?" "Yes, dear," answered the mother. Johnny was silent for a minute, and then he went on—"I say, ma! 'What is it, Johnny?' 'I don't blame the angels for slinging him out—do you?'"

#### Spoiled by a Shower.

Amateur Gardener—Just my combined luck! I came home early especially to water the garden, and now it is pouring rain.

## FROM OLD SCOTLAND

### NOTES OF INTEREST FROM HER BANKS AND BRAES.

#### What Is Going On in the Highlands and Lowlands of Auld Scotia.

The Combination Poorhouse at Peebles is to be used as a military hospital. In Scotland over 40,000 women and girls are now members of the League of Honor.

A large number of Italians left Dundee recently for Italy and got a hearty send-off. Owing to the recent outbreak of fever, the Moat Hotel, Dumfries, has been closed up. There are now 400 women acting as tramway conductors in Glasgow or training for the duties. A purpose weighing over one ton was washed ashore on the Kirkehead coast of the Solway Firth recently.

Most of the Bonaes members of the 5th Royal Scots are with the regiment now at the Dardanelles. The royal honor for Dunblane parish contains the names of 350 non-commissioned officers and men. Five cases of cerebro-spinal meningitis occurred in Aberdeen last month, three of which ended fatally. The schools in Brechin have been closed. Fortunately the outbreak is of a mild type.

By the death of George Dalgleish, North Berwick Bowling Club has lost one of its oldest and most esteemed members. Glasgow School Board has adopted a scheme for the payment of the salaries of continuation teachers now on active service.

At a badge day recently held in Glasgow in aid of disabled men of the Lowland Scottish Regiments over 61,000 were collected. Over \$5,000 was realized from a two-days' open air carnival at Bankston Estate, organized by the Falkirk and District Choral Union.

Volunteer temporary firemen are being enlisted for Edinburgh Fire Brigades for the duration of the war to assist in dealing with emergencies. Work is being rushed on with the erection of the new brickworks at Inverkeithing that are being built to supply the bricks for the new town of Rosyth.

Mr. Andrew Stewart, headmaster of Lairdland school, Kirkintilloch, has retired after 40 years' service and was made a presentation from the children.

#### HURRY GERMAN CROPS.

Hot Water Pipes Placed Under the Soil to Induce Growth.

Since the beginning of the war Germany's chemists, men of science, and others, have been hard at work studying agricultural conditions where the soil could be utilized to the fullest extent in yielding big crops in order that the supply of food would not be menaced seriously. The Berliner Tageblatt announces that experiments made by Professor Kubler, of the Technical High School of Dresden, have so far been successful in making it possible to grow crops on barren soil by means of a revolutionary agriculture in the empire.

Professor Kubler's idea was to vary certain warmth artificially to the soil, and the method he adopted has been remarkably successful, so that crops can be grown and harvested in very short time, and several crops obtained throughout the year. The method consists in putting pipes underground and feeding water through them at a proper temperature to generate warmth in the earth, this warmth rising up to the soil, and so the vegetation and giving impetus to their growth, no matter what the weather may be above ground.

#### NEW POLYVALENT SERUM.

Wonderful Cures of Mutilated Soldiers Effected by It.

What are described as remarkable cures of wounded French soldiers have been effected by the new polyvalent serum, discovery of which was announced last March. Complete recovery is announced of men who were terribly mutilated, and for whom all hope had been given up before use of the serum, so badly infected were their wounds.

Doctors Leclainche and Vallee, the discoverers of the serum, have been unable up to the present to make more than 2,000 flasks of it daily, most of which goes to the base hospitals, where the worst cases are to be found.

#### A UNIVERSAL FOOD

Following Nature's Footsteps.

"I have a boy, two years old, weighing forty pounds and in perfect health who has been raised on Grape-Nuts and milk.

"This is an ideal food and evidently furnishes the elements necessary for a baby as well as for adults. We have used Grape-Nuts in large quantities and greatly to our advantage."

One advantage about Grape-Nuts food is that it is partially pre-digested in the process of manufacture. The starch contained in the wheat and barley is transformed into a form of sugar by the same method as this process is carried out in the human body; that is, by the use of moisture and long exposure to moderate warmth, which grows the diastase in the grains, and with long baking makes the remarkable change from starch to sugar.

Therefore, the most delicate stomach can handle Grape-Nuts and the food is quickly absorbed into the blood and tissue, certain parts of it going directly to building and nourishing both body and brain. "There's a Reason."

Name given by Canadian Postum Co., Windsor, Ont.

See the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

## PRESIDENT SUSPENDER

### NONE SO EASY

MADE IN CANADA

BOTHA IS A HERO IN LONDON.

T. P. O'Connor Gives His Impressions of the Boer Leader.

Premier Louis Botha is the latest example of the extraordinary transformation of feeling that is possible to the British crowd. He came to London immediately after the Boer War with a few of his generals. He and they were in a state of the deepest depression, for their country had been so isolated that they had grave fears as to its future. They were not popular then; indeed, some hotels were doubtful about admitting them within their doors, and the visitors who came to see and encourage them were mainly Irish politicians who had supported their cause during the war. But soon the tide turned. When poor old Campbell-Bannerman rose to the Premiership he carried home rule for the Boers without even permitting a discussion within the Cabinet. Botha became, as everybody knows, Prime Minister, and like the practised Dutchman he was, immediately resolved that the best future for his country and for his race was to throw in his lot loyally with the British Empire; and to that policy he has since adhered with splendid loyalty and judgment.

When he returned to London after this, all the past was forgotten, and he could not appear in the streets anywhere without being followed by an admiring crowd. And he was greeted none the less warmly because he had been so formidable and so brave an enemy in the not very remote past.

But, of course, by nobody was he welcomed with such heartiness as by the Irish, and the Irish party invited him to a banquet along with the other Ministers of the Dominions who happened to be in London at the time. Botha did not look very well at that time. The change from the open-air life of the veldt, whether as a soldier or as a farmer, to the sedentary habits of a Prime Minister, did not suit his temperament.

Probably after this arduous campaign, which he has just finished so successfully, Botha is in better health than he has been since he exchanged the saddle and the rifle for the desk and the pen.

General Louis Botha

#### MINARD'S LINIMENT CO. LIMITED.

Gentlemen,—I have used MINARD'S LINIMENT on my vessel and in my family for years, and for the everyday ills and accidents of life I consider it has no equal. I would not start on a voyage without it, if it cost a dollar a bottle.

CAPT. F. R. DESJARDIN  
Schr. Storke, St. Andre, Kamouraska.

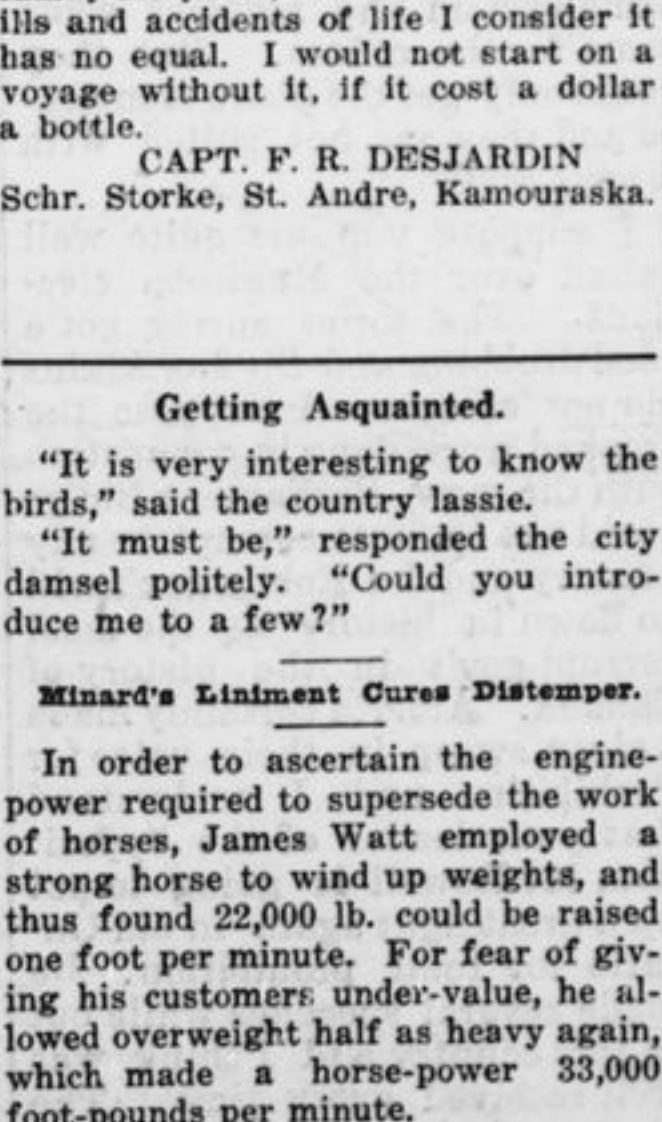

#### GETTING ACQUAINTED.

"It is very interesting to know the birds," said the country lassie.

"It must be," responded the city dame politely. "Could you introduce me to a few?"

#### MINARD'S LINIMENT CURES DIPTHERIA.

In order to ascertain the engine-power required to supersede the work of horses, James Watt employed a strong horse to wind up weights, and thus found 22,000 lb. could be raised one foot per minute. For fear of giving his customers under-valuation, he allowed overweight half as heavy again, which made a horse-power 33,000 foot-pounds per minute.

THE SMILING CORN.

Observe the sturdy stalks of corn, Watch them awhile. They catch the spirit of the morn And seem to smile.

The cornstalks seem to smile all day, Diffusing cheer. In fact, they smile, as one might say, From ear to ear.

Minard's Liniment Cures Colic, Etc.

## NAVAL EXPENDITURES.

### Britain's Cruisers Cost About \$10,000,000 Apiece.

Some interesting figures regarding Great Britain's naval expenditures are made public in a Blue Book just issued, although dated back to March 31, 1914.

The cost of the Iron Duke, flagship of Admiral Jellicoe, is given as \$9,725,000. The Audacious, which was sunk off the north coast several months ago, cost \$9,100,000.

It is noted that the Government's decision to rush the Queen Elizabeth to completion had added an even \$1,600,000 to her estimated cost up to March 31, 1914, on which date \$7,100,000 had been spent on her. How much more it cost to complete her after that date is not specified.

On March 31, 1914, four months before the beginning of the war, there were 150 vessels of various sorts being built for the British navy.

The cost of several ships that have been mentioned during the war is given as follows:

Battle cruisers—Lion, \$9,855,000; Princess Royal, \$9,840,000; Queen Mary, \$9,805,000.  
Battleships—Ajax, \$8,985,000; Centurion, \$8,970,000; King George V., \$8,890,000; Marlborough (unfinished), \$9,035,000.

#### PERIOD OF RISING PRICES.

No Return to Pre-War Conditions, Says Oxford Lecturer.

"There will be no more cheap prices; after this war the world is in for a period of rising prices," declared Dr. Slater, Principal of Ruskin College, Oxford, in the first of a series of lectures on economic phases of the world war.

"I do not believe," he said, "that there will be a period of poverty after the war. There will be no necessity for poverty and such poverty as there is will be due to misapplication of the productive powers which will be available. It will be the poverty which comes from wasted resources, and not from inadequate resources.

"There will be no return to pre-war prices. That means that there will be a permanent readjustment of our methods. There will have to be a permanent rise of wages and other permanent readjustments to meet the higher prices.

#### \$1,000.00 Reward Forfeited if Remedy Fails

We hope this notice will reach the eyes of people who are troubled with constipation and bowel trouble. Dr. Hamilton's Pills have been guaranteed to cure any case within three days, and the above reward will be paid for any case resisting this greatest of all remedies.

No prescription ever written could surpass Dr. Hamilton's Pills of Mandrake and Butternut. For years they have been curing the most obstinate cases of constipation, biliousness, headaches and sour stomach. Here is your chance to test Dr. Hamilton's Pills. If they fail—your money back for the asking. Be sure you get the yellow box, and insist on being supplied with only Dr. Hamilton's Pills of Mandrake and Butternut, 25c. at all dealers.

#### MEDICINES IN VEGETABLES.

They Are Not Only Food But Excellent Medicine.

Onions are excellent blood-purifiers. They are Nature's remedy for sleeplessness, too. An onion poultice is of great relief in rheumatic pains. In many cases bad indigestion can be cured by an onion diet.

Carrots are excellent for sufferers from gout, and those whose faces are without color can get it by eating plenty of carrots.

Spinach is full of iron, and is one of the finest blood tonics known. It is also extremely beneficial in kidney disease.

Cabbages of all sorts banish skin troubles, prevent sallowness, constipation, etc.

Tomatoes are exceedingly good for the liver.

Beetroot, eaten with rice, is a great blood-maker, and all anemic persons should eat one beet every day.

Fareley is not only a garnish, but it will cure painful nettle rash if rubbed on the spot.

Celery is a great nerve tonic, and very good for rheumatism. It is a slight sedative, too.

Parsnips are full of excellent qualities, and help the whole system. Those who are martyrs to lumbago should eat this vegetable.

Peas, beans, and potatoes, on the other hand, although they are the three favorite vegetables, have no marked medicinal qualities. Properly cooked, they are nourishing, and that is all.

It might be noted that peeling vegetables which should not be peeled, and boiling them when they should be steamed, means the loss of the "medicine" and the disappearance of nearly all their food value.

#### MINARD'S LINIMENT CURES GARGOL IN COWS

Under the control of the Department of Agriculture of Ontario. Established 1862. Affiliated with the University of Toronto. 110 University Ave., TORONTO, ONT., CAN. College Reopens Friday, October 1st, 1915. Write Dept. D. for Calendar. E. A. A. Grange, V.S., M.S., Principal.

## Highest Cash Prices Paid for GINSENG

We are the largest buyers of Ginseng in America and have the greatest demand for it. We can therefore pay you the highest cash prices. If you have any wild or cultivated Ginseng, write for our latest price list, or ship what you have and we will submit you our highest offer.

David Blustein & Bro.  
162 W. 27th St., New York, U.S.A.

#### ABOUT CRUISERS.

They Are Termed the Policemen of the Fleet.

The cruiser has to perform, perhaps, more varied functions than any other class of warship in the fleet. It is her business to stop and fight when the circumstances are, from her point of view, favorable, and also to possess a high speed to enable her to run away when the position is unfavorable. The cruiser is admirably termed the policeman of the fleet, for her capacity of mobility and long-passage making without replenishing her bunkers are her chief attributes. Although the introduction of wireless telegraphy has somewhat lessened the responsibility placed upon the cruiser for scouting work, she is still regarded as the "eyes of the fleet." For the object of scouting work there is a special type of scouting cruiser in existence. The armored cruiser's advent has almost extended that class of ship to be considered to come within the scope of the battleship. Indeed, it is her speed to enable her to run away in aggressive policy as to be deemed competent enough to live in the battle-line with the "capital ships."

#### No Cure Guaranteed More Corns

Never known to fail; acts without pain in 24 hours; soothing; healing; takes the sting right out. No remedy so quick, safe and sure as Putnam's Patent Less Corn Extract. Sold every where—25c. per bottle.

Her Advice.

"I've a good mind to go and jump in the river," said Mr. Joe Peck at the head of a little domestic quarrel, as he picked up his hat and started out. "You come back here," said his wife, "an' if you intend any such trick as that just march upstairs and put yer old clothes on."

#### LOW FARES TO CHICAGO & NORTH-WESTERN BY

Four splendid daily trains from the New Passenger Terminal, Chicago to San Francisco, Los Angeles and San Diego. Choice of Seaside and Direct Routes through the best of the coast. Something to see all the way. Double track. Automatic electric safety signals all the way. Let us plan your trip and furnish folders and full particulars. H. H. Bennett, G.A. 46 Yonge St., Toronto, Ontario.

Mustard, judiciously given, has a wonderful effect in inducing hens to lay.

Minard's Liniment Cures Diphtheria.

In Scotland a jury's verdict goes by the majority. It need not, as in England, be unanimous.
