ALL MOTHERS NEED CONSTANT STRENGTH

Their Strength is Taxed and They are Victims of Weakness and Suffering.

When there is a growing family to care for and the mother falls ill it is a serious matter. Many mothers who are on the go from morning to night, whose work, apparently, is never done, try to disguise their suffering and keep up an appearance of cheerfulness before their family. Only themselves know how they are distressed by backaches and headaches, dragging down pains and nervous weakness; how their nights are often sleepless, and they arise to a new day's work tired, depressed and quite unrefreshed. Such women should know that their sufferings are usually due to lack of good nourishing blood. They should know that the one thing they need above all others is rich, red blood, and that among all medicines there is none can equal Dr. Williams' Pink Pills for their blood-making, health-restoring qualities. Every suffering woman, every woman with a home and family to care for should give these pills a fair trial, for they will keep her in health and strength and make her work easy. Mrs. G. Strasser, Acton West, Ont., says: "I am the mother of three children, and after each birth I became terribly run down; I had weak, thin blood, always felt tired, and unable to do my household work. After the birth of my third child I seemed to be worse, and was very badly run down. I was advised to take Dr. Williams' Pink Pills. I found the greatest benefit from the Pills and soon gained my old-time strength. Indeed, after taking them I felt as well as in my girlhood, and could take pleasure in my work. I also used Baby's Own Tablets for my little ones and have found them a splendid medicine for childhood ailments."

THIS THEFT WON A MEDAL.

British Officer Stole Over a Ton of Germans' Explosives.

News reached Blackburn, England, recently, that Lieut. W. Cooper, an old Blackburn amateur footballer, has been decorated at the front with the Military Cross for an act of remarkable coolness and resource. He was driving a mine 192 yards long under the German position, and had got within a few yards of his objective, when he broke into a German mine crammed with high explosives. For a moment he thought his party were doomed, but he quickly cut the wires leading to the German trenches, and sending back for help proceeded to carry away the enemy's explosives piecemeal. As the tunnel was very low, he and his men lay head to feet and passed the stuff back from hand to hand. The task occupied twelve hours, there being one ton and a half of explosives.

No mishap occurred. Lieut. Cooper's men were unconscious by fumes, and four of them received the D.C.M. for their share in this remarkable feat.

WOMEN REPLACE MEN.

200 Women Clerks in the Bank of England.

The very sanctum of British conservatism, the Bank of England, has been invaded by women clerks. More than 200 of them are now employed in the bank in various forms of clerical work. While it is the war that gave women the opportunity of replacing men of military age, it is also war that created additional work at the bank through the war loan business.

Women have been employed in the bank of England in the humble note-sorting capacity since 1895, but they had never before done clerical work. They often put in as much as 12 hours a day.

Other English banks, it is stated, now contemplate following the lead of the Bank of England, which, despite its former prejudice against women, has been historically known as the "Old Lady of Threadneedle Street."

FEED CHILDREN

On Properly Selected Food. It Pays Big Dividends.

If parents will give just a little intelligent thought to the feeding of their children the difference in the health of the little folks will pay, many times over, for the small trouble. A mother writes: "Our children are all so much better and stronger than they ever were before we made a change in the character of the food. We have quit using potatoes three times a day with coffee and so much meat."

Now we give the little folks some fruit, either fresh, stewed, or canned, some Grape-Nuts with cream, occasionally some soft-boiled eggs, and some Postum for breakfast and supper. Then for dinner they have some meat and vegetables. "It would be hard to fully describe the change in the children, they have grown so sturdy and strong, and we attribute this change to the food elements that, I understand, exist in Grape-Nuts and Postum."

A short time ago my baby was teething and had a great deal of stomach and bowel trouble. Nothing seemed to agree with him until I tried Grape-Nuts softened and mixed with rich milk and he improved rapidly and got sturdy and well. "There's a Reason." Name given by Canadian Postum Co., Windsor, Ont. "Read the above letter? A new one appears each time to time. They are healthy, true, and full of human-love."

TAUGHT BY THE HICKORY.

How Dr. Wyeth Learned to Use His Left Hand.

It is peculiarly fortunate for a swordsman, or a surgeon to be ambidextrous. Dr. John Allan Wyeth was not born to that good fortune, but he achieved it. How he did so, with the assistance of a long, lithe, extra tough hickory, — not applied in the manner that has rendered that useful tree so unpopular with boys,—has related in his interesting autobiography, recently published.

When he was a boy of twelve, he attended school in a country school-house built on the backbone of a high, wooded ridge that overlooked the village was the girls' playground, and the other the boys'; and boys and girls met and played together on the summit. A favorite sport was for the boys to bend the tough young hickory saplings down to the ground and seat themselves and their sweethearts upon them for "ridey-horses."

"I had a sweetheart," the doctor acknowledges, "and her name was Mugg. Can you imagine in all the category of names one more suggestive of ugliness—I am almost tempted to say of 'mugginess'?" But Mugg was only her nickname. It was short for Margaret, and she was the prettiest girl in school—to me.

"There stood in our grove a slender, graceful, tight-bark hickory sapling, toughest of all tough timbers, which bends but never breaks. It towered fully thirty feet to its top-most bifurcation. There was no other like it, as there was no other girl like Mugg. I made up my mind that I would bend it to the ground, and that she should have it; and to the top I climbed, twisted the terminal twigs round my hands and wrists, and swung boldly out into space toward the ground. I had struck the wrong hickory."

"Instead of swooping to the earth as I had anticipated, in a long, graceful curve, amid the plaudits of an admiring throng, with a glance at Mugg and her approving smile, I bent that obstinate sapling not more than three feet from the top, in fishhook shape; and there I dangled, helpless and hopeless, almost as much so as if I had had a noose about my neck, and had been hanging from a gibbet. I could not clamber back, for the arc of the circle described by the bending tree top had a diameter beyond the swing of my wildly gyrating feet."

"His suggestion that half a dozen boys climb up and add sufficient weight to bend the tree low enough for safety was disregarded in the laughter at his absurd predicament. A rival called up to him to stay where he was—he looked better at a distance; another amid a chorus of giggles suggested that if he would only drop, the ground would catch him. Before they realized that his plight was anything more than funny, his hold broke, and he did drop—slashing through the limbs and against them in such a way that when he reached the ground it was no longer feet foremost. His outstretched right hand saved his neck, but his right wrist was broken."

"The fracture was mistaken for a sprain and was not set, and during the prolonged pain and weakness that ensued the boy took to using his left hand and arm. He became fairly ambidextrous; and in after years, appreciating the value of complete ambidexterity in his profession, he worked almost wholly with his left hand while teaching and studying anatomy. He was finally able, in performing an operation however delicate, to use whichever hand was more convenient or useful, without thinking whether it were right or left."

CHILDHOOD CONSTIPATION

Baby's Own Tablets will promptly cure constipation of childhood. They act as a gentle laxative, regulate the bowels and stomach and are absolutely safe. Concerning them Mrs. A. Crowell, Sandy Cove, N.S., writes: "I can strongly recommend Baby's Own Tablets to all mothers whose little children are suffering from constipation." The tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

TO THE MOTHERS OF CANADA.

Appeal for Greater Precautions in the Use of Matches.

No fewer than 683 fires, one million and a half dollars damage to property and the loss of thirty-eight lives occurred during the year 1914 as a direct result of children playing with matches.

Matches should, therefore, receive attention as a danger of primary importance. Keep the matches away from the children. Place them on a high shelf far out of their reach, for they love to play with fire, and matches form an ideal toy from their point of view.

If it were only possible to convey in its horrid detail the account of the children lost their lives, the excitement and nervous tension, the loss of property, the anguish of parents, the pain of the little child, some measure of reform might soon be effected.

Mother's should ever after guard their children against matches, as they would protect them against a terrible and menacing enemy.

Forest Protection Methods.

One of the most important features in connection with the control of forest fires is their prompt discovery, which rendering it possible in most cases to extinguish the fire in an incipient stage, at small expense and with slight damage. One of the recent developments in this work is the use of a hydro-aeroplane for the discovery of fires in the forest reserves of Northern Wisconsin.

This is a lake region, and excellent results have been secured, one fire being accurately located at a distance of thirty miles.

CRUELTY OF TURKS WORST IN HISTORY

TERRIBLE CRIMES AGAINST THE ARMENIANS.

Eight Hundred Strokes With Bastinado; Girls Kidnaped, Wholesale Deportation.

Criminals committed against the Armenian people by the Turks surpass in cruelty anything that history has recorded, according to the reports recently received by a committee which represents American interests in the Turkish empire. Deportation of Armenians began early in the summer and still continues at last accounts. Practically all of the men of military age have been dragged off to the army. The aged, the women and the children are being driven into the country and there are reports of indescribable massacres.

Lumbago's Misery Ceases, Every Aching Muscle Cured

JUST RUB ON OLD-TIME "NERVILINE."

Not necessary to drug inside! That awful stiffness that makes you yelp worse than a kicked dog will be cured—cured for a certainty, and quickly, too, if you just rub on Nerviline! Rub Nerviline right into the sore spot, rub lots of it over those tortured muscles, do it and the pain will go. You see Nerviline is this, not oily. Therefore it sinks in, it penetrates through the tissues, it gets right to those stiff, sore muscles and irritated nerves that make you dance with pain.

You'll get almost instant relief from muscle soreness, stiffness, aching joints, lameness or rheumatism by rubbing with Nerviline. It's a soothing liniment, and doesn't blister, doesn't burn or even stain the skin. It's the most harmless cure in the world for Lumbago, Back Strain or Sciatica. It takes away the ache at once and your recovery quickly.

Now quit complaining—don't suffer another day—Nerviline, that good, soothing old-time liniment will limber you up mighty quick! Get busy today, the large 50c. family size bottle is the most economical, of course, the trial size costs but 25c. Any dealer anywhere can supply Nerviline.

NEW AERIAL TORPEDO.

Uncanny Device to be Employed by the Germans.

The fear of overwhelming attacks from the air, which prevailed among the allied nations at the outbreak of the war and until recently, when the comparative ineffectiveness of the Zeppelins seemed demonstrated, is likely to be revived and the terrifying power of these monster airships fully realized if the reports relating to the new aerial torpedo perfected by the Germans prove to be true, says Popular Mechanics.

The accounts of the operation of these torpedoes read like the fantastic tales with his tireless striving for the accomplishment which readers were regaled before the great war became a reality. In many respects the torpedo resembles a submarine torpedo and is said to possess all its destructive powers. It is equipped with a delicate wireless apparatus that controls its propelling and steering mechanism, and through this every movement of the torpedo is controlled by the powerful wireless waves sent out from the Zeppelin. As it speeds toward the target the torpedo can be steered up or down or horizontally at the will of the operator. In practice it is simply propelled to a point where a wound is to be destroyed and is then turned vertically downward and dropped like an ordinary bomb.

The new torpedo is said to be about seven feet in length and to have a head like that of a submarine. In order to allow it to penetrate a roof or other obstruction before exploding the war head is equipped with a time fuse that delays its explosion for a few seconds after the impact. Carried in the body of the torpedo is from one hundred to one hundred and fifty pounds of high explosive, enough to cause great havoc, especially when exploded within an inclosure such as a building. The torpedo is driven by two propellers at the stern and is sustained in the air by two propellers working on vertical axes and placed fore and aft of the body. There are also an arrangement of fins and rudders it is kept from capsizing in the heaviest winds. It is believed that the propellers and other mechanism are operated by compressed air.

While this torpedo can doubtless be made enormously more effective than a bomb that is simply dropped it has one serious limitation when launched from an airship against fortifications. To be safe from the fire of anti-aircraft guns the airship must either be at a considerable distance from the target or at a great height above the ground. In either case it would be extremely difficult to determine when the torpedo was anywhere near a point directly above the target. In spite of this, however, the Germans have apparently provided themselves with an exceedingly effective weapon of offense in this torpedo.

Flaxseed Now a Wonderful Human Food.

as deodorized and used in Dr. Jackson's Roman Meal. It's the most nourishing grain grown. It has long been known as a wonderful food for stock, but since Dr. Jackson's discovery of a method of deodorizing it, it has become available as a delicious human food, 25% of it being used in Roman Meal. This food is guaranteed to relieve constipation or "money back." It also nourishes better than meat, and prevents indigestion. Ask your doctor. All grocers, 10 cents and 25 cents.

Minard's Liniment Cures Garget in Cows

"I've got the best memory of anybody in the community!" triumphantly cackled old Uncle Tottlerly. "Why, I can remember things on 'most everybody' found here that they wish I'd forgotten!"

Minard's Liniment Cures Diphtheria.

TEUTON KULTUR.

Germans Wage War on the Russian Language.

In all the cities and towns of Poland now under German occupation active steps are being taken to Germanize them thoroughly. To this end all efforts are at present being directed to have the German language supplant the Russian. In Lodz, Warsaw and other towns all the Russian signs on the streets and in street cars and buses have been removed and German signs put in their places. In the restaurants and hotels all the menus are now printed in German, and the German language is spoken where formerly the Russian prevailed.

Beginning with the first week in October with the reopening of the schools in Lodz and Warsaw the teaching of the German language was begun, with the object of bringing up the younger generation to speak German first and to instill in them German kultur. In fact, a widespread propaganda has been organized by German officials for the elimination of the Russian language entirely from the conquered sections of Poland.

REMARKABLE CASE.

Insane Murderer Helped Edit a Great Dictionary.

The late Sir James Murray, the editor of the famous dictionary bearing his name, discovered some years ago that one of his most valued contributors was an inmate of Broadmoor Asylum, who had stood his trial for murder!

An article in the Strand Magazine tells the story of this remarkable individual under the title: "The Strange Case of Dr. Minor." It begins thus: "It was Sir James Murray's custom whenever he was ready to start on a new word (and the genesis of a single one mostly takes up several pages in the 'New English Dictionary') to send it out to all his army of volunteer readers, who forthwith supplied the earliest possible quotation which they could discover in question was used."

"When this had been going on for a time, Sir James discovered that some of the most valuable quotations that reached him, together with some of the most scholarly comments thereupon, were forwarded by a certain Dr. W. C. Minor, who wrote from Crowthorne, a small village in Berkshire. This contributor's identity puzzled Sir James more than a little, the more so as he soon came to realize that the latter's knowledge of the subject of philology could not be behind his own. So much did Sir James esteem the mysterious Dr. Minor, in fact, that whenever he had completely finished his analysis of the history of any one word, he was in the habit of sending the full notes connected therewith to his correspondent in Crowthorne for his final revision, which, more often than not, was productive of some important addition or exceedingly illuminating criticism or other comment.

"For many months this went on. Eventually, so much did Sir James feel himself and Oxford University in the debt of the mysterious savant (regarding whose social status the distinguished lexicographer could not make a guess) that he one day approached the university heads and pointed out that it would, so he considered, be a graceful and well-merited act on their part if an invitation were sent to the Berkshire savant asking him to be the guest of the university for a week.

POISONOUS PLANTS.

Many Flowers Have Sap That Is Poisonous if Swallowed.

There are no beautiful poisonous flowers native to this country. There are only three plants that are really poisonous to the touch. They all belong to the Rhus family, and resemble one another in their interesting clusters of dull greenish-gray berries.

Two of them, poison ivy and poison sumac, are found in the eastern part of the country, and poison oak grows on the Pacific coast. Poison ivy is a common vine that climbs over rocks, and that in some shady places covers the ground with luxuriant leaves. Occasionally, in fertile spots, it will raise branches like shrubs up over the rocky supports; elsewhere it clings to the bark of trees and climbs high.

Its flowers and berries are always in dull clusters, but its leaves may become brilliant red and brown in the autumn sun. Do not pick leaves that grow in threes on a vine, but do not be afraid to gather leaves of the woodbine, which grow in clusters of five.

It is difficult to distinguish poison sumac from other sumacs. Do not call it dogwood; it does not look like dogwood; true dogwoods have beautiful flowers, and are not poisonous. Poison sumac grows like a small, branching tree; it is the cleanest and smoothest in leaf and branch of all the sumacs. The leaflets are long and pointed, five to eleven on an petiole. If you see little drooping clusters of greenish-white, or later the greenish little berries, do not touch anything on that shrub or tree.

Poison oak does not look like any oak. It has clusters of three almost round leaves, which grow on a vine like poison ivy, or more often on a low shrub. If you see the clusters of white flowers, or berries, do not touch the plant.

There are many plants with sap that is more or less poisonous if it reaches a cut or abrasion. Do not let a plant drip on a wound. There are many plants with thorns and stings that produce painful irritation if they scratch through the skin. Pick their flowers carefully.

Do not ever hold flowers in your mouth. Do not give flowers to babies, for they are sure to put them into their mouths, and some of our familiar flowers have poison enough to affect a baby's bowels and plants that are harmless to man, but poisonous to animals, if eaten. Many who read these lines know the bad effects of the loc of weed of the West or the lambkin of the East. In pastures where buttercups abound cattle carefully graze round them, but will not eat the flowers or leaves, because of the bitter taste of the poison in them.

The botanist and lover of flowers should remember two things: first, it is safe to pick any beautiful flower; second, it is never safe to let its juices touch the lips or any flesh wound.

Sore Corns Go!

Absolutely Painless. No cutting, no plaster or pads to press the sore spot. Putnam's Corn Extractor makes the corn go without pain. Takes out the sitting over-night. Never falls—leaves no scar. Get a 25c. bottle of Putnam's Corn Extractor today.

The Difference. Little Molly had been very trying all day. That evening, when her grown-up sister was putting her to bed, she said she hoped the child would be a better girl to-morrow, and not make everybody unhappy with her naughty temper.

Molly listened in silence, thought hard for a few moments, and then said wisely: "Yes, when it's me it's temper; when it's you it's nerves."

Undeniably True.

Among a squad of policemen who were being examined on their knowledge of ambulance work was a certain Irishman with whom the doctor had the following colloquy: Doctor—What would you do to a man who had a cut on the forearm? Policeman—Sure, sorr, I'd bathe it with warm, soft water.

Doctor—What do you mean by soft water? Policeman—Och! Just soft water, sorr; wet water.

Doctor—And what is hard water? Policeman—Ice, sorr.

AN IDEAL TONIC

When your head is dull and heavy, your tongue furred, and you feel done-up and good for nothing, without knowing what is really the matter with you, probably all that is needed to restore you to health and vigor is a few doses of a reliable, digestive tonic and stomachic remedy such as Mother Seigel's Syrup.

Take it after each meal for a few days and not how beneficial is its action upon the stomach, liver and bowels—how it restores tone and healthy activity to these important organs, and by so doing enables you to gain new stores of vigor, vitality and health.

MOTHER SEIGEL'S SYRUP

The new 1.00 size contains three times as much as the trial size sold at 50c per bottle.

PRESIDENT SUSPENDER
NONE SO EASY
MADE IN CANADA

CHEERY WORDS AND WISE.
With the will to conquer, we are certain of victory.—M. Poincare.

Do not let doubt creep into your mind.—The essential condition of victory is patience.—M. Paul Cambon.

The world will not stand being bullied, especially by a graceless German bully.—Mr. Desmond McCarthy.

All the easy talk of peace is but froth upon the water when such a storm as this is raging.—Mr. Austen Chamberlain.

Men and women must do all things in proportion. They must be natural as well as national.—Bishop of Birmingham.

The secret of Germany's strength, wealth, and efficiency may be summed up in a single word: discipline.—Mr. J. Ellis Barker.

The moment has come when, so far as personal expenditure is concerned, it has become a virtue to be stingy.—Mr. Herbert Samuel.

A wholesome, good comic song very often helps a great deal in the cure of our wounded soldiers—quite as much as a hymn.—The Bishop of London.

For us, high or low, to whatever profession we belong, there must be no holidays till the great task is finally accomplished.—Mr. Walter Long.

The true victory will not lie so much in the tactical gains on the battlefield to-day as in the quality of the men who have to carry on the work of the nation after the war is over.—General Sir Robert Baden-Powell.

Minard's Liniment Cures Colds, Etc.
Persian carpets were formerly dyed with indigo, madder, or vine-shades, and from these materials shades were evolved that were impervious to the action of sunlight. Aniline dyes, which have been much used in recent years, give colors which fade more rapidly.
