Russian warships have been bombarding Varna and are reported to have destroyed the mine-fields protecting gotiations which were being conductthis chief Bulgarian port. Bombardment at closer range is now expected and troop-ships are said to be ed at the time, the French Govern-

The outstanding development of the week has been the new Russian offensive in Galicia. Details are still lacking, but the Central Powers report determined attacks against the Austrian lines over a front of nearly two hundred miles, running north from the Rumanian border. This new Galician drive has brought the Russian forces to the heights dominating Czernowitz. The Czar's troops have captured strong positions near the city, and the fall of the capital of Bukowina may be expected at any time. Activity of enemy submarines in the Mediterranean has been responsible for the loss of several large liners, including the Persia and the Glengyle.

No advance has yet been made by the Central Powers in Saloniki, and the Allies' position there is now considered impregnable. On the Western front there has been considerable activity in Alsace, heavy fighting having taken place for

possession of Hartsmannsweitlerkopf. Elsewhere on the Western front the fighting has been limited to artillery duels and minor engagements. British monitors have again shelled German positions on the
