WILL GIVE SERUMS FREE.

Every Municipality.

Acting on instructions from the day's work by eating for Hon. W. J. Hanna, Provincial Secretary, Dr. McCullough, chief officer of health for Ontario, has announced that starting about February 1 the department will supply free of toxin for smallpox, anti-meningitis serum, anti-tetanic serum, preventive rabies serum, and other serums diseases. The serums will be supplied physicians, bards of health, hospitals, instit-dons and all people

In the past the department has given anti-typhoid serum free, and it has resulted in a great reduction in cases of typhoid in the province. At the Isolation Hospital, where the worst cases of diphtheria are taken and treated with the antidiphtheretic serum, the death rate from the disease has been reduced to 6 per cent., while formerly the rate was 16 per cent. It is hoped that the free distribution of the serums will result in a wonderful decrease in the spread of the dread diseases.

soners who are now consuming our

There is a plague of rates along the British and French lines in Flanders and France. A soldier describes the invasion as "worse than the Germans," in a letter which adds:

"Trenches, communications, fields, woods, cellars and barns are choked with them. We have them holding congresses at night in the busiest roads and giving concerts by day in the most crowded villages. We literally march on top of them. They breed and breed and launch themselves into assaults on the cantonments, like the Germans on the Yser, by battalions en masse.

"They are beginning to be tortured by hunger, and the shortage of food makes them capable of anything. The other morning I saw a cyclist whose tires had been half devoured by a platoon of rats. The other night some DROFIT-MAKING NEWS AND JOB of our men had their surgical first-aid packets, which they keep in a coat pocket, attacked and carried off. Woe to the man who goes to sleep with a morsel of chocolate in his trousers!

out his trousers." The writer goes on to describe the methods of warfare that are being used against the new enemy, particularly some of the ingenious giant traps devised by the soldiers for catching the rats on a wholesale scale.
