Donald McKinnon Off to the Home of his Ancestors 500629 Sergt D. L. McKinnon C B Cable Section Big. Co. Canadian Engineer Training Depot Thorncliffe, England

Dear Home Folks, I'm going to make a start on a letter now after some two weeks interval from my last report. My furlough of my visit to London and Glasgow and Edinburgh and all our very kind friends living in Scotland whom heretofore I have known so very little. Having been in England some 4 months with not even a week end pass (with the exception of the first week of our sojourn here) we explained that we were fully entitled on coming to a Canadian camp to a regular six day furlough—granted to every unit almost immediately on arrival in England. And being constant in our claim the authorities here decided to let us away. So on Thursday we were given leave for 6 clear days with a free pass to any point in the United Kingdom. I had no hesitation in deciding my destination—taking my fare to Oban and intending to go thence to Tires if connections proved suitable. However I will come to this later.

WHY YOU ARE NERVOUS The nervous system is the alarm system of the human body. In perfect health we hardly realize that we have a network of nerves, but when health is ebbing, when strength is declining, the same nervous system gives the alarm in headaches, tiredness, dreamless sleep, irritability and unless corrected, leads straight to a breakdown.
