NOTES AND COMMENTS

The tone of Prince von Buelow's new book on "German Policies"-according to the cabled excerpts-is disquieting to those who had dreamed Buelow, whose prominence as a diplomat gives almost the "inspired"

same sentiment in 1814 at Vienna, other favorite in low shoes is the perand have found himself in accord with fectly plain pump of calf or patent forgotten in the summer scheme, for the spirit of his century. But surely leather. This is made with a rath- they are becoming daily more and Europe has learned something useful er long vamp and fits smoothly over

than they were on that day in August, broad-toed shoe, there are a number 1914, when the impossible became possible and destruction undreamed of was begun.

The appointment of Davir Lloyd-George as secretary for war to succeed the late Lord Kitchener again emphasizes the fact that Great Britain realizes it has found the exceptional man whom great crises often produce to deal with tremendous national problems.

It also emphasizes the fact that these exceptional men whom nations somewhow find to serve them in their hour of need cannot be bred to order from any class or caste. They often come from the most unsuspected quarters. What was at first regarded as their handicap ultimately proves to be their strength. In the retrospect it is plain that it was he exact sort of training required to fit them to understand and deal with the situa-

Had anyone predicted at the beginning of the war the large part that the little Welshman would play he would have been regarded as insane. Were anyone to deny it now he would be thought even more insane. It is now clear that he was the one man in British public life pre-eminently fitted to deal with the munitions problem is the most vital of all his promotion to the secretaryship for war of modish low shoes, on the Oxford is logical.

It is the glory and greatness of for street and business wear. democracy that it provides the widest possible field for training and selection of the exceptional man who is to serve in the time of extreme need. Careless of its latent riches and perhaps rushing on its fate is the nation that restricts the field too greatly.

MILK AS A BRACER.

months now as the one stimulant for in the evening over the sheer lingeric patient must be kept perfectly quiet. pel to be true. the French soldiers in the trenches, frock or the filmy dance dress. and its effect on them has amply fustified the statement made by the famous institute in regard to it.

Milk has been used liberally to stimulate the French soldiers before coat, and then again it is a part of they go into battle and its effects the blouse. The jabot blouse is one have been such that the French Gov- of the popular models of the season. ernment has urged the sale of milk, diers go off duty for their spells of rest and recreation.

That the qualities of stimulation should be demonstrated on the fighting men should commend the beverage to those engaged in the pursuits of peace in parts of the world where Mars does not now rule. While alcohol may fire the brain and dull the sensibilities and thus impart a false courage, milk, according to learned scientists of the Pasteur Institute, performs the work of keying up the individual without affecting the keenness of his senses or the coolness of his judgment. This is necessary to the mode of warfare which this war has exemplified, but it is no less necessary to the man working in the office, in the studio, in the mill, on the farm or elsewhere in the battle for a living. This fluid hitherto has been con-

sidered synonymous with all that is mild and peaceful. Advocates of preparedness have referred to "those milk-and-water pacifists." The "milk of human kindness" has no suggestion of powerful stimulation. ---

Her Argument. "Going to drop your cooking lessons right in the middle of the course? Why, I heard you got a proposal of marriage on the strength of going to cooking school."
