h Remembering

Come, comrade, we must answerand let our answer be-Why is the red blood flowing?-To

Chasten you and me. Yes, comrade, that's the message; so let us bow the head; God cheer the weeping women-God bless the silent dead.

And from this very moment, we'll open a fresh page; Record our resolution-the birth of

this new age-To make our aim and purpose-that, too, will be the test-To prove this world we live in, of

the worlds the best; And justify our mission, to put highest place, O'er all the Peoples of the Earth, the Anglo-Saxon race.

. . . . Now, may I say how I would like to see the People spiritualized, elevated and purified by the sacrifice and suffering of this war? I am no religionist, and as I have often said, I would rather that my tongue were cut from its roots, or my hand stricken with palsy, than that I should speak or write a word of insincerity in regard to a subject so grave and solemn as the ordeal through which the world is passing to-day. God knows that it should bring to the surface the best which is in every one of us. To me, personally, it has meant a new view of life and of death. But instead of doors as well as out, sufficient sleep, making me an upbraider of my fellow man I am disposed to be more tolerant of his faults. I remember that: you can find for looking young long. There is so much good in the worst of

And so much bad in the best of us, That it ill becomes any one of us To find fault with the rest of us. which, even whilst the guns are boom- cator. Fresh air tones up the whole a population of less than one-half the vate himself just two short years ago.

> . . . . Few persons, comparatively, really appreciate the value of fresh air as they should, for fresh air and sunshine are invaluable as developing and remedial agents. Storm windows should have ventilating facilities and every dwelling-house should have special attention given to proper ventilation. Besides these aids every person, old and young alike, should practise daily, and several times every day, deep lung breathing. It is wonderful how the lung capacity can be expanded by exercise. Then also with attention to these and allied details of physical hygiene, there must also be attention to details of mental hygiene. Most of all, any tendency to worry needs to be overcome. Worry deranges every bodily function. It throws the digestive and eliminative organs out of gear. It interferes with the circulation. In addition it wrinkles the skin of the face by acting on the facial muscles. In short, there is no escaping the fatal influence of worry on the personal appearance. It blasts good looks as a physical malady would. Anger, envy, jealousy, hate, all the corroding emotions must likewise be avoided. Let them take possession of the mind, and beauty is marred forthwith. Care as to diet, exercise in the open air, fresh air inemotional control-these are the prin-

FAMINE IN BUDAPEST.

Non-Existent. The Hungarian Government, frightened by the spectre of famine, is seeking to appoint a food dictator, but can find nobody to undertake the job and dictate with regard to food which has no existence, writes a Swiss correspondent. He says the commonest sight in Budapest is that of little crowds, mainly women, who wait wearily outside the shops for food which they cannot get.

Mr. Tabody, in the Pesti Napolo, tells that "women have to stand one or two hours to get a few potatoes; from two to three hours if they want hours for a quarter of a pound of sugar and from four to five hours for a bit of lard or fat. A woman who wants to get something to eat for her children every day must spend at least five or six hours waiting in the queues."

People in Budapest are tired of grumbling about the prices of necessaries. Within the last month they have again risen from fifty to one hundred per cent., but even the prices would not matter so much if only the food could be obtained. Budapest is Our summer beauty is glorious, and that the Prussians are taking away autumn bravely wore its crimson coat, nearly everything, and what they
